This shall include reimbursable non-direct expenses. Any additional work performed in excess of the attached Scope of Services submission dated 2/15/08 that would increase the contract amount must be approved in writing by the Village of Downers Grove prior to commencement.

The Village of Downers Grove will comply with the Local Government Prompt Payment Act, 50 ILCS 505/1 et seq., in that any bill approved for payment must be paid or the payment issued to the Consultant within 60 days of receipt of a proper bill or invoice. If any such labor organization or representative fails or refuses to cooperate with the consultant in its efforts to comply with such Act and Rules and

Regulations, the consultant will promptly so notify the Department and the contracting agency and will recruit employees from other sources when necessary to fulfill its obligations thereunder.

Proposed Detailed Engineering Services
Village of Downers Grove 2008 CIP Projects
Inverness Avenue, Ashbrook to Belmont
2008 CIP Project #: ST-003

SCOPE OF SERVICES

HISTORY

GC Engineering was selected by the Village of Downers Grove to complete the design and plan preparation for the reconstruction of Inverness Avenue as part of the 2008 Capital Improvement infrastructure projects. The limits of the project were originally considered to be Inverness Avenue from Ashbrook Place to Belmont Road. However, the Village requested that the limits of the project be extended to include Inverness Avenue from Janes Avenue to Belmont Road. Additionally, an upgraded urban (curb & gutter) cross section, enclosed storm sewer and new sidewalk improvements are now to be included.

SCOPE OF SERVICES

GC Engineering proposes to complete the design and plan preparation for the full reconstruction of Inverness Avenue from Janes Avenue to Belmont Road. The proposed improvements for Inverness Avenue will consist of full depth bituminous pavement reconstruction with new concrete curb and gutter for the length of the project (approximately 1,300 lf). Included in the design will be the construction of concrete sidewalk along one side of Inverness Ave and a new enclosed storm sewer system. The following scope of services is included in conjunction with the proposed recommended improvements:

- 1) **Field Survey:** GC Engineering will complete topographic survey including pertinent existing features within the Inverness Avenue right-of-way from Janes Avenue to Belmont Road. The survey shall include an approximate 15-foot width of adjacent private property on each side of the roadway right of way. Topographic features will include mailboxes, utility poles, driveways, culverts, headwalls, sidewalks, sump pump outlets, roadways, manholes, catch basins, other visible utilities, trees, bushes and other related items required to complete the design and plan presentation of the proposed reconstruction. GC Engineering will also coordinate with Village staff to collect pertinent as-built plans and utility information.
- 2) **Plans, Specifications & Estimates:** The roadway design will consist of establishing the proposed horizontal and vertical alignments and the completion of a pavement design to determine the proposed pavement section. The drainage design will consist of computing the runoff for Inverness Avenue given the proposed cross section using the Rational Method. The capacities of storm sewers, culverts, and ditches will be

determined using the appropriate methodologies established in the IDOT Drainage Manual. A new enclosed storm sewer system will be designed to replace the existing ditch section along Inverness Avenue.

GC Engineering will develop the required Plans, Specifications and Estimates necessary to construct the proposed roadway. It is anticipated that the plans will be let for construction by the Village and will be funded entirely with Village Funds. Therefore, Village CADD, construction details and specification template will be utilized. The following sheets are anticipated for the construction plans:

Title Sheet	1
General Notes/Alignment/Ties	1
Summary of Quantities	1
Typical Cross Sections	1
Maintenance of Traffic	2
Erosion Control Plans	2
Plan and Profile	3
Intersection Details	1
Drainage/Utility	3
Construction Details	2
Cross Sections	4
Landscaping, Signage, Striping Plans	2
Standards	4
TOTAL	27 Sheets

3) Coordination: A thorough documentation of calculations, correspondence, submittals and approvals will be key to the success of this project. GCE will prepare and maintain a log of each milestone submittal, comments received and approval date for each of the above mentioned scope items. For purposes of this Scope of Services it is anticipated that a total of three meetings with the Village will be required. Due to the size of the project and the extent of the hydraulic disturbance, a complete DuPage County Stormwater Permit application will not be necessary. As the Village is a Full Waiver community, it is understood that the maintenance operations permit will be reviewed by Village staff for concurrence with the intent of the ordinance.
