

Staff Responses to Council Questions
August 16, 2011

Public Hearing – Midwestern University TEFRA Bond Hearing

Would Midwestern have any use for using our Bond Cap?

No. Midwestern University has indicated that the bonds that will be issued through the Industrial Revenue Authority of the City of Glendale, AZ will meet their needs and they are not requesting the use of the Village's bond cap authority.

Active Agenda D-U Annexations: Regarding all the Annexations

Are they to be read individually? Also, procedures ask the Mayor to call for motions, which he may ask for in an incomplete manner, with the Commissioner making the motion making an incomplete repeat or a, "So moved." Is this proper procedure both from a parliamentary standpoint and/or from the standpoint of the Open Meetings Act? In short, are the shortcuts following complete procedures?

One motion for the approval of multiple ordinances and the use of "so moved" to make a motion is compliant with the Open Meetings Act and other applicable legal requirements.

Comprehensive Plan Meeting

Each Commissioner has met with Staff and has proposed edits. Based on the first meeting, edits were to be noted in a revised proposed document with notations as to who submitted proposals. I would like to see a list of edits and proposed changes – not just the final draft proposal and verbal staff explanations as if it was done in an open meeting as originally planned.

Attached please find a track changes document comparing the previous draft to the current draft of the plan.

Non-Agenda Question

How old is the existing Lot A retaining wall?

This retaining wall was constructed in 2001. The failure of the wall is attributable to the way the railing is attached to the concrete wall, which we are correcting with this project.

Downers Grove EDC Statement Regarding 3500 Lacey
Comprehensive Plan Track Changes Document

Date: August 15, 2011

To: Mayor Tully and Village Council

From: Michael Cassa, President
Downers Grove Economic Development Corporation

Re: 3500 Lacey Road

On behalf of the Downers Grove Economic Development Corporation, I am presenting our position on the proposed Final Planned Development Amendment to Planned Development #31, Esplanade at Locust Point.

Bentall Kennedy LP is the owner of 3500 Lacey Road, LLC. Hamilton Partners, as their authorized agent, has submitted plans to expand parking for the office building. The petitioner is proposing to construct two five-level additions to the existing parking garage, and a new six-level parking garage. The petitioner is seeking approval for side yard setback variations. The Plan Commission recommended approval at their July 11, 2011 meeting. The Village staff report also recommends approval.

3500 Lacey Road is a 12-story, 658, 370 square foot office building that is the corporate headquarters for Sara Lee Corporation. Sara Lee occupies about 75% of the building. The current parking facilities were constructed in 1991 as part of a build-to-suit, single-tenant corporate headquarters for Spiegel. The building is now a multi-tenant facility. The parking study found that additional parking would be necessary to support more general office tenants. As the staff report indicates, should new tenants locate in the building, the existing parking ratio may not be adequate.

In addition, the current office market, especially in the east-west corridor, is very competitive. It is imperative that prospective office tenants know that there are approved plans to ensure sufficient parking for this building. Office buildings in neighboring communities, that are also competing for signature tenants, should not have an advantage because the expansion of parking facilities at 3500 Lacey Road must still be approved by the Village.

Finally, the construction of additional parking facilities represents a large investment by the building owners. The expansion and addition of new parking is expensive, but necessary. From an economic development standpoint, improvements to commercial property are critical to the long-term viability of that property.

3500 Lacey Road is one of the premier office buildings in the Chicago area. The plans submitted by the petitioner will enhance that facility and make it more marketable to prospective tenants.

The Downers Grove Economic Development Corporation supports the proposed expansion and addition of parking for 3500 Lacey Road.

INTRODUCTION

Downers Grove, Illinois Comprehensive Plan

THE COMPREHENSIVE PLAN SETS FORTH LONG-RANGE RECOMMENDATIONS FOR THE MAINTENANCE AND ENHANCEMENT OF EXISTING COMMUNITY AREAS, AND FOR DESIRABLE IMPROVEMENTS, DEVELOPMENTS AND REDEVELOPMENTS WITHIN THE VILLAGE AND ITS PLANNING JURISDICTION

This document presents the Comprehensive Plan for the Village of Downers Grove, Illinois. It sets forth a long-range guide for the maintenance and enhancement of existing community areas, and for ~~desirable~~ improvements, developments and redevelopments within the Village and its planning jurisdiction.

This Comprehensive Plan (“The Plan”) is the result of a ~~twelve-month~~ planning program ~~that lasted over a year,~~ which was preceded by a nine-month community outreach process known as Total Community Development 3 (TCD3).

The Downers Grove Community

The Village of Downers Grove is a community of over 48,000 located approximately 22 miles southwest of Chicago. Downers Grove residents enjoy convenient proximity to a major metropolitan city while experiencing a hospitable, small town environment. Beyond its borders, the Village is well-located in the western suburbs with excellent access to recreational, employment and shopping opportunities. The Village is regarded as a desirable community within which to live for its high quality schools and residential neighborhoods.

Established in the early 1800s, Downers Grove has a rich past with established neighborhoods and a traditional downtown. The Village’s location along the BNSF railroad has been a significant source of growth and prosperity, first for freight and now commuter service. Downers Grove has obtained regional importance in the modern era due to its proximity to I-88 and I-355 and its three Metra stations. Metra service in the Village connecting to downtown Chicago is unrivaled by any of its neighbors. Downers Grove has emerged as a regional employment center and major shopping and dining destination.

A location map for the Village of Downers Grove is provided in the *Regional Setting* graphic on page 2.

Purpose of the Comprehensive Plan

As the Village looks towards its future, the Comprehensive Plan will guide development decisions and ~~to help~~ ensure quality of life remains high. The Comprehensive Plan accomplishes this by directing the use of land; the movement of vehicles and pedestrians; the protection of open spaces and environmental resources; ~~the~~ revitalization of the Village’s key commercial areas; and the provision of parks, schools, and other public facilities. It addresses residential neighborhoods, commercial and business development, public and institutional lands, and the public rights-of-way. The Comprehensive Plan promotes the Village of Downers Grove’s unique assets and should be used to achieve the collective vision of the Village while attracting new families and ~~desirable~~ development.

The Comprehensive Plan provides numerous recommendations that are designed to help the Village achieve its overall vision. These recommendations do not take into account fiscal or other constraints. The recommendations also do not account for future best practices or technological advancements. As such, the Village will need to re-evaluate the recommendations at regular intervals to keep the Plan current and in tune with the aspirations of the community and adapt it to changing ~~conditions, societal and fiscal forces.~~

The Comprehensive Plan is the official, adopted guide for future development and conservation within the Village of Downers Grove. The Plan sets forth goals, policies and objectives based on community desires and a thorough analysis of existing conditions and trends. The Comprehensive Plan illustrates a vision for the physical, ~~social,~~ and economic characteristics of the Village for the next 15 to 20 years. Additionally, it outlines policies and guidelines ~~recommended~~~~needed~~ to implement that vision for the long-range future of the community. The Comprehensive Plan helps preserve and protect important existing features and resources, coordinate new growth and development, and establish a strong, positive community identity.

The Comprehensive Plan considers the Village’s regional setting and adjacent areas and influences by examining all areas of the Village and the adjacent unincorporated areas that fall within the Village’s planning jurisdiction based on existing boundary agreements with neighboring municipalities including Darien, Westmont, Oak Brook, Lombard, Glen Ellyn, Lisle and Woodridge.

State Planning Acts

Several Illinois statutes contain general descriptions of what a comprehensive plan is, and what it should contain. The Illinois Municipal Code (65 ILCS 5/11-12-5(1)) dictates that a city or village plan commission must prepare and recommend a comprehensive plan to serve as a tool for guiding future development or redevelopment within the municipality. These plans cover the entire incorporated area of the municipality and can extend to land up to one and a half miles beyond its corporate limits. Elected bodies (i.e. village and city councils) charge their appointed planning or zoning commission with the task of preparing a plan and once it is complete, they vote on its adoption as a guiding document for the municipality.

The Illinois Local Planning Technical Assistance Act (Public Act 92-0768, Sec. 5) provides additional guidance as to what elements a comprehensive plan should address, including land use, natural resources and the environment, transportation, economic development and housing/residential development. In addition to these essentials it is suggested that a comprehensive plan consider additional elements, adjusting to suit unique community issues, including: parks and open space, historic preservation, urban design, subareas/key focus areas, agriculture and forestry, and technology.

Foundation versus Obligation

It is important to understand that a comprehensive plan is a vision of what a community wants to become and a roadmap on how to get there. It is not a definitive course of action or a legally binding obligation of what must be done. Rather it is an aspirational document that describes in general terms what the community is to become and what steps and actions can help meet community goals.

Although comprehensive plans are required to be adopted by communities, their legal authority is limited. They are documents that guide future development of a community; they are not, themselves, development plans. A comprehensive plan serves as a foundation for decision making in a community and is not an absolute mandate. The Plan is intended to inform regulatory tools (such as a zoning ordinance) and also a community's decisions, as leaders determine courses of action and the most appropriate forms of development and growth for a community.

The Planning Process

In March 2009, the Village of Downers Grove hired Houseal Lavigne Associates to conduct the Total Community Development 3 (TCD3) community outreach process and begin the preparation of a new Comprehensive Plan.

The planning process entailed a high degree of resident input and participation. TCD3 elicited ideas and observations from thousands of participants regarding key issues and potentials within the Village and its surrounding area. Public meetings were also undertaken at key junctures throughout later stages of the planning process to present information, discuss findings and conclusions, and establish consensus. The results of the TCD3 outreach activities can be found under separate cover in a report entitled *TCD3 Summary Report and Action Plan*.

Comprehensive Plan Committee

In order to guide and assist the Consultant with developing the Plan, an ad hoc Comprehensive Plan Committee (CPC) was established. The CPC convened in February 2010 for the first of nine monthly meetings to develop the Comprehensive Plan. The CPC was charged with three responsibilities:

Ensure that the issues identified during the *TCD3 Process* were considered for the *Comprehensive Plan*.

Hold regular meetings to discuss the essential components of the *Comprehensive Plan*.

Serve as a “community sounding board” for the consideration and formulation of concepts and recommendations

Organization of the Comprehensive Plan

The Comprehensive Plan is divided into the following 1044 sections:

Section 1: Background to the Comprehensive Plan – This section of the Plan provides an understanding of the public input/TCD3 process, existing plans and studies and the current demographic profile for the Village.

Section 2: A Vision for the Future – This section describes, in general terms, the kind of community that Downers Grove desires to be in the future. It includes a vision statement for the community, which describes an “ideal” setting for the community in the year 2026.

~~**Section 3: Goals and Objectives** – This section presents goals and objectives that provide specific actions intended to move the~~

~~community towards its desired vision.~~

Section 4: Land Use Plan & Policies – The Land Use Plan establishes land use designations for all areas of the Village, presents recommendations for improving and enhancing existing land use areas, and promotes compatible new development and redevelopment in selected locations.

Section 4:5: Residential Areas Plan & Policies – ~~This section~~~~The Residential Areas Plan and Policies~~ provides ~~more specific~~ recommendations and policies ~~specific to improving Downers Grove's guide future growth and incremental improvements within the existing residential areas.~~ ~~to ensure their long-term well-being.~~

Section 5:6: Commercial Areas Plan & Policies – This section provides recommendations and policies specific to improving Downers Grove's commercial and industrial areas.

Section 6:7: Transportation Plan & Policies – The Transportation Plan presents policies and recommendations related to access, traffic circulation, parking, pedestrian and bicycle movement, and public transportation.

Section 7:8: Parks, Open Space and Environmental Features Plan & Policies – This section presents policies and recommendations for maintaining and enhancing the community's open space and environmental features, including parks, forest preserve, water features, wetlands, and any other environmental features of interest.

Section 8:9: Community Facilities Plan & Policies – This section provides ~~an~~~~detailed~~ inventory of community facilities and presents policies and recommendations for municipal facilities, public utilities, telecommunications facilities, schools, institutions, cultural facilities, and other community facilities and services.

