STRATEGIC PLAN ALIGNMENT

The Five Year Plan and Goals for 2008-2013 identified *Exceptional Municipal Organization*. A supporting objective of this goal is *Top Quality Core Services Responsive to Current and Future Community and Citizen Needs*.

FISCAL IMPACT

The FY09 Budget provides \$109,091.38 in the General Fund for this expense.

RECOMMENDATION

Approval on the May 19, 2009 consent agenda.

BACKGROUND

The Village has been utilizing the Sungard Public Sector CAD system for dispatching, records collection, electronic reporting, and LEADS inquiries for almost twenty years and it has proven to be a very reliable system. Sungard Public Sector, Inc. holds the proprietary rights for all of their software and, therefore, should be considered a sole source vendor to provide maintenance for their products. The proposed agreement would provide updates, service, and support for computer software applications utilized by the police and fire departments on the Village's Sungard Public Sector CAD Computer system. The new agreement would be effective from May 1, 2009 through April 30, 2010.

Below is a brief description of some of the software applications that this agreement covers:

- Looking Glass Mapping provides the dispatchers with a visual display of all Police/Fire/EMS calls. It also provides the officers visual maps on their laptops when they are dispatched to calls.
- QREP is a reporting tool used to extract data and write programs for CAD and Records databases.
- Mobil Data Browser Client is the base product that drives all of the Public Safety personnel's ability to receive and send information to Dispatch and provides access to LEADS, which allows officers to obtain license plate, driver's license, and criminal history information.
- Field Reporting Client provides the products that drive the Police Department's electronic field reporting system.
- E911 CAD400 Interface provides the interface for the ALI/ANI information for the 911 system that automatically enters the name, address, and phone number of the caller into CAD.
- CAD400 Redundancy is the secondary CAD system that runs on a separate AS400 system that mirrors and provides back-up to the primary CAD system.

- Pager Connect Interface interface's CAD with the Byteware paging system. This system allows staff to pre-set call types, status changes, and call outs in CAD that will automatically send pages to pre-defined groups such as, Fire Command, Police Command, and FIAT members.
- Imageware Mugshot Interface interfaces the mugshot system with the CRIMES adult arrest and juvenile arrest system.
- CAD-Computer Aided Dispatch is the central system that all of the above systems connect to. This system provides dispatchers with all of the data and information needed to dispatch Public Safety personnel to calls efficiently.
- CRIMES-Police Records Management System is the central data entry system for all information or reports generated by the Police Department.
- ISIS interface provides LEADS access to all police officers on patrol.
- Firehouse Interface downloads the CAD call data to the Firehouse server and starts to prepare a fire department report.

No contract awarded by the Village shall be assigned or any part sub-contracted without the written consent of the Village Manager. In no case shall such consent relieve the Contractor from their obligation or change the terms of the contract.
