SYNOPSIS

A motion is requested to approve the purchase of one (1) 2008 Allianz Madvac CN-100 compact sweeper from Temco Machinery, Inc. of Aurora, Illinois, as the lowest responsive and responsible bidder in the amount \$73,500.

STRATEGIC PLAN ALIGNMENT

The Five Year Plan and Goals for 2007-2012 identified *Exceptional Municipal Organization*. A supporting objective of this goal is *Top Quality Core Services Responsive to Current and Future Community and Citizen Needs*.

FISCAL IMPACT

The FY08 Equipment Replacement Fund budget provides \$70,000 for the purchase of a compact sweeper. Several vehicle and equipment purchases already made in 2008 are approximately \$30,000 under budget. Staff is requesting to apply \$3,500 of this amount toward the purchase of the sweeper.

RECOMMENDATION

Approval on the June 3, 2008, consent agenda.

BACKGROUND

The Fleet Replacement Plan adopted by the Village Council as part of the FY08 Budget includes the scheduled replacement of Unit 134 in the Public Works Department. This piece of equipment is a 1993 PowerBoss Armadillo sweeper used by the Forestry and Grounds Division to maintain the parking deck and other Village facilities, and it has become ineffective in recent years. As part of the specification development process, various makes and models of compact sweepers were reviewed by an internal staff team. The result was a comprehensive Call for Bids that clearly specified all of the minimum standards that were expected of the new compact sweeper. Only one vendor was able to meet all of the specifications.

Vendor	Make/Model of Equipment Bid	Price
Temco Machinery, Inc., Aurora, Illinois	Allianz Madvac CN-100	\$73,500
Atlas First Access, Inc., Bedford Park, Illinois	Applied Sweepers 525 HS	\$59,904
Nilfisk-Advance, Inc., Plymouth, Minnesota	Nilfisk RS 501	\$58,424
Atlas First Access, Inc., Bedford Park, Illinois	Applied Sweepers 525 HS*	\$52,309

* 2003 demonstrator unit

Staff believes the Allianz Madvac will increase the Village's operational efficiency and meet customer expectations for the cleanliness of the downtown. A smaller turning radius will provide more targeted and efficient sweeping; a larger fuel tank will allow for less frequent re-fueling; and a larger debris tank will increase capacity for collected debris.