Section 9:10: Key Focus Area Plans – This section builds upon the generalized guidelines established in the Village-wide plans, providing more detailed and site specific improvement and development recommendations for the overall role and function of an area; land use and development; traffic, circulation and parking; and appearance and character.

Section 10:11: Implementation – This section presents specific actions including recommendations regarding development controls, priority improvement projects and redevelopment sites, and potential funding sources for implementing the recommendations of the Comprehensive Plan.

Appendix: Goals and Objectives – This section presents goals and objectives that provide specific actions intended to move the community towards its desired vision.

Maps & Graphics

~~Visual communication through the use of photos, maps, charts, and illustrations has become increasingly important in the digital age. In the past, plans such as this would sit on shelves and desks in the back offices of the Village Hall, used by administrators charged with orchestrating its implementation. Today, plans are highly visible and accessible, posted on-line as PDFs for the entire community to see and use. As such, they must be inspirational, easy to use, and easy to understand by everyone in the community, not just staff and officials and the development community.~~

~~The Comprehensive Plan emphasizes the use of illustrative full-color maps and graphics to document existing community conditions and to highlight planning policies and recommendations. This approach conveys planning and development data clearly and concisely, and will help make the Comprehensive Plan “user-friendly” in the years ahead.~~

Section 1

BACKGROUND TO THE PLAN

Downers Grove, Illinois Comprehensive Plan

Section 1

THE COMPREHENSIVE PLAN IS BASED ON A FOUNDATION OF PUBLIC INPUT RECEIVED THROUGH AN INNOVATIVE AND INTERACTIVE COMMUNITY OUTREACH PROCESS REFERRED TO AS TOTAL COMMUNITY DEVELOPMENT 3 (TCD3) THAT RECORDED THE NUMBER OF PARTICIPANTS AS REACHING INTO THE THOUSANDS.

The Village of Downers Grove's previous Comprehensive Plan was adopted in 1965. Since that time, the Village has experienced significant population, economic and physical changes. In an effort to address many of the current issues, challenges, and opportunities facing the community, the Village adopted an updated Comprehensive Plan. The Comprehensive Plan will assist the Village in setting long term goals, coordinating local decision-making, and providing guidance to property owners and developers.

The Village proceeded to build off of the public input process TCD3 through extensive data collection and analysis of existing conditions and local and regional trends. The Village worked collaboratively to establish a vision and a plan that carries on the tradition and character of the community while continually addressing new challenges.

TCD3

Downers Grove has a unique and long-standing commitment to public participation through its Total Community Development (TCD) process. TCD was first undertaken in the 1960s, with a second round in the 1990s. TCD is a process that is used to identify and examine all aspects of community life by engaging residents, business owners, and elected/appointed officials in a variety of settings and formats. What results is the identification of community issues, concerns and corresponding recommendations that guide long-range planning in the Village.

The extensive community outreach process, high level of citizen participation, and citizen-based results of TCD3 serve as the community outreach foundation for the Comprehensive Plan.

Staying true to its comprehensive nature, TCD3 also included the school and park districts. A full summary report and action plan for TCD3 is available under separate cover at Village Hall and on the Village website.

TCD3 was an extensive and comprehensive nine-month outreach and resident participation process that took place between March and October 2009. It was designed and implemented to maximize resident involvement and foster a healthy and open dialogue regarding community issues. TCD substantially informs the Comprehensive Plan and functions as the primary community outreach component of the planning process.

The extensive nine-month process for TCD3 outreach included the following components:

Interactive Project Website

Resident Survey (819 responses)

Business Survey (51 responses)

Interactive Map (55 custom maps, 600 points of interest)

Initiation Workshop (90 participants)

Neighborhood Workshops (4, with over 250 participants)

Governing Body Workshop

Boards and Commissions Workshop
Business Workshop (35 participants)
Student Workshops (elementary and middle school)
Independent Group Submittal (8)

The TCD3 process entailed extensive community outreach, however, its principal finding or recommendation was not one that was directly expressed by residents, but rather revealed itself as a thread that bound together the diverse range of identified community issues—the need for improved communication, coordination, and cooperation amongst residents and local units of government in addressing the full range of community and neighborhood issues.

Although the TCD3 process identified a wide range of needs, projects, and issues, few identified issues are broadly applicable or a priority for the entire community. For instance: residential teardowns are an issue in some neighborhoods, but not all; protection of the tree canopy was a top priority in some areas; and, the need for a neighborhood park was identified by some, but not by residents who live in areas well served by neighborhood parks. All of these are valid concerns, but each affects different areas of the community in different ways, and may or may not be a priority for residents in other areas. It is this realization that led to the conclusion that what was needed was a better way of effectively addressing the entire range of community issues in a manner that was more responsive to the community as a whole as well as all of its distinct areas.

The **principal recommendation** of TCD3 was a better model for communication, cooperation and coordination. This will result in more responsive local government on the key issues identified in TCD3, enhance community coordination and cooperation, and assist in establishing priorities and focus.

TCD3 Common Themes

In addition to the principal recommendation of TCD3, eight common themes emerged:

Infrastructure
Economic Development
Residential
Public Services and Facilities
Parks and Recreation
Education
Financial
Environment and Sustainability

The summary on the following pages presents a detailed overview of each theme that emerged from the TCD3 process.

Infrastructure

The focus area of Infrastructure incorporates issues or concerns related to roads and streets, water and sewer, sidewalks, and other types of public infrastructure. Ensuring that all areas are adequately served by infrastructure and related services is a fundamental function of the Village. Planning, funding, and providing needed infrastructure improvements will represent a significant planning challenge moving forward. Maintaining high-quality infrastructure is an important role for the Village, and so too is the Village's role as a liaison between other infrastructure providers, ensuring the "backbone" of the Village is functioning and in good repair, and expanding to meet the changing needs of our community.

The most significant infrastructure related issues identified by the community centered on the common theme of mobility. While Downers Grove's infrastructure is comprised of a multitude of components including water and sewer, communications, power, and the local transportation network, the community focused its attention on issues related to getting in and around Downers Grove either by car, bicycle, or foot. The majority of infrastructure comments concerned pedestrian circulation and safety, vehicular transportation, and public transportation, infrastructure provided by the Village, Metra, Pace, IDOT, the Park District, DuPage County, and others.

Economic Development

Economic Development incorporates issues or concerns related to the health of the Village's business community and commercial districts.

The sphere of Economic Development encompasses several broad concepts such as business development and workforce development. Economic development also relates to physical development and the attraction of businesses to a community.

A healthy economy is a vital component of the high quality of life enjoyed by Downers Grove residents. Economic development strengthens the community by providing higher quality employment opportunities its residents, supports local businesses, and attracts new businesses to locate within the Village. Economic development is critical to developing and sustaining our tax base and revenue streams for the Village. Providing increasingly diverse shopping choices generates retail sales tax for the Village which, in turn, offsets the residential property tax burden and allows the Village to provide enhanced services and make physical improvements.

The community's comments reveal a divergent understanding of the economic development issues facing the Village. Community input indicates that the while the larger public perception of the primary purpose of economic development is to attract new businesses, the primary purpose perceived by local businesses is to improve conditions for existing employers. Workshop responses from neighborhood residents focused on attracting retailers and facilitating commercial development projects.

On the other hand, local government representatives and members of the business community focused their attentions on general business development strategies to stabilize local businesses, improve employment, and encourage a more balanced tax base. Despite these differing perspectives, all participant groups indicated support for physical enhancements to the Village's commercial districts, namely Downtown and Ogden Avenue.

Residential

The focus area of Residential incorporates issues affecting the quality of life within the Village's neighborhoods. The majority of comments made by residents in this category were in regard to residential development, community character, and housing diversity.

The majority of the community's comments regarding the residential areas of Downers Grove throughout the TCD3 process spoke to a desire to preserve the quality and character of existing neighborhoods and enhance the local community. More specifically, participants indicated that the creation and consistent use of design and development controls, zoning and land use controls, and code enforcement are needed to ensure that new development and neighborhood enhancements do not detract from, but rather reinforce, existing patterns of development. While preserving community character appears to be paramount, participants would also like to see additional housing options introduced to the Village's housing stock. These housing options are needed to provide diversity among local housing prices and enable young and old households to choose a home within the Village based on their varied means and lifestyle.

Public Services & Facilities

The focus area of Public Services and Facilities is a diverse discussion category that incorporates a wide range of services in numerous facilities offered by the Village. Community comments related to this topic frequently referred to the proposed Village Hall and Police Station facility, communication and outreach efforts on the Village's behalf, public safety services, the need for additional community facilities, leaf collection, refuse removal, and snow removal. The diversity of comments related this topic concealed any overarching themes that might otherwise emerge in community wide concerns related to public services and facilities. Based on the number of comments, the most significant issues related to the proposed joint Village Hall and police Station facility and Village communication and outreach, and levels of service.

Parks & Recreation

The focus area of Parks and Recreation incorporates issues or concerns related to the creation, expansion and maintenance of the community's parks and recreation facilities as well as the programs and amenities offered at those facilities. These areas contribute significantly to the quality of life, image, character, and desirability of the Village.

A key factor in defining quality of life is the provision of parks, open space and recreational opportunities within a community. The comments related parks and recreation encompassed a wide variety of topics and the great majority was recommendations for new facilities and

programming. While there were a multitude of suggestions for specialized facilities such as a rock climbing wall or dog walk, whether or not to invest in a public pool or water park was the most significant parks and recreation related issue identified by the community. TCD3 comments indicate that the community is relatively well served by the community's parks and recreation facilities, but there is an unmet demand for additional programming across all age categories. Moreover, additional pedestrian and bicycle linkages are needed to improve access and enhance the use of the community's parks and open space.

Education

The focus area of Education incorporates issues or concerns related to the administration and performance of local school districts and the creation, expansion and maintenance of their facilities. This category encompasses a variety of topics such as course and program recommendations, maintenance issues, parking needs, school finances, district boundaries, and faculty and educational standards.

The Village is primarily served by two School Districts; District #58, and District #99. Together, these districts provide a well-respected and highly regarded school system serving the students of Downers Grove. It is difficult to abstract any significant community-wide issues from participant comments related to education in Downers Grove. Ultimately, retaining high educational standards may be the top priority.

Financial

The focus area of Financial incorporates comments related to the fiscal health of the Village. Comments within this category were typically in regards to the Village budget, revenues and expenditures, and the current state of the economy.

The financial health of the Village is a reflection of the ability of the Village Staff to properly plan, budget and implement the current operations and budget of Downers Grove. The community's thoughts regarding Village finances were straightforward. Comments were often very general, calling for improved fiscal responsibility. The community wants the Village to take current economic conditions into account by making needed adjustments to both revenue streams and expenditures and planning for long-term financial sustainability.

Sustainability and the Environment

The focus area of Sustainability and the Environment incorporates comments related to the Village's natural features and general ecological health. Comments frequently related to storm water management and flood control and sustainable design as well as Village policies related to conservation and environmental protection. Many of the community's comments related to the other umbrella categories touched on the topic of protecting or enhancing the environment. TCD3 participants expressed a desire to make physical improvements, including infrastructure enhancements, and change Village policies to promote the long-term health of the local environment.

Under these eight community focus areas, specific objectives were created and culminated in an action plan. The purpose of the action plan is to track the accomplishment of objectives including timing and responsible agency.

Past Plans and Studies

A thorough review of the Village's existing and past plans, studies and reports was conducted to gain a better understanding of prior Village initiatives, assessments, and objectives. Understanding the purpose and results of these documents provides important insight into what has already been studied and recommended for the Village. As conditions change over time, the relevance of some documents is lessened while some components of other documents continue to provide community direction and remain representative of community aspirations. As part of inventorying and understanding existing conditions, a review of these documents is essential. A summary of reviewed documents follows.

