

**VILLAGE OF DOWNERS GROVE
REPORT FOR THE VILLAGE COUNCIL MEETING
NOVEMBER 9, 2010 AGENDA**

SUBJECT:	TYPE:	SUBMITTED BY:
Purchase of a License Plate Recognition Camera System	Resolution Ordinance ✓ Motion Discussion Only	Robert Porter Chief of Police

SYNOPSIS

A motion has been requested approving the purchase of a License Plate Recognition Camera System from Genetec Inc., of Saint-Laurent, Quebec, Canada, in the amount of \$42,858. The implementation of this system will lead to more efficient and effective parking enforcement.

STRATEGIC PLAN ALIGNMENT

The Strategic Plan identifies *Exceptional Municipal Organization* and more specifically *Fiscally Sound and Sustainable Village Government* as a goal for 2008-2013.

FISCAL IMPACT

This project was not included in the FY10 budget but will be purchased using the savings resulting from a vacant Parking Enforcement Officer position. The position has been vacant for all of FY10, leading to \$75,446 in salary and benefit savings. Staff expects a short-term increase in parking violators being identified, resulting in additional parking ticket revenue that may decrease over time as parking behaviors change due to increased enforcement.

UPDATE & RECOMMENDATION

This item was discussed at the November 2, 2010 Village Council meeting. Staff recommends approval on the November 9, 2010 active agenda.

BACKGROUND

The Police Department has one civilian Parking Enforcement Officer who is responsible for enforcement of all Village parking regulations, including train station parking lots, the parking deck, Downtown Business employee lots and time-limit parking areas. Staffing, which has been reduced from three enforcement positions to one since 2009, is currently not sufficient to enforce regulations in all of the public parking areas.

A License Plate Recognition Camera System (LPR) integrates vehicle-mounted cameras with software on an in-vehicle laptop computer to digitally process images of license plates on parked vehicles. Processing the images of the license plates on parked vehicles allows the officer to quickly identify vehicles that are parked in violation of regulations. The system will allow the Parking Enforcement Officer to more efficiently enforce commuter permits and parking within time-limit zones, as well as identify wanted vehicles or parking scofflaws. The system will enable more checks per day, enabling one parking officer to be much more effective and efficient in enforcement efforts. For example, a parking enforcement activity that now takes approximately one hour would take approximately 10 minutes using the proposed system. The system will also allow for digital parking permits, which would eventually eliminate the need for hanging commuter permits and the costs associated with printing and mailing permits.

A Request For Proposal (RFP) was recently completed for the License Plate Recognition Camera System. Six vendors submitted proposals; three were invited to give presentations to staff. Genetec was the only vendor that met the Police Department's specifications as outlined in the RFP. Therefore, staff recommends that Genetec be awarded the contract. The initial purchase includes a one-year warranty. Ongoing maintenance will cost approximately \$4,400 per year.

City of Downers Grove, IL LPR Requirements

Based on conversations with Downers Grove personnel, Genetec understands the requirements for a License Plate Recognition system to include the following:

- Overtime Parking Enforcement – Downers Grove enforces time limit parking throughout the city between 15 minutes and 2 hours manually (tire chalking).
- Permit Parking Enforcement – Downers Grove enforces numerous parking lots manually by reviewing hang tags in the vehicle.
- Wanted-vehicle Enforcement – Scofflaws for delinquent accounts and possibly Law Enforcement applications such as stolen vehicles, felony warrants etc.
- LPR Camera Read-rate accuracy

Genetec LPR Solution addressing Downers Grove's requirements

Based on the above software requirements, Genetec fully supports each requirement.

- Overtime Parking Enforcement – In parking areas where vehicles are allowed to park for a specified time period, AutoVu electronically chalking vehicles by collecting license plate numbers of parked vehicles. During subsequent passes, AutoVu electronically chalks new vehicles and automatically flags vehicles that have remained parked in excess of the allowable limit, displaying recorded times and images of the vehicle, the license plate and vehicle wheels (optional) from both passes. To facilitate enforcement, operators can prompt the system to show a map indicating all areas where time limit has expired. AutoVu can be used to enforce time-limit parking based on various municipal regulations such as block face, same space, and parking in a district or area.
- Permit Parking Enforcement – At the beginning of a shift, permit lists are automatically downloaded to the AutoVu system. The operator then selects the permit zone which they intend to enforce via the touchscreen interface. While the vehicle is on patrol, AutoVu automatically alerts the operator of vehicles that do not possess a valid permit, showing images of both the vehicle and the license plate.
- Wanted-vehicle Enforcement – More than flagging parking violators, AutoVu alerts operators of scofflaws, stolen or other wanted vehicles by comparing license plates to customer-acquired hot lists. This makes AutoVu a multifunctional LPR solution that can be used to enforce parking regulations while enhancing and promoting residents' safety.
- LPR Camera and Read Rate Accuracy – Genetec's Sharp LPR camera utilizes a High-Definition (HD) 1024x768 LPR lens for the most accurate vehicle plate identification system in the industry. Additionally, Genetec's award winning camera has the ability to read cars parked parallel, 45 and 90 degrees without additional cameras or user manipulation. The Sharp's advanced technological capabilities allow it to capture license plates from vehicles moving at differential speeds of up to 140 MPH. With the ability to read plates from all over the world, the AutoVu Sharp is a solution that meets

the requirements of various context environments including all 50 states in the US. This device meets unsurpassed accuracy, regardless of the license plate style.

Benefits of using Genetec's automated License Plate Recognition system

- ROI of 1-5 months by being more efficient, productive and eliminating all permit costs related to the manufacturing of tags and distribution (postage, envelopes etc.)
- Simultaneously enforce time limit enforcement, hotlist (scofflaw) and permit parking in preconfigured zones.
- Automate the enforcement of various types of permits and time limit zones.
- Improve the collection of unpaid vehicle infractions through scofflaw hot list identification.
- Become more efficient at covering vast enforcement areas.
- Use data as evidence against infractions and to optimize route management.
- Strengthen the safety and security of your city by automatically detecting stolen vehicles, or those belonging to felons.
