SYNOPSIS

A resolution has been prepared authorizing an agreement between the Village and Total Parking Solutions for a Pay-by-Phone option for daily fee parking for the Belmont train station and parking deck parking spaces. An ordinance has been prepared to allow credit card payments for parking and establish an administrative fee for pay-by-phone transactions.

STRATEGIC PLAN ALIGNMENT

The goals for 2011 to 2018 include *Exceptional Municipal Services* and *Continual Innovation*.

FISCAL IMPACT

This service has a start-up cost of \$1,000 that will be paid from the Parking Fund. Staff recommends recouping this cost with a \$.13 administrative fee per transaction.

RECOMMENDATION

Approval on the April 19, 2011 active agenda.

BACKGROUND

The Village's parking pay station vendor, Total Parking Solutions, provides a pay-by-phone option in partnership with ParkMobile. This service, which would be a new, convenient option available to daily fee parking space users, allows users to bypass the Village's parking pay station and instead pay using a mobile phone application, phone call or any internet connection. Pay-by-phone users will pay the \$3.00 daily parking fee, plus an additional transaction fee levied by the Total Parking Solutions of \$.37 per transaction. Staff recommends an additional \$.13 administrative fee per transaction to recoup the service's start-up costs of \$1,000. Therefore, users who choose the pay-by-phone option will pay a total of \$3.50 for daily parking fees.

The pay-by-phone system is currently in place in Barrington, Crystal Lake and Hinsdale. Staff contacted officials from Barrington, which has been using the pay-by-phone system since November 2010. Barrington is pleased with the system to this point.

Because the transaction fee is an adjustment to the parking fees found in the Municipal Code, an ordinance has been prepared to amend daily parking fees to include the \$.50 transaction fee if the pay-by-phone system is used. The ordinance also amends the payment types to include credit cards payments and to delete the Village debit card, also known as a Smart Card, which will no longer be accepted for payment when the new pay stations are installed in the Downtown parking deck. Current Smart Card users will be eligible to receive a refund for the balance remaining on the cards.

Centralized Data Management

Information is instantly sent to Parkmobile's centralized data management system and is immediately available to the parking provider. All information is protected using a SSL-256 bit encryption process. Our SQL servers are maintained and hosted in a secure and redundant cloud using a SAS-70 certified service provider here in the U.S.

Pricing

Pay by Phone charges are a standard rate of \$0.37 per transaction, which would be paid by the end user or the Client.

Implementation of Integrated Pay by Phone system is \$1,000 for the initial programming and set-up, and installation of signage and informational stickers. There is a cost of \$250 for each additional parking lot or garage added to the system by the municipality or operator.

Integration

Parkmobile offers pay by phone parking as a hosted solution to a Village. This means that the City has 24x7 access to reports offered via username and password protected SSL256 ('Padlock') encrypted website. The only system operating requirement is Internet Explorer 5.5 or higher. Parkmobile's platform is Microsoft .net and SQL server based. All of our solutions are also compatible with Apple and other operating systems. Parkmobile's pay by phone parking system is hosted by AT&T in a synaptic 'cloud' hosting solution which guarantees an unmatched uptime performance of 99.99%.

Cale Integration

Parkmobile offers custom integration with Cale's web interface system. At locations where Parkmobile's pay by phone parking system is used, suppliers can pull the detailed parking information obtained from Parkmobile's pay by phone parking system to then present to their customers through Cale's web interface. The integration can be configured to pull the parking information as often as necessary to present real-time parking start/expiration times for parking spaces. The following parking information is an example of what can be pulled from Parkmobile's pay by phone parking system:

- ✓ Start date and time of the payment
- ✓ Expiration date and time of the payment
- ✓ Space number (if one was used)
- ✓ Parking zone number

Enforcement

Enforcement shall be integrated with Cale WebOffice and all Pay by Phone transactions shall appear real time with Pay by Space transactions paid at the pay stations as they are currently done over Cale WebOffice.