A Comprehensive Plan for Downers Grove, 1965

Comprised of 600 acres at the time of its original platting in 1872, Downers Grove grew to more than six times that size (4,000 acres) by the time the Village created its first Comprehensive Plan in 1965. The 1965 Comprehensive Plan identified the development issues facing the Village and took into consideration future growth. Given the time period, it is not surprising to read that the impetus for the plan was "urban

outmigration” from the City of Chicago and its potential impacts on suburban municipalities. Major issues identified included aesthetic concerns for Ogden Avenue and “blight” at the Village’s borders. Overall goals of the plan were to preserve the low-density character of the Village and to preserve open space.

The 1965 plan estimated the 1963 population of the Village at 22,700 and contemplated a 1985 population of 56,000. It was estimated that this projected population would make up 80% of Downers Grove’s maximum capacity. At the time of the 1965 plan, 51% of the Village land area was undeveloped. Of the developed area, approximately 73% was residential.

The Village’s proximity to the Chicago, Burlington and Quincy (CB&Q) Railroad and several highways figured heavily in the plan and influenced the proposal of future land uses. Recommendations in the 1965 plan included the creation of a thoroughfare system, improving railroad crossings and upgrades to the sewer systems.

Neighborhood Plans, 1977-1989

Neighborhood plans were adopted for 31 Village neighborhoods between 1977 and 1989 as appendices to the Village Comprehensive Plan. These neighborhood plans identified existing land uses, future land uses, and street classifications. Typically one to three pages in length, they generally include a neighborhood map and a brief narrative of recommendations including floodplain management and proposed street vacations.

Future Land Use Plan (Revised Narrative), 1995

The Future Land Use Plan divides land uses in the Village into nine designations. The revised narrative was approved by ordinance in 1995. The Future Land Use Plan confirmed the Village’s boundary agreements with all neighboring jurisdictions which established a known limit to the Village’s potential for outward growth. The narrative of the Future Land Use Plan delineated the neighborhood unit system of planning for the Village and identifies the Land Use Plan as a vital document with recommended updates every five years.

Downers Grove Central Business District Master Plan, 1997

The Central Business District Master Plan was the largest CBD planning effort in over twenty years. The 1997 plan focused on 10 opportunity zones with specific recommendations for capital improvements including streetscaping, landscaping, parking lot improvements, alley resurfacing, and pedestrian connections. Conceptual drawings and estimated costs were provided.

Ogden Avenue Commercial Corridor Master Plan, 1999

The Ogden Avenue Commercial Corridor Master Plan was undertaken by the Economic Development Commission and followed a 1997 Ogden Avenue shopper survey. The corridor stretches 3.7 miles and included 300 businesses at the time of the 1997 Master Plan. The corridor master plan includes five sub-areas, conceptual drawings and identified 24 potential development sites. Recommendations from the master plan include reducing the number of curb cuts, addressing outdated signage, improving the efficiency of parking, implementing a coordinated wayfinding system, and installation of streetscape improvements.

Village Bikeway Plan, 2000

Following the passage of landmark federal transportation acts (ISTEA and TEA-21) which provided, for the first time, funding for public bicycle improvements, the Village embarked on a comprehensive bikeway plan from 1998 to 2000. Rooted in recommendations from TCD II in 1994, this quality of life plan set out to improve transportation mode choice and encourage healthy living. Bicycle planning in the Village dates back to the 1970s when civic organizations such as the Jaycees and the Lions Club initiated efforts to increase the provision of bicycle paths. The result was the creation of several “tour loops” throughout the Village.

The Bikeway Plan sought to enhance these efforts by examining existing conditions, developing a bicycle network philosophy, encouraging broad public participation, and outlining implementation strategies. The goals were to connect major destinations throughout the Village and to provide a network that was accessible to all levels of riders. Special attention was paid to connecting to existing and adjacent bicycle path networks. Additionally, the plan addressed wayfinding signage and bicycle parking. At the time of the Bikeway Plan, Metra did not allow bicycles on trains (a policy that has now been reversed).

Recommendations for a Comprehensive Plan, 2003

As a precursor to the Comprehensive Plan update, a summary was created of the joint discussions of the Village Plan Commission and the

Economic Development Commission regarding 14 focus areas for future development. The discussions specifically focused on land use planning for commercial areas. The Recommendations for a Comprehensive Plan used the principles of Smart Growth as its framework including recommendations for Transit-Oriented Development (TOD). Two notable differences from the topics covered in the 1965 Comprehensive Plan were the addition of “Telecommunications Infrastructure” and “Public Participation”.

Total Community Development 3 (TCD3) Summary Report and Action Plan

Downers Grove has a unique and long-standing commitment to public participation through its Total Community Development (TCD) process. TCD was first undertaken in the 1960s, a second round in the 1990s, and a third conducted in 2009. TCD is a process that is used to identify and examine all aspects of community life by engaging residents, business owners, and elected/appointed officials in a variety of settings and formats. What results is the identification of community issues, concerns and corresponding recommendations that guide long-range planning in the Village. The TCD3 Summary Report and Action Plan is a standalone summary of the outreach efforts, common themes, principal recommendation and action plan that came out of the TCD3 process. The action plan outlines detailed tasks associated with each theme and includes a rank of priority, a time frame, a lead agency and next steps.

Demographic Profile

Over the next several years, Downers Grove is projected to experience a slight population loss, with a projected 2014 population of 47,659 compared to a 2009 population of 48,136.

It is estimated that the number of households earning less than \$75,000 will decrease while the number of households earning between \$100,000 and \$150,000 will increase. Significant growth is projected to occur among households in which the defined “head householder” is between 55 and 74 years of age, while a decrease is projected in the number of households aged 35 to 54. Growth in the number of households over the age of 55 will likely have an impact in demand for multi-family housing product as this age cohort is the largest market for condominiums and townhome units. A full demographic and market analysis is included in the ***Comprehensive Plan Existing Conditions Report and Workbook*** on file and available from the Village.

Population Change

Table 1 includes information on changes in population and number of households within the Village of Downers Grove and DuPage County. Population is defined as the overall number of people within a specified geography. A household is defined as the group of individuals who live in the same dwelling unit. Any discussion of household age in the following overview is with regard to the age of the individual identified as the head of household.

Overall, the number of households and population in the Village is projected to be decrease by a small proportion over the next five years. The Village is also projected to outpace Growth in the larger county is projected to be positive, but relatively minimal terms of both population and household growth.

It is projected that the population of the Village will have decreased by 477 (-1.0%) between 2009 and 2014 while the county will have grown by 12,950 (1.4%).

Over the same five year period, the Village is projected to lose 150 households, representing a 1.0% decrease. DuPage County is projected to grow by 5,086 households (1.5%) over the same period.

The median household income is projected to grow by \$4,438, or 5.6%, to \$84,230 in 2014. This represents a compound annual growth rate of 1.1%.

Age Profile

Chart 1 illustrates projected population change within age cohorts of the Village over the five year period between 2009 and 2014. In general, projections indicate that the populations between the ages of 20 and 34, and between the ages of 55 and 74 will grow, nearly offsetting a cumulative decrease in population among other age cohorts. DuPage County is projected to experience a similar change in population among

its age cohorts, but it is anticipated that overall growth will be positive.

The population under the age of 20 is projected to decrease by 463 (-3.8%) over the next five years.

It is anticipated that the number of individuals between the ages of 20 and 34 will have increased by 436 (5.7%) between 2009 and 2014.

A decrease of 10.9%, or 1,643 individuals, is projected to occur among the Village's population aged 35 to 54.

A significant increase of over 13.9%, or 1,338 individual, is projected to occur in the population aged 55 and older between 2009 and 2014.

The Village population over the age of 75 is projected to decrease by 143 (-4.0%) between 2009 and 2014.

The estimated 2009 median age of 41.5 years for the Village is over 12% higher than that of DuPage County which had a median age of 37 in 2009. The Village's median age is projected to increase slightly to 41.9 in 2014.

Race & Ethnicity

Charts 2 and 3 illustrate the estimated 2009 and projected 2014 racial and ethnic composition of the Village of Downers Grove and DuPage County. It should be noted that according to the federal government and the US Census, race and Hispanic origin are defined as two different concepts. Census respondents are asked to identify if they are Hispanic in a question that is independent of any questions asking to specify racial categories. For example, a community may have a 98% White Alone population and 2% Black Alone population. However, 30% of the population may be comprised of Hispanic individuals who identify with either racial category.

In 2009, it is estimated that 84.1% of the Village's population is comprised of individuals who are considered White Alone (as classified by the U.S. Census). The DuPage County population has a slightly smaller proportion (77.1%) of White Alone individuals.

Between 2009 and 2014, it is projected that the White Alone population will have decreased by 3.3% and 1.9% in Downers Groves and DuPage County respectively.

The Asian Alone population is the largest racial minority population in both Downers Grove and DuPage County, comprising 9.7% and 12.1% of their respective 2009 populations.

The most significant increase in population for the Village is anticipated to occur in the Asian Alone population which is projected to gain over 600 individuals (14.9%) over the next five years.

It is estimated that in 2009, the Village's population was 6.8% Hispanic (3,257 individuals) while DuPage County's population was 14.0% Hispanic (134,202 individuals).

Between 2009 and 2014, the Hispanic population is projected to grow by 19.7% and 17.4% within the Village of Downers Grove and DuPage County respectively.

Household Change

Charts 4 and 5 depict anticipated growth among Village and DuPage County households with regard to income between 2009 and 2014.

In 2009, the Village's estimated median household income was approximately \$79,792 which was 5.2% lower than that of DuPage County (\$84,174).

The proportion of households with an annual income of less than \$75,000 is projected to decrease by 1,037, or -8.6%, between 2009 and 2014. A similar decrease (-7.1%) is projected to occur within the larger county.

The proportion of households with an annual income over \$150,000 is projected to remain relatively stable, increasing by two households (0.2%) between 2009 and 2014. The overall number of DuPage County households in this income group is projected to grow by 2.5% over the same time period.

The greatest anticipated increase is projected to occur among households earning between \$100,000 and \$149,999. This population is

projected to grow by 888 households (20.9%) and come to comprise over 27% of total households by 2014. Within DuPage County, an even more significant increase of 27.1% is projected for this income group.

Age by Income

Chart 6 illustrates the projected change in the number of households according to the age of the head of household and household income. Changes projected to occur between 2009 and 2014 are shown as they pertain to each respective household age cohort in the Village of Downers Grove.

For example, the red columns indicate change within the market area householder population between the age of 35 and 54. A bar for this age group is shown in each income bracket. A red bar located above the zero line of the graph indicates growth, while a red bar below the zero line indicates decline.

It is anticipated that the number of households aged 35 to 54 will decrease in every income group with the exception of those households earning between \$100,000 and \$149,999. This age cohort will witness a decrease of 937 households (-11.5%).

The number of households aged 55 to 74 is projected to grow across all income groups with the exception of those households earning between \$75,000 and \$99,999. This age cohort will increase by a total of 742 households (13.0%).

The number of households aged under 35 and households older than 75 are projected to be minimal across all age cohorts.

The largest increase of 475 households is projected to occur among households aged 55 to 74 earning between \$100,000 and \$149,999.

The largest anticipated decline in households (-463) is projected to occur among households aged 35 to 54 earning between \$75,000 and \$99,999.

Age by Income Implications

The age and income shifts projected to occur among the Village's household population may have an impact on the local demand for a range of housing products. The number of households in the 35 to 54 year old age cohorts is decreasing while 'empty nester' households are growing.

In a typical market, empty nester households comprise a significant proportion of those purchasing multi-family units (condominiums, townhomes, rowhomes etc.). The anticipated growth in the Village's household population over the age of 55, particularly among higher income households, may be accompanied by an increased demand for multi-family housing product.

