RECOMMENDATION

Approval on the May 10, 2011 consent agenda.

BACKGROUND

In November 2010, a vehicle accident near the pump house adjacent to the Finley Water Tower caused a water main pipe to rupture beneath the cement floor of the well house resulting in significant damage to the structure of the pump house and the equipment within it. Immediate repair work was completed to ensure that the well house was functional, with a plan to complete additional repair work in the spring to fully repair and restore the structure and its equipment. The Village has successfully pursued payment for all costs associated with the pump house repairs from the insurance company of the individual who caused the accident.

This item will authorize a contract for the first of a three-phase repair process necessary to complete all repairs to the well house. The first phase of repair involves three separate projects:

- 1) The repair of mechanical equipment within the structure, including electrical rebuilding of the motor control cabinet,
- 2) Valve removal and replacement, and
- 3) removal and repair of the pump motor.

Village staff from the Building Services Division will oversee the completion of this repair work.

An RFP was issued for first phase, allowing contractors to submit bids for one or all three of the projects associated with Phase 1. Flolo Corporation was the only contractor to submit a proposal for all three projects and also submitted the lowest price for all proposals. A summary of the proposals is below.
