STRATEGIC PLAN ALIGNMENT

The Village Goals for 2011 include *Top Quality Infrastructure and Facilities* and *Preservation of our Residential and Neighborhood Character*.

FISCAL IMPACT

N/A.

RECOMMENDATION

Discussion only.

BACKGROUND

Following a severe storm event and significant flooding on October 2, 2006, the Village Council approved the hiring of four consulting engineering firms to complete a Storm Sewer Watershed Improvement Plan.

A presentation including specific project recommendations, cost estimates and recommended priorities will be presented by staff based upon the preliminary plans for each primary watershed.

- Lacey Creek Watershed – V3 Companies of Illinois
- Prentiss Creek Watershed – Clark Dietz, Inc.
- Saint Joseph Creek Watershed – Christopher B. Burke Engineering, Ltd. And Engineering Resource Associates

Staff will provide the Council with a brief presentation of the findings and recommendations prepared by the consulting engineers. A final report from the four firms will be available in August for the Council to review. The goal of staff is to schedule a formal presentation of the report to the Council no later than September 2007. Simultaneously, as a part of the FY08 Municipal Budget preparation staff is preparing funding recommendations for FY08 projects and the overall implementation of a Storm Sewer Watershed Improvement Plan on a multi-year schedule.