Section 2

A VISION FOR THE FUTURE

Downers Grove, Illinois Comprehensive Plan

THE VISION IS AN ASPIRATIONAL RETROSPECTIVE WHICH DESCRIBES THE TYPE OF COMMUNITY DOWNERS GROVE DESIRES TO BE IN THE YEAR 2026

The Vision provides a basis for identifying many of the specific goals and objectives needed to lead the Village of Downers Grove in the direction of implementation. It describes an outcome that helps define purpose and intent for the many policies and recommendations contained in this document. Together, the Vision Statement, and Goals and Objectives begin to present a framework for future policy decisions and actions.

The Vision Statement that follows is a description of the Village of Downers Grove as the community desires to be 15 years in the future and is written as a “retrospective.”— The Vision Statement identifies how the communityVillage has changed in the 15 years since the updated Comprehensive Plan was approvedadopted in 2011.

In 2026...

Fifteen years after the Comprehensive Plan was adopted, the Village of Downers Grove is the envy of DuPage County. Even before the Plan’s adoption, a forward thinking village government initiated a thorough approach to infrastructure improvements, which the Plan supported and built upon. Stormwater and transportation concerns were addressed quickly and effectively. Early recognition by Village leaders of the complexity of these issues and the intergovernmental relationships needed to effectively address them helped. In fact, the Village is now known as the clear leader in partnering—an important approach taken in many of its operational, economic development and capital improvement arenas.

Continued reinvestment in its residential neighborhoods has succeeded in enhancing and maintaining their distinctive character. The housing stock appeals to a broad spectrum of residents who enjoy the friendly nature of the community and the many opportunities to shop, work and play. Many houses have been updated. Others have provided a nod to the community’s deep-rooted past, working to preserve historically significant structures. The urban forest flourishes, recognized by residents as adding value and uniqueness to the community.

Highly diverse and sustainable economic opportunities were created, providing even more jobs and shopping opportunities to those both within and outside the community. The Downtown continues as the community’s heart—well-designed and attractive, with ample parking and a friendly pedestrian orientation. Ogden Avenue has become a place to shop and visit, not just pass through, with a visual rhythm and interest created by the nodes of retail and service activity now apparent to drivers along the route.

Both Butterfield Road and 75th Street boast strong, unique and sustainable economic opportunities. The office areas are notable for their strength, regional access and appeal for numerous corporate headquarters. Ellsworth Technology Park succeeded in growing beyond the more tired industrial uses found in other similar communities. Its attractive buildings and setting, along with easy expressway access and in-demand jobs, assures its value to the region for decades.

The Fairview Station area continues to evolve into the well-organized, revitalized and unique multi-use area imagined. Its growth as a cohesive neighborhood and its attractiveness to those outside the community have resulted in enhanced Metra service and other local transportation improvements. Elsewhere in the Village, other neighborhood oriented storefronts have found ways to blend with their surrounding residential areas and provide sustainable services and products.

High quality schools and parks continue to be one of the trademarks for the community, proving year after year their importance to the thriving community of Downers Grove, Illinois.

All of this progress has enhanced the community during the previous 15 years. The Comprehensive Plan—updated every five years—continues to evolve and responds to an ever-changing regional environment, and will help

Downers Grove’s reputation as a great place to live, work, and shop has been firmly cemented in the 15 years since the Comprehensive Plan was updated in 2011. The residential areas of Downers Grove, long the pride of the Village, have been protected and enhanced. Due to foresight in Village policies and through the use of design guidelines, residential teardowns have been well-managed. Teardowns, additions, renovations and newly constructed homes are respectful of the existing character of the surrounding neighborhood. The Village continues to be known for its variety of housing options including single family homes of new and vintage construction, apartments, condominiums, townhomes and senior housing. With the rebound of the residential market, new families and

~~residents are moving into Downers Grove while existing residents are staying longer.~~

~~Key to the attraction and retention of the Village's residents over the last 15 years is the maintenance and enhancement of the community's high-quality schools, parks, open spaces and recreation facilities. This has been achieved through a cooperative effort of the School Districts, Park District, the Village and the Forest Preserve. One example of such a partnership is the recently completed modernization program of the Village's schools. Additionally, an important factor in the high quality of life is the Village's distinctive tree canopy which has been maintained with new trees planted to complement the existing ones.~~

~~In order to serve these areas, the Village continues to work towards making improvements to its aging infrastructure (e.g. roads, curb and gutter, sewer) and has created long range planning and budgetary goals that will benefit both residential neighborhoods and compatible commercial development. Stormwater management, once one of the Village's top priorities, has now been adequately addressed by a number of creative solutions including a cooperative effort with the Park District to provide detention under three separate parks, as well as enhancements to those parks.~~

~~The Village is also employing contemporary Best Management Practices (BMPs) for addressing stormwater management. These improvements have reduced the problematic flooding in the Village. These renowned community facilities and recent infrastructure improvements have been enhanced by the completion of a new Civic Center to centralize Village and police operations.~~

~~In the time since the updated Comprehensive Plan was adopted, Downtown continues to be the "heart" of the Village. Downtown Downers Grove remains the type of place where business owners are local and they know customers by name. This contributes to the vibrancy and quaintness that visitors and residents experience when they visit. Complementing this welcoming atmosphere, Downtown has maintained its economic competitiveness due to a solid employment base, an increase in the number of housing opportunities in and near the Downtown, improved parking and the Village's innovative use of TIF and SSA districts. Convenient shopping and dining is provided for existing residents while attracting new residents from outside of Downers Grove. A bustling Downtown provides a venue for special events and a continued source of pride and identity.~~

~~The Village continues to require new development, especially within the Downtown, to follow design and development guidelines that were inspired by the findings of the Downtown Pattern Book. This policy, in conjunction with the Village's façade improvement program, has had a lasting, positive impact on the appearance of Downtown. Together these efforts have resulted in high quality new developments and aesthetic improvements to existing commercial buildings and infill buildings and redevelopment relate well to existing buildings and to each other.~~

~~The Village has expanded its streetscaping improvements which include pedestrian amenities, landscaping, pedestrian scaled lighting, and banners. In addition to streetscape improvements, pedestrian and bicycle mobility has been greatly improved. New crosswalks have been installed and new on street bike lanes have been demarcated. This, in conjunction with the elimination of drive-through businesses in Downtown, has resulted in a walkable and successful Downtown. Local customers and commuters arrive by train, bus, bicycle, car, and on foot to enjoy the diversity of shopping and entertainment options.~~

~~While there have been many exciting successes in Downtown, frequent trains complicate movement in Downtown. The Village has identified a solution to improving north-south traffic flow in Downtown. While the post office remains an important service provided in Downtown, its operations and truck traffic have been relocated to a more appropriate site in the Village which has significantly improved peak hour traffic congestion. Parking in Downtown is ample, accessible and easy to find due to the coordinated wayfinding system. Construction of the Village's parking structure has proven to be a forward thinking action. Its success has been complemented by the relocation of some commuter parking lots to the periphery of Downtown. This serves to relieve traffic congestion from commuters and requires them to walk through, and sometimes patronize, Downtown businesses. These parking areas blend seamlessly into Downtown and the surrounding area due to stricter screening requirements including hedgerows, masonry walls and appropriate buffering and screening.~~

~~Just east of Downtown, the Fairview area has become a destination of its own with new housing options and neighborhood businesses. Improvements to circulation for automobiles, pedestrians and bicycles have created a true urban neighborhood.~~

~~While Downtown has found success with pedestrian oriented businesses, the Finley/Butterfield area has improved its standing by capturing more of the regional shopping market. Its strategic location has allowed it to capture more of the traffic from the western suburbs that was typically headed to neighboring municipalities to the east. The restaurants and retail businesses continue to be frequented by employees of the nearby corporate headquarters, office parks and the hospital. Improved exposure and access along the interstates has played an important part in achieving success in the Finley/Butterfield area. Specifically, signage is oriented towards the interstates, is of a high quality and reflects positively on the Village and its businesses. Additionally, the Village has successfully encouraged the redevelopment of several key buildings left vacant during the preceding recession partially due to the passage of a "white elephant" ordinance which combats "big box" blight by creating financial disincentives and specific regulations for the situation when a large stand alone or anchor retailer closes. As part of a successful~~

redevelopment of the area southwest of the Butterfield/Highland intersection, the frontage road serving the area has been eliminated and improvements to traffic circulation at this intersection have been implemented including a full interchange at Highland Avenue for I-88. This has created the western suburb's most exciting new office development and lifestyle center.

Careful planning on the part of the Village has also helped to resolve issues that have hampered Ogden Avenue for decades. The Village's 1965 Comprehensive Plan and TCD2 both encouraged sidewalks for Ogden Avenue that were finally installed in 2015 and have been well-maintained and are used frequently by pedestrians. Signage and landscaping enhancements and the burying of overhead utilities have improved the appearance of the area which has attracted new uses. Several properties previously used for auto sales and services have been redeveloped and offer goods and services to nearby residents. Cross-access agreements between adjacent property owners have increased the ability for customers to visit neighboring properties without adding to traffic congestion on Ogden Avenue. The biggest accomplishment, however, is that **Ogden Avenue has been transformed** from a linear corridor with some underperforming commercial uses to an area of diverse land uses based around several centralized and highly-functioning areas of commercial activity. Catalytic projects centered on the growing role of post-secondary education and expansion of medical services has also worked to enhance the commercial success of the corridor. The intersection of Ogden Avenue and Main Street has become a welcoming gateway into the Village through enhanced signage and landscaping.

All of Downers Grove's commercial areas are contributing to the Village through increased retail and property sales tax revenues. This is due to both **redevelopment and reinvestment**, including aesthetic improvements in the public way, signage and buildings. The established commercial centers and corridors have seen aging centers improved and vacancies filled. In some cases, older commercial properties that had poor visibility and excessive vacancies have been completely redeveloped with commercial or other uses that are more appropriate for the property. For all types of development, the Village has worked with developers to ensure that **all new projects pay for associated infrastructure and service costs**, but has been strategic and fiscally responsible in the use of TIF dollars to accomplish some of these projects to attract desired development.

A true success story is the Meadowbrook Mall which has been redeveloped to provide goods and services for the local population while capitalizing on nearby interstate access. Nearby, the Belmont/Ellsworth area is also thriving. This is due, in part, to the completion of the Belmont underpass project which has alleviated a point of frustration for motorists and freight traffic from the industrial park and has spurred reinvestment in the area. Commuters, arriving by car, bicycle and on foot, patronize the commercial retail and service uses that have concentrated along Belmont Avenue. This area also benefits greatly from the increased regional importance of the connection of I-355 to I-80. **Ellsworth Industrial Park is a center for employment and a model for 21st-century industrial development** due to the Village's leadership in enhanced directory signage, improvements in telecommunications facilities and the aggressive pursuit of modern industrial businesses. State-of-the-art manufacturing and related uses have expanded in Ellsworth Industrial Park, with other undersized manufacturing locations eliminated and placed in more appropriate use categories.

In order to serve all of these vital land uses and areas, the **Village continues to maintain and improve its existing street system**, including routine repairs and combining access points along the commercial corridors. The grade separation at Belmont has relieved traffic congestion by providing a new north-south connection uninterrupted by rail service. Intelligent Traffic Systems (ITS), signal timing and other improvements have also contributed to improved traffic flow. Improvements to the street system and overall transportation network means that **residents and visitors have a choice in how they get around the Village**. This has been accomplished due to the installation of pedestrian and bicycle improvements. Residents feel safe crossing the street and are less dependent on their automobile. They enjoy the improved access to retail, services, jobs and recreation. It is now possible to get from one end of the Village to the other safely and off-street. The Village continues to be served by three Metra stations which offer connections to downtown Chicago and the western suburbs including an enhanced Metra schedule from the Fairview Station.

Supporting all of these improvements, **the Village's image and identity is enhanced and more pronounced** due to gateway signs and features at key entry points. This has been supplemented by identification signs at entrances into Downtown, Ogden Avenue, 63rd Street, 75th Street, Maple Avenue and Butterfield Road. The improved gateways have added greatly to identifying the boundaries of the Village's commercial corridors and improved directional signage to assist visitors in finding community facilities, parking, and commercial destinations. Popular community events such as the Friday night classic car shows and the holiday tree lighting continue to be successful, improve the image of the Village and bring new visitors to the area.

Together, all of these improvements have enhanced the Village of Downers Grove substantially since 2011. **The tangible victories of**

~~careful planning are evident~~ and the Village's plans and policies will create many more exciting opportunities and successes to come.

Section 3

GOALS & OBJECTIVES

The Village of Downers Grove's Comprehensive Plan looks forward over the next 15-20 years and expresses what the Village desires to become in the future. This section presents the Plan's goals and objectives which outline how the Village can achieve its desired outcome. The goals and objectives form the framework for planning recommendations, policies, future projects and actions:

Goals describe desired end situations toward which planning efforts should be directed. They are broad and long-range. They represent an end to be sought, although they may never actually be fully attained.

Objectives describe more specific actions that should be undertaken by the Village to advance toward the overall goals. They provide more precise and measurable guidelines for planning action.

Together, the goals and objectives provide specific direction and serve as a guide for the evaluation of development proposals and land use alternatives. They are based heavily on the input and focus areas that resulted from the TCD3 process in order to provide a reliable policy guide for decision-making in the Village. In addition to the input received from extensive public participation, these goals and objectives are based on input from the Comprehensive Plan Committee.

Goals and Objectives have been established for:

Residential Areas;

Commercial and Office Areas;

Industrial Areas;

Transportation and Circulation;

Infrastructure and Development;

Community Facilities;

Parks, Open Space and Environmental Features;

Image and Identity;

Economic Development; and,

Village Services and Administration.

Residential Areas

Goal

Maintain the Village's image and desirability as a great place to live by preserving and enhancing the quality, character, safety and appeal of residential neighborhoods, developments and subdivisions, and providing diversity in its housing stock and unit types.

Objectives

Promote residential development and redevelopment of a variety of housing and dwelling unit types and densities in accordance with the Land Use Plan, and ensure the Zoning Ordinance and other regulatory tools are updated appropriately.

Accommodate residential renovation and redevelopment through a consistent, expedient and thorough permitting process.

Consistently administer and enforce residential development regulations, including compliance with setbacks, maximum height, parkway tree preservation, stormwater, bulk, density and other development regulations.

Consistently administer and enforce residential construction regulations, including construction hours, fencing, trash and debris, parking, and

~~other construction-related activities that can impact nearby properties.~~

~~Consider the development of a guide or tool to ensure that new residential construction (including infill and teardown construction) and additions are of an appropriate scale and character.~~

~~Continue to inventory and enhance regulatory protections for the Village's notable historic homes including its collection of Sears homes.~~

~~Examine alternative solutions to sidewalk construction in certain challenging areas of the Village.~~

~~Improve public outreach and input programs for capital and infrastructure improvement projects.~~

~~Explore the creation of a property maintenance program to assist residents, particularly seniors, with affordable lawn cutting and snow removal services.~~

~~Preserve sound existing housing through regular, active code enforcement and preventative maintenance programs.~~

~~Explore the creation of a vacant building registration and inspection program to prevent foreclosed and/or neglected properties from having a detrimental impact on surrounding properties.~~

~~Work with home owners associations and property management companies to enforce property maintenance requirements in private residential developments, particularly with regard to vacant units.~~

~~Prevent the encroachment of incompatible development on residential areas through implementation of the Land Use Plan and buffering, screening, and separation requirements where necessary and provide areas of transitioning density and intensity of use between residential and commercial land uses where appropriate.~~

~~Strictly enforce buffering, landscaping, screening and lighting requirements of adjacent commercial areas to minimize the negative impacts of commercial development on residential uses.~~

~~Discourage "cut through" commercial traffic in residential areas through signage, enforcement, traffic calming and other measures particularly at the time of reconstruction.~~

~~Promote the economic importance, and support the provision of, a variety of housing types and choices within the Village including single family, multi-family, senior housing and others including both owner-occupied and rental properties.~~

~~Encourage the maintenance and preservation of parkway trees as an important component of the Village's tree canopy.~~

Commercial and Office Areas

~~Goal 1~~

~~Develop aesthetically pleasing and functionally well-designed retail and commercial shopping areas that are market supportable, maintain a diversified tax base, and serve the needs of the Village's residents and in some areas, a larger regional market.~~

~~Objectives~~

~~Maintain a range of retail and service commercial activities throughout the Village.~~

~~Define and designate more specific functional roles for the various commercial areas within the Village distinguished by local , community , and regional-serving developments.~~

~~Ensure that new commercial development and redevelopment is designed in scale with, and complementary to, existing adjacent development.~~

~~Ensure that all new and improved commercial development, and encourage existing commercial development are effectively screened and buffered from adjacent residential uses.~~

~~Support and encourage all retail, office, and service commercial activities to be organized by use and concentrated within or near areas of complementary uses.~~

~~Recognize, support and encourage the catalytic role of new campuses and buildings of higher education in appropriate locations within the Village.~~

~~Recognize, support and encourage the catalytic role of medical services in appropriate locations within the Village.~~

~~Where applicable, require the design of new commercial developments to incorporate public amenities such as parks, plazas, arcades and connections to existing or proposed trails.~~

~~New or expanded parking structures should be designed to complement the architecture and urban form of the surrounding area.~~

~~Identify funds and establish a program to assist businesses and property owners with façade improvements, landscaping, parking improvements, and modernization of aging structures and facilities.~~

~~Continue to utilize and consider additional incentives such as sales tax rebates, TIF, SSA, and business district funds to initiate redevelopment of key opportunity sites.~~

~~Initiate programs to encourage the improvement and rehabilitation of older commercial buildings and areas which are, or are becoming, functionally obsolete including improvements to facades, signage, streetscaping, landscaping, and parking areas.~~
~~Implement a more systematic and proactive property maintenance and code enforcement process in commercial areas of the Village.~~
~~Conduct a comprehensive review of commercial uses in the zoning ordinance to ensure they are up-to-date and serving the Village well.~~

Goal 2

~~Enhance the economic viability, productivity, appearance and function of the Village's commercial corridors, including Butterfield Road, Ogden Avenue, 63rd Street and 75th Street.~~

Objectives

~~Promote a healthy and mutually reinforcing mix of commercial, retail, and service uses along key corridors within the Village including Butterfield Road, Ogden Avenue, 63rd Street, and 75th Street.~~
~~Utilize a commercial "node" approach by locating commercial uses along Ogden Avenue, 63rd Street, and 75th Street at or near key intersections, rather than treating the entire length of the corridor as appropriate for commercial development.~~
~~Establish design and improvement standards for commercial areas to guide the scale, appearance, orientation, and overall character of new development.~~
~~Encourage appropriate signage along corridors to ensure safe traffic movements into, out of, and through commercial areas.~~
~~Encourage corporate campuses and office development to take advantage of their location along I-88 and I-355 by orienting attractive facades and corporate identification signage toward the highway.~~
~~Maximize the exposure and capitalize on the access to I-88 and I-355 by clustering uses and businesses that benefit from, and cater to, a larger regional market and employment base near interchanges and promoting and encouraging better signage and appearances on facades fronting the interstates.~~
~~Review and update signage ordinances being flexible to the desire and necessity of business identification but mindful of its potential to block views, create visual clutter and detract from the appearance of the Village and its commercial areas.~~
~~Promote the relocation of incompatible uses, and uses in conflict with the community's vision for its key commercial corridors, to more appropriate areas within or outside of the Village of Downers Grove. This should occur on a case by case basis based on land use, regulatory issues and the respective needs of the particular business.~~
~~Develop and install a streetscape program consisting of elements that strengthen the unified theme of the commercial areas such as benches, bus shelters, trash cans, streetlights, way finding signage and other amenities.~~
~~Work cooperatively with IDOT to facilitate desired improvements within their right-of-way including improved landscaping, lighting, and gateway signage consistent with the Key Focus Area Plans.~~
~~Identify underperforming and underutilized parcels and sites and work with property owners and developers to promote their redevelopment encouraging parcel assembly where appropriate.~~
~~Promote the modernization and/or redevelopment of the Meadowbrook Mall and other outdated shopping centers.~~
~~Promote coordinated and shared vehicle access to commercial properties along the Village's commercial corridors and remove redundant and unnecessary curb cuts to improve traffic flow and vehicular and pedestrian safety.~~
~~Encourage shared parking programs and policies in commercial areas wherever possible.~~

Goal 3

~~Continue to revitalize Downtown as the symbolic "heart" of the community and enhance its role as the Village's primary mixed-use pedestrian environment.~~

Objectives

~~Continue to revitalize Downtown with a mixture of uses including commercial, office, restaurant, and residential.~~
~~Follow Transit-Oriented Development (TOD) principles (embodied by a pedestrian orientation, incorporation of density and a focus on the~~

~~transit infrastructure) when considering new development and improvements in the Downtown.~~

~~Maintain Downtown as pedestrian-oriented area and a walkable shopping area that is unlike any other commercial area in the community.~~

~~Promote new infill development in the Downtown area and encourage the consolidation of smaller development parcels where possible to foster larger, more coordinated commercial development opportunities.~~

~~Building on the Downtown Pattern Book, establish Design & Development Guidelines to better guide redevelopment in Downtown.~~

~~Establish a regulatory framework, such as form-based codes, to work in conjunction with the Design and Development Guidelines to foster a desired and predictable built form in the Downtown.~~

~~Zoning for the Downtown should be analyzed and amended if necessary to adequately accommodate appropriate new development and establish the desirable physical form of the Downtown.~~

~~Ensure parking adequately supports businesses by conducting a circulation and parking needs assessment for Downtown and develop a plan for the continued provision of adequate parking in Downtown.~~

~~Require development and redevelopment projects within the Downtown to provide detailed parking and traffic studies which plan for current and future parking demand, access and circulation.~~

~~Promote and encourage shared parking arrangements and facilities wherever feasible to minimize the land area within Downtown dedicated to parking.~~

~~Require Downtown development to be compatible with the scale and uses of the surrounding area and minimize and mitigate any negative impacts on adjacent land uses.~~

~~Conduct a Downtown traffic study in order to assess issues and identify a solution for improving traffic flow.~~

Industrial Areas

Goal

~~Continue to support a diversified light industrial/business park/commercial service economic base that provides employment opportunities within the community.~~

Objectives

~~Establish and maintain regular lines of communication with industrial property owners and businesses.~~

~~Promote and encourage the improvement and rehabilitation of older industrial buildings and areas which are, or are becoming, functionally obsolete or undesirable including improvements to loading docks, access, building facades, signage, streetscaping, landscaping, and parking areas to accommodate more appropriate and market viable uses.~~

~~Encourage the use of green technology and best management practices (BMPs) in the development and redevelopment of industrial uses and market the Village's industrial areas as centers of green technology and light industrial.~~

~~Reclassify and rezone manufacturing areas which are functionally obsolete where there is: incompatible proximity to residential land uses, small lot sizes, or challenging lot configurations. Industrial properties between Warren Avenue and the BNSF railroad tracks and Rogers Street and the BNSF railroad tracks are examples of areas exhibiting these characteristics.~~

~~Identify industrial properties that may be potential brownfield sites in order to assess the need for clean up and remediation and seek funding as appropriate.~~

~~Require all industrial development to meet specific applicable performance standards for noise, air, odor and any other forms of environmental pollution.~~

~~Prevent the encroachment of incompatible development into industrial areas and utilize appropriate setbacks, screening, buffering, and site design to mitigate the impacts of industrial uses on adjacent areas.~~

~~Ensure that all uses are effectively screened from adjacent properties and public rights-of-way, through the use of landscaping, fencing, or a combination of the two.~~

~~Reserve Ellsworth Industrial Park exclusively for light industrial, research and development and business park uses, prohibiting the infiltration of institutional, membership, athletic, or commercial uses.~~

~~Install directory signage at entrances to Ellsworth Industrial Park to direct traffic within the industrial area to promote the businesses to residents and motorists.~~

~~Improve the public utilities and road infrastructure within Ellsworth Industrial Park to accommodate the state-of-the-art technological needs of the businesses and the physical and circulation needs of the truck traffic moving in and throughout the area.~~

Transportation and Circulation

~~Goal 1~~

~~Improve the safety, function and efficiency of vehicular movement and parking facilities within the Village.~~

~~Objectives~~

~~Install and maintain “intelligent” traffic signals and systems along key corridors and routes to facilitate the efficient movement of vehicles within and through the Village and minimize the impact of peak traffic flows.~~

~~Conduct a review of the existing one-way street configuration in Downtown and alter traffic patterns in areas where one-way streets do not have a positive impact on traffic flow and pedestrian safety.~~

~~Protect and improve the function of the street network through controlled access, land-use decisions, and street/intersection design improvements.~~

~~Ensure adequate resources are made available for the maintenance of Village streets and public rights-of-way.~~

~~Work closely with existing business owners to consolidate curb cuts by providing cross access between and shared access into businesses wherever possible.~~

~~Eliminate unnecessary, redundant, obsolete and dangerous curb cuts throughout all commercial areas to improve the safety and efficiency of vehicular movement.~~

~~Continue to support and work with other relevant agencies to ensure the completion of the Belmont underpass project.~~

~~Evaluate methods to achieve improved north-south traffic flow across the downtown train tracks, whether by a new grade separation or by locating a new train station platform to the east near the current village hall to eliminate the need for barriers while commuter trains load and unload passengers.~~

~~Provide priority parking spaces for no- and low-emissions vehicles in all public parking facilities and encourage the provision of similar spaces in private parking facilities.~~

~~Conduct a review of parking in Downtown to identify opportunities to increase parking supply through changes to circulation or the orientation of existing parking spaces.~~

~~If validated through a parking needs assessment and separate feasibility and engineering analysis, expand public parking facilities in Downtown-Downers Grove.~~

~~Establish a wayfinding signage system that directs motorists to key retail, office, industrial, and community facility destinations.~~

~~Encourage the maintenance and preservation of parkway trees as an important component of the Village’s tree canopy.~~

~~Consider traffic calming and other measures to improve traffic flow in tandem with surface reconstruction projects.~~

~~Work with relevant agencies and officials to ensure completion of a westbound exit from I-88 at Highland Avenue.~~

~~Goal 2~~

~~Provide a coordinated transportation network for pedestrians and bicyclists in order to connect them to employment, shopping and recreational areas.~~

~~Objectives~~

~~Where appropriate, encourage new development/redevelopment to include connections and amenities for pedestrians, bicyclists and commuters.~~

~~Improve pedestrian and bicycle circulation and safety throughout the Village with an emphasis on safer and more convenient routes for non-motorized traffic.~~

~~Expand the Village’s network of trails and sidewalks to provide better connections between the Village’s residential neighborhoods, parks, schools, Downtown, and other commercial areas. This should be undertaken with consideration of the privacy of adjoining residences.~~

~~Conduct an analysis of potentially dangerous pedestrian crosswalks in Downtown and along other heavily trafficked roads including 63rd Street, 75th Street, Belmont Road, Main Street, and Ogden Avenue and other heavily trafficked roads and improve them, where feasible, with additional lighting, signalization, bollards, bulb outs and/or curb extensions.~~

~~Identify key pedestrian routes and budget for streetlight replacement along those routes to include pedestrian-scaled lighting amenities and identify areas throughout the Village needing enhanced lighting for pedestrian safety.~~

~~Budget for on-going maintenance and repair of sidewalks as part of the Village's Community Investment Program (CIP) including the consideration of a cost-sharing program with private property owners.~~

~~Maintain and expand the sidewalk network throughout the Village's commercial districts and corridors ensuring sidewalks are located along both sides of all streets within these areas and ensure they connect to businesses and other destinations.~~

~~Implement the recommendations of the Village's bicycle plan to continue to expand the Village's bike-path system, and work towards a complete trail system that connects to the larger regional trail system. This should be undertaken with consideration of the privacy of adjoining residences.~~

~~Conduct and implement an on-street bike lane feasibility analysis and plan.~~

~~Promote bicycle safety.~~

~~Goal 3~~

~~Ensure that high-quality public transit remains a vital part of Downers Grove's transportation network.~~

~~Objectives~~

~~Ensure that levels of public transit service are maintained and enhanced throughout the Village, including the continued operation of the schedules of all three of the Metra Station within the Village.~~

~~Undertake a Comprehensive Transit Plan to identify key traffic generators and destinations within the Village and ensure they are adequately served by Pace Bus routes and other modes of alternative transportation.~~

~~Work with area employers and businesses to promote and implement traffic demand management and reduction techniques including the use of public transit, carpooling, walking and bicycling.~~

~~Promote Pace's Vanpool Incentive Program (VIP) including traditional vanpooling, employer shuttles and Metra feeders as an economical, convenient and environmentally friendly alternative to driving.~~

~~Inventory and assess the condition and location of all Pace Bus shelters in the Village to ensure schedules are adequately posted, that the shelters are in good condition, and that they are connected to the Village's sidewalk system, community facilities, employment centers and other key destinations.~~

~~Work with transit providers to improve service routes and encourage increased use of transit throughout the Village including improved service within the Village's residential areas.~~

Infrastructure and Development

~~Goal~~

~~Maintain high-quality, green and efficient infrastructure systems and networks through regular investment and maintenance to meet the changing needs of the Village today and in the future.~~

~~Objectives~~

~~Continue to budget for and implement the improvement, expansion and maintenance of the community's infrastructure including roadways, stormwater drainage system, water production and distribution infrastructure, and sewer collection and treatment infrastructure.~~

~~Conduct a Village-wide pavement study and sidewalk condition analysis to identify roads **and sidewalks in need of repair.**~~

~~Continue the Village's sidewalk repair program based on evaluations of concrete deterioration and trip hazards.~~

~~Continue the Village's Sidewalk Installation Program and refine the Sidewalk Priority Matrix based on an updated, context-sensitive policy regarding the construction and placement of new sidewalks.~~

~~Promote the coordination of infrastructure and utility projects with other agencies to reduce Village costs through economies of scale.~~

~~Investigate options for implementing Best Management Practices (BMPs) throughout the Village to address flooding issues.~~

~~Promote the use of sustainable design and development practices for new development throughout the Village.~~

~~Consider updating the Village's Subdivision Control Ordinance to match current urban design and stormwater practices.~~

~~Promote the adaptation of sustainable technologies and application of sustainable management practices to existing development throughout~~

~~the Village.~~

~~Encourage new development to utilize “green technology” such as green rooftops, solar energy, and green paver parking lots to reduce stormwater runoff.~~

~~Continue to seek grants, loans and other sources of intergovernmental funding to assist with capital improvements and projects to minimize the financial impact on the Village.~~

~~Work with environmental advocacy groups to educate the public on the benefits of incorporating the use of green/Best Management Practices (BMPs) in the management of residential properties.~~

~~Evaluate pedestrian mobility and amenities in new development to ensure that pedestrian movements are accommodated in new projects.~~

~~Plan and budget for beautification elements to be incorporated into planned infrastructure improvements such as landscaped parking lots, planted medians, landscaped sidewalks, and street trees.~~

~~Consider incorporating the use of solar powered street lights and other green technologies into future roadway improvements and street lighting replacement.~~

~~Consider the use of pervious paving materials in public parking lots and encourage private developers to use this and other run-off reducing technologies.~~

~~Pursue alternative sources of funding such as grants to facilitate ‘green’ improvements to public areas.~~

Community Facilities

~~Goal~~

~~Ensure the provision of high-quality public facilities, including municipal and educational facilities, for all residents of the Village of Downers Grove.~~

Objectives

~~Work with the school districts to review the existing parking facilities, buildings, drop-off/pick-up areas, and bus parking, including ingress and egress to ensure they are adequate and if not, identify opportunities for improvement.~~

~~Work with the school districts to ensure proper buffering surrounding school facilities and safe and adequate access to school sites.~~

~~Conduct a needs and feasibility study for a new Village Hall and Police Station and identify potential sites for their consolidation and relocation.~~

~~Ensure the Village continues to benefit from an adequate level of fire and police protection throughout the Village.~~

~~Enhance the physical relationship between school facilities and surrounding neighborhoods.~~

~~Continue to support the operation of other important community service providers, including Midwestern University, Good Samaritan Hospital, and others and maintain positive and mutually beneficial relationships with each organization.~~

~~Work with others to seek appropriate locations for specialized facilities and services for senior citizens, youth and disadvantaged populations.~~

~~Work with other public agencies to maintain adequate and appropriate sites and facilities for the provision of public services.~~

~~Work with the U.S. Post Office to relocate the operations and truck traffic to a more appropriate site in the Village outside of Downtown.~~

~~Continue to conduct a comprehensive life cycle assessment for Village buildings, equipment, vehicles, facilities, and properties and develop/revise a multi-year maintenance plan and on-going maintenance program.~~

~~Identify funding sources such as grants to pay for the construction of new Village facilities.~~

~~Consider pursuing LEED, or similar, certification for new or renovated Village facilities.~~

~~Increase efforts to identify alternative sources of funds such as grants to fund a wide range of public projects including, but not limited to village facilities, parks and recreation enhancements, transportation improvements, economic development related projects, and social services.~~

~~Using various design and signage tools, reinforce community landmarks such as Village Hall, the Public Library, 1846 Blodgett House, Pierce-Downer’s Burial Place, Downers Grove Historical Society, schools, religious institutions, and parks as important focal points and resources for the community.~~

Parks, Open Space and Environmental Features

Goal 1

~~Work with the Downers Grove Park District to continue to provide opportunities for passive and active recreation through high quality facilities and programming.~~

Objectives

~~Work cooperatively with the Park District and other interested agencies and stakeholders to create a Trails Master Plan that incorporates the trail plan recommendations of the Village, Park District, regional agencies and pertinent input from the community.~~

~~Work with the Park District to market and promote the Village's trail system including the posting on-line of the existing and proposed trail system.~~

~~Assist the Park District in identifying grants and securing alternative funding for parks, open space, trail segments, trail connections, and other recreation amenities for the community.~~

~~Work with the Park District to identify potential park site locations in areas of the community determined to be underserved by existing facilities.~~

~~Continue to work with the Park District to address the Village's stormwater issues.~~

~~Should it be determined that there is demand and/or desire for a community pool, work cooperatively with the Park District to identify best locations for the facility, considering the traffic and other externalities the facility may generate.~~

Goal 2

~~Protect and promote the Village's unique environmental assets and promote the importance of environmental issues and sustainable practices to residents and businesses.~~

Objectives

~~Provide opportunities for increased public participation in decision making, promotion and protection of the Village's unique environmental assets.~~

~~With the Park District, continue to link parks and open space with the multi-use trail system.~~

~~Ensure adequate resources for the maintenance of Village-owned environmentally sensitive lands.~~

~~With the Park District, create a Public Areas Beautification Plan for the Village which should include recommendations for enhancing and expanding green space and creating new green space and community gateways.~~

~~With the Park District, install environmental education and interpretive signage throughout the community in locations with natural areas and important environmental assets.~~

~~Consider local ordinances and regulations to preserve and protect trees and other environmental features throughout the Village and its neighborhoods.~~

~~Establish zoning regulations to protect floodplains, Localized Poor Drainage Areas, wetlands and other sensitive environmental features.~~

~~Continue to actively monitor the outbreak of Asian Long-horned Beetle, Emerald Ash Borer and other harmful insects that threaten the Village's trees and environmental features and take proactive measures to protect these important community amenities including planting and promoting a diverse array of tree and plant species.~~

~~Support measures to prevent the formation of algae and other pest and insect breeding environments within detention ponds.~~

~~Continue to prohibit burning of leaves and other debris.~~

Image and Identity

Goal

~~Maintain a positive image and identity for the Village that is distinct and reflective of its unique character and assets to distinguish Downers Grove from other nearby communities.~~

Objectives

~~Encourage compatible and high quality design and construction for all development/redevelopment with an emphasis on site design, building orientation, architecture, building materials and site improvements.~~

~~Provide for consistent and high-quality maintenance of all local streets, parkways, sidewalks, water towers and other visible municipal infrastructure.~~

~~Install streetscape elements that strengthen the unified theme of the community such as benches, bus shelters, trash cans, streetlights, way-finding signage and other amenities.~~

~~Create gateway features consisting of signage, walls, sculptures, pylons, fountains, lighting, monuments, and/or landscaping at key locations within the community to announce entry into Downers Grove and to distinguish the Village from adjacent municipalities.~~

~~Encourage subdivision and business park monument signs to include the Village of Downers Grove's name and/or logo to promote the Village's identity.~~

~~Review existing and install new wayfinding signage to direct vehicles to key community destinations including Downtown, Public Library, 1846 Blodgett House, Midwestern University, and Good Samaritan Hospital.~~

~~Review and update the Village's landscape ordinance to ensure new development includes sufficient landscaping.~~

~~Develop and implement landscaping and tree planting and maintenance programs that beautify the residential and commercial areas of the Village.~~

~~Develop a program to bury and/or relocate overhead utility lines along key commercial areas, including Downtown, Ogden Avenue, 63rd Street, and 75th Street.~~

~~Expand the Village's façade program to encourage private property owners to implement landscaping, façade and signage improvements to their sites, buildings and businesses.~~

~~Implement a program to screen fixed utility locations, such as lift stations, pump houses, transformer sites, antennas, telephone switches, etc.~~

~~Review and update signage ordinances being flexible to the desire and necessity of business identification but mindful of its potential to block views, create visual clutter and detract from the appearance of the Village and its commercial areas.~~

~~Strictly enforce landscaping, screening and signage requirements including amortization regulations of non-conforming signs.~~

~~Review development controls to ensure that they require appropriate screening of public utilities, dumpsters, rooftop equipment, etc.~~

~~Develop a marketing campaign to promote the advantages and benefits of living, working, visiting, or doing business in the Village.~~

~~Improve communication with residents in an effort to increase awareness of, and participation in, programs, services and events within the Village.~~

~~Improve and maintain relationships with the press and other media.~~

Economic Development

Goal 1

~~Prioritize improvements to existing areas and developments including adaptive reuse and redevelopment.~~

Objectives

~~Continue to use TIF as a means of fostering redevelopment along Ogden Avenue and Downtown, and explore the use of TIF and other development incentives for site-specific redevelopment in other parts of the Village.~~

~~Promote the use of tax credit incentives and other grant programs to fund renovation and expansion.~~

~~Identify resources for the maintenance of the Village's physical facilities including buildings, properties, and infrastructure.~~

~~Identify additional small business assistance programs to stabilize and improve conditions for existing businesses.~~

~~Renovate or redevelop aging shopping centers and commercial areas in order to maximize their contribution to the Village's tax base.~~

~~Enhance the appearance of commercial districts to attract businesses and customers, particularly Downtown, Fairview Avenue and Ogden Avenue.~~

~~Improve commercial building design and development controls by developing and utilizing Design and Development Guidelines and other tools.~~

~~Accommodate renovation and redevelopment through an expedient yet thorough permitting process.~~

Goal 2

~~Work with the Village's economic development partners to maintain and strengthen the Village's diverse tax base through the attraction, retention and expansion of businesses in the Village.~~

Objectives

- Support the Downers Grove Area Chamber of Commerce and Industry, the Downers Grove Economic Development Corporation and the Downers Grove Downtown Management Corporation in their efforts to attract, market, and promote local businesses.
- Support the evolution of the Downers Grove Area Chamber of Commerce and Industry, the Downers Grove Economic Development Corporation and the Downers Grove Downtown Management Corporation to meet challenges and take advantage of new and emerging opportunities.
- Coordinate with the Downers Grove Economic Development Corporation and the Downers Grove Area Chamber of Commerce and Industry to organize a task force whose mission is to identify opportunities to reduce the cost of doing business in Downers Grove in order to enhance the Village's competitiveness.
- Continue to support the Economic Development Corporation's efforts to market Downers Grove as a community of diverse businesses whose presence enhances the community's reputation as a place to live and work.
- Promote the Village's commercial corridor and Downtown through joint marketing efforts, community events, and district identification signage.
- Develop and implement a strategic marketing and recruitment plan for targeted businesses and store types.
- Coordinate planning and economic development activities in a manner which provides regular opportunities for contact between business and development interests within the Village.
- Seek an appropriate mix of commercial retail, commercial service, office and industrial uses throughout the Village.
- Maximize retail sales tax-generating uses, where appropriate, by concentrating retailers in Downtown and the Village's commercial corridors.
- Seek opportunities for new employment growth through the retention and expansion of existing employers.
- Ensure that new development pays its fair share of public facilities and service costs, which are attributable to the demand for additional facilities or services as a result of new development.

Village Services and Administration

Goal

- Continue to ensure high-quality and efficient services are provided to residents and businesses through a well-organized, and participatory support system allowing both neighborhoods and businesses to thrive.

Objectives

- Work with appropriate departments, agencies and community service providers to provide reliable infrastructure and quality services to the residents and businesses within the community including fire protection, police protection, electricity (power and substation locations), water supply and distribution, sanitary sewers, and telecommunications.
- Create and publish an alternatives analysis that identifies the costs and benefits of multiple Village Hall and Police Station facility scenarios.
- Coordinate plan review activities of new development proposals with appropriate public agencies and departments such as the Fire Department, School Districts, and Park District.
- Maintain regular communication with agencies such as Metra, Pace, Regional Transportation Authority, Burlington Northern Santa Fe Railway, DuPage County, Illinois Department of Transportation (IDOT), Good Samaritan Hospital, Midwestern University and others to advance better coordination regarding projects on their properties or within their jurisdiction.
- Establish a process for the regular review and update of the Village's Zoning Ordinance and Comprehensive Plan to appropriately meet the changing needs of the community.
- Support the implementation of TCD3's Principal Recommendation: establishing a means for enhanced communication, enhanced coordination, and enhanced cooperation to foster a more responsive local government with an on-going framework to address localized issues with neighborhoods and businesses.
- Continue to utilize the "community on-line mapping tool" introduced during the TCD3 process to gather public input on future planning issues and projects.
- Coordinate with adjacent communities, including Darien, Glen Ellyn, Lisle, Lombard, Oak Brook, Westmont, and Woodridge, to assist in realizing mutual objectives and addressing issues such as traffic that transcend municipal boundaries.

GOALS AND OBJECTIVES FORM THE FRAMEWORK FOR PLANNING RECOMMENDATIONS, POLICIES, FUTURE PROJECTS AND

ACTIONS

Section 3

LAND USE PLAN

Downers Grove, Illinois Comprehensive Plan

THE LAND USE PLAN IS INTENDED TO PROMOTE A SUSTAINABLE AND HOLISTIC APPROACH TO GROWTH AND DEVELOPMENT THAT PROTECTS AND ENHANCES THE VILLAGE'S EXISTING NEIGHBORHOODS, COMMERCIAL AND INDUSTRIAL AREAS, EMPLOYMENT CENTERS, PARKS AND OPEN SPACES AND COMMUNITY FACILITIES

The Land Use Plan builds upon the existing land uses and development patterns within the Village and is an extension of the Comprehensive Plan's vision, ~~policies, goals and recommendations, objectives.~~ The Land Use Plan is intended to promote a sustainable and holistic approach to growth and development that protects and enhances existing neighborhoods, strengthens commercial areas, protects industrial areas and employment centers, and enhances the Village's network of parks and open space and provision of community services.

The Land Use Plan is a guide for future land use and development that is respectful of the fact that the Village is a developed and mature, established community. It strives to maintain and enhance the traditional form, character and distinguishing features of Downers Grove while accommodating high-quality and compatible improvements and new development in selected locations.

In addition, the Land Use Plan attempts to address land use conflicts that may have arisen as the community has matured. Since the 1965 Plan, the science of land use planning has improved understanding of separating, connecting and integrating land uses. The Land Use Plan accomplishes this by identifying which land uses should remain for the future and which areas should be considered for new uses.

It should be emphasized that the Land Use Plan is a general guide for growth and development within the Village and provides a foundation for further decision-making and is not a site development plan. While it is a detailed document that provides specific guidance on land use decisions, it is also intended to be sufficiently flexible to ~~accommodate~~ ~~accommodate~~ unique or compelling circumstances and the consideration of creative approaches to development that are consistent with the overall policies and guidelines in the Comprehensive Plan.

Residential Uses

The Land Use Plan classifies residential areas into three (3) residential categories: Single-family Residential, Single-family Attached Residential and Multi-family Residential. The Land Use Plan below provides a brief overview of these land use categories by presenting a concise definition and planned locations. An expanded discussion of the Village's residential areas, along with detailed policies for residential development and improvement are provided in **Section 5: Residential Areas Plan**.

Single-family Detached Residential

Single-family residential areas should consist of a detached single household per lot, organized into neighborhoods or subdivisions based on a unifying development pattern. Since its incorporation in 1873, Downers Grove has developed predominately as a residential community nearly 80% of which is single-family and owner-occupied. The Land Use Plan recommends that single-family residential continue to be the predominant land use in the Village and that single-family residential neighborhoods continue to be located throughout the Village. **Section 5: Residential Areas Plan** addresses the issues facing single-family neighborhoods and ensures that the distinctive qualities and characteristics of individual neighborhoods are enhanced.

Single-family Attached Residential

Single-family attached residential uses are single-family dwellings that share a sidewall with an adjacent single-family dwelling. Examples include townhouses, row houses and duplexes which are present throughout the Village. Single-family attached residential developments are commonly found along arterial streets and are often used as a transitional land use between single-family detached and multi-family development.

Multi-family Residential

Multi-family residential development consists of more than one unit or household per lot. This may take the form of standalone buildings of condos or apartments, as part of a mixed-use development or as specialized senior housing. Multi-family residential developments are currently present throughout the Village. The Land Use Plan identifies the redevelopment of some existing multi-family areas that are compatible with adjacent~~for more appropriate~~ uses, and establishes~~established~~ new areas for multi-family residential land uses based on proximity to the transportation network and to maximize their function as a transitional land use between single-family residential and commercial land uses.

Commercial Uses

The Land Use Plan identifies seven (7) categories of commercial land uses: Neighborhood Commercial, Corridor Commercial, Downtown Commercial/Mixed-Use, Low-Intensity Office, Office/Corporate Campus, Regional Commercial, and Light Industrial/Business Park. An overview is provided below while **Section 6: Commercial Areas Plan** provides an expanded discussion of these uses along with detailed policies for development and improvement.

Neighborhood Commercial

Neighborhood commercial areas function to provide residents with convenient, day-to-day goods and services within a short walk or drive from their homes. Neighborhood commercial areas should be comprised of a mix of retail, service and office uses that cater to a local population.

These areas may be anchored by a grocery store accompanied by a variety of other smaller retailers such as gas stations, dry cleaners, convenience stores, banks, and restaurants. Providing these daily goods and services close to home is an amenity to nearby residents and serves to reduce dependence on the automobile trips.

It is recommended that small nodes of neighborhood commercial development should exist throughout the Village at the intersection of primary roadways (arterials and collectors) to serve nearby residential areas.

Downtown Commercial/Mixed-Use

Downtown Downers Grove is characterized by a mix of commercial service, commercial retail, entertainment, civic, institutional and related public facilities (including parking) in a pedestrian-oriented atmosphere.

To maintain its vibrancy and importance to the Village, Downtown should continue to contain a mix of land uses that reinforce its unique character. The type and location of land uses within Downtown and in mixed-use areas are recommended in order to maintain a pedestrian-orientation while also allowing for automobile access and parking. In order to achieve this, it is recommended that ground floor uses are primarily retail, entertainment, and personal service, with office and residential uses located on the upper floors.

Mixed-use areas outside of the Downtown should be focused around the Village's transit infrastructure. The Village should encourage transit-oriented development (TOD) so these areas can take advantage of transportation opportunities while maintaining commuter parking.

Low-Intensity Office

Low-Intensity office uses typically include professional services such as medical, dental, legal and accounting. These uses are sensitive to their context in terms of scale, height, setback and building materials. This requires consideration of parking, loading, signage, lighting and business operations.

Office/Corporate Campus

These office uses include large-scale buildings and office parks that have a significant presence in Downers Grove and should continue to play an important role in the local economy. The Village should continue to support office development along the I-88, I-355, and Butterfield Road corridors to maximize visibility and minimize potentially negative impacts on residential areas. As prominent features along major regional roadways, office developments should be of high quality and reflect the character of the Village in the manner of the Esplanade and the Highland Landmark.

Regional Commercial

This land use comprises commercial uses that provide goods and services that draw patrons from within, and beyond, the Village. Appropriate

regional commercial uses include large shopping centers, “big box” retail, auto dealerships, restaurants, and hotels. The Land Use Plan designates areas for regional commercial where excellent visibility and access provide the ability to draw from a regional customer base.

Corridor Commercial

Corridor commercial land uses are typically organized in a linear fashion and include a blend of neighborhood-oriented commercial retail, offices, smaller regional commercial retail (such as auto dealers), service uses and multi-family uses.

Commercial uses with a regional draw are appropriate in areas of a corridor where they will benefit from access and visibility without significantly contributing to traffic along the corridor or impact on nearby residential areas. In other areas of the corridor, commercial uses are of a neighborhood scale and are oriented towards nearby residential areas.

The Land Use Plan identifies areas appropriate for corridor commercial uses including areas along Ogden Avenue, 63rd Street and 75th Street.

Light Industrial/Business Park

Light industrial and business park uses includes those uses dedicated to the design, assembly, processing, packaging, storage and transportation of products. These uses should continue to be located in areas where they can capitalize on close proximity to regional transportation networks while minimizing negative impacts on residential neighborhoods. This includes areas near interstates, existing industrial parks and along the BNSF railroad. The Land Use Plan identifies areas appropriate for light industrial/business park uses.

Parks & Open Space

Downers Grove is well-served by the parks and open space located throughout the Village and beyond. These parks and open spaces range in terms of size and use to include small, neighborhood “pocket” parks to large tracts of forest preserve and other natural areas, most owned and managed by the Downers Grove Park District or the Forest Preserve District of DuPage County.

~~areas.~~—The largest open spaces in the Village include Lyman Woods, the Maple Grove Forest Preserve, and neighboring Morton Arboretum. Parks and open space features contribute greatly to the overall character of the Village and to the quality of life enjoyed by its residents and should be maintained and enhanced.

The Land Use Plan considers these facts and identifies areas that should remain for parks and open space uses and strives to maintain existing networks within the Village and beyond. **~~Section 7:8~~ Parks and Open Space Plan** includes a detailed discussion of these areas and identifies policies regarding the preservation, maintenance and expansion of existing parks and open space and the creation of new parks and open space areas.

Institutional/Public

Institutional/Public land uses include public and semi-public areas occupied by government facilities, community service providers, schools and other institutional users. This land use also contains areas used by both private and public utility providers. The distribution of institutional/public land uses requires adequate and comprehensive service delivery to residents and businesses in the Village, which largely determines their location.

The Land Use Plan anticipates that these uses will remain largely as they currently exist in the Village. **~~Section 8:9~~ Community Facilities Plan** provides an expanded discussion of these areas along with detailed policies and recommendations.

Section 4

RESIDENTIAL AREAS PLAN

Downers Grove, Illinois Comprehensive Plan

THE VILLAGE'S RESIDENTIAL NEIGHBORHOODS ARE SOME OF THE MOST SIGNIFICANT CONTRIBUTORS TO DOWNERS GROVE'S UNIQUE CHARACTER AND IDENTITY

The Village's housing stock is diverse in age, architecture, and design and its residential neighborhoods are some of the most significant contributors to Downers Grove's unique character and identity. The Residential Areas Plan builds on the three categories established in the Land Use Plan: single-family detached residential, single-family attached residential and multi-family residential and further defines the type and locations of each type of residential land use. The location of each residential land use is illustrated in the **Residential Areas Plan** on page ~~34.55.~~

The Residential Areas Plan identifies policies that apply to the community as a whole although the issues these policies address are not necessarily present in every single one of the Village's residential neighborhoods. As such, the application of Village-wide policies should be tailored to the needs and conditions of Downers Grove's various neighborhoods.

The Policies identified in the Residential Areas Plan are intended to:

Maintain Downers Grove's character and identity

Ensure quality housing stock remains a staple of the community

Maintain the optimal balance of housing types within the community

Ensure compatibility between new and existing residential development

Ensure adequate buffering between residential and commercial uses

Encourage a diversity of housing types, sizes and prices

Single-family Detached Residential

Of the residential units in Downers Grove, nearly 80% are single-family and owner-occupied. The single-family detached residential neighborhoods are one of the Village's most cherished attributes and one of its most defining ~~characteristics, and single-family characteristics.~~ ~~Single-family~~ residential development should continue to ~~predominate, predominate, and the distinctive qualities and characteristics of individual neighborhoods should be enhanced.~~

Historically, as residential development occurred near downtown, the traditional street grid was continued. Newer residential subdivisions, on the other hand, on the northern and southern areas of the Village have introduced more contemporary development features including curvilinear streets and cul-de-sacs.

Single-family detached residential areas make up the single largest land use in the Village of Downers Grove. Much of the Village's character is derived from these neighborhoods and these distinguishing features should be preserved and enhanced.

Single-family residential areas must remain flexible and consider context. There may be situations where single-family attached and multi-family uses may be appropriate within single-family detached areas. For example, street frontage, lot depth, and the presence of neighboring non-residential uses should be considered on a case-by-case basis for other types of compatible residential development.

The **Residential Areas Plan** depicts the single-family residential areas of the Village and divides them into four categories based on lot size, density, access and built form.

~~Estate/Rural~~

This category is characterized by large lots that may have developed as part of a formal subdivision or independently in unincorporated DuPage County prior to annexation. These areas are typically located on the periphery of the Village and have characteristics of ~~estate/rural~~ properties

such as the absence of sidewalks and street trees and open swale drainage systems as opposed to curb and gutter.

Traditional Grid

The Village's oldest residential areas were developed based on a traditional grid which provides a uniform layout (due to standard street and lot widths) ~~as well as pedestrian and vehicular~~ ~~and improved~~ connectivity. Within the traditional grid's areas, sidewalks are typically present on both sides of the street and mature trees (both street trees and concentrations of wooded areas) contribute significantly to their character.

Homes in these areas may face significant development pressure when combining their age and lack of contemporary interior amenities with the attractiveness of a tight knit, walkable neighborhood that is close to amenities such as Downtown and ~~public~~ schools.

Modified Grid

Historically, as development radiated out from Downtown, residential subdivisions moved from the traditional grid to a modified grid. This combined the function and connectivity of a grid with the ~~appeal~~ ~~draw~~ of a more formalized subdivision within the Downers Grove community.

As a second wave of growth in the Village, the modified grid allows for a greater range of lot sizes than the traditional grid. The modified grid provides a transition between the traditional grid and the subdivision/curvilinear development type. Similar to the traditional grid category, sidewalks and street trees are a defining characteristic of modified grid areas.

The use of curved streets sometimes results in pockets of common area open space with additional trees and landscaping, which is another defining characteristic. Redevelopment with new home construction is ~~Teardowns are~~ occurring in these areas but they are less common than in traditional grid areas.

Suburban/Curvilinear

Predominantly found on the north and south ends of the Village, the cul-de-sac is a defining characteristic of this residential category.

Contributing to this defining character are varying lot sizes and a range in the age of trees (depending on the time of construction of an individual subdivision or development). On the whole, street trees are younger than in traditional and modified grid areas and the tree canopy is less dense. Sidewalks are often present on one or both sides of the streets within these areas; however, a lack of connectivity for both pedestrians and automobiles is an issue in the presence of cul-de-sacs and dead-end streets. ~~—These areas are not likely experiencing teardown development.~~

Single-family Attached Residential

Single-family attached residential uses are single-family dwellings that share a sidewall with an adjacent single-family dwelling. Examples include townhouses, row houses and duplexes which are present throughout the Village. Single-family attached residential developments are commonly found along arterial streets and are often used as a transitional land use between single-family detached and multi-family development.

Multi-family Residential

Multi-family residential areas provide a wider variety of housing options to Village residents especially to young households, empty nesters and senior citizens, all of which have been identified as growing markets in the Village. Multi-family residential developments are commonly found along arterial streets and often provide a transitional land use between single-family residential and commercial.

Traditionally, multi-family residential uses are sited near or in commercial areas due to the benefits of higher-density housing to support nearby businesses, trends of car ownership/transit ridership among residents and the fact that multi-family residential development is typically more resilient to the impacts of commercial development.

Multi-tenant buildings

Multi-tenant buildings may be rental (apartments) or for sale (condominiums). These buildings are larger and denser than a single-family home due to the multiple units present. Parking is often provided on-site either through a surface parking lot or structured parking as part of the building. Some multi-family residential buildings are targeted to seniors with amenities that may include social activities, on-site medical

care and other special needs of the senior population.

Mixed-use

Buildings with ground floor retail or office uses with residential units above are another type of multi-family housing, especially in the Downtown. These buildings provide excellent access to goods, services and jobs for residents due to their density and proximity to commercial areas.

Transitional Land Use

Multi-family development should be used as a transitional land use between single-family residential areas and higher intensity commercial and industrial uses. Multi-family development can also be used to transition between and separate nodes of commercial development along a commercial corridor.

New Development & Reinvestment

It is important that new development be sensitive to local context. Regardless of the location or housing type, residential development or redevelopment should be carefully regulated to ensure compatibility with the scale and character of surrounding and adjacent residential neighborhoods. New infill development and alterations to existing development should maintain a setback, height, bulk, and orientation similar to that of neighboring development. The existing tree canopy is important and should be complemented with additional tree plantings when development occurs.

Modernization

Residential, commercial, industrial and institutional properties all require modernization from time to time in order to remain competitive in the marketplace and to avoid becoming functionally obsolete. Modernization helps to achieve a balance between the past and the future by providing incremental improvements to existing properties, including both sites and structures.

There are four levels of residential modernization:

Upkeep which includes the basic maintenance and repair of existing structures (e.g., new exterior paint or roof)

Renovation which includes small-scale projects to update portions of existing structures (e.g., kitchen or bathroom renovation)

Expansion which includes adding onto an existing structure (e.g., a rear or side addition)

Redevelopment which includes demolition of an existing structure to construct a new one (e.g., a residential teardown)

Residential modernization is intended to replenish, rejuvenate and spur reinvestment in the Village's housing stock and should not conflict with the promotion and protection of the Village's distinguishing character and historic resources.

Neighborhood Character

The Comprehensive Plan recognizes the value and importance of Downers Grove's existing housing stock in terms of image, character, and stability. While the replacement of some aging or obsolete homes may be both natural and desirable, the Village should establish a tool, such as design guidelines or workbook, to preserve and enhance neighborhood character. A tool such as this helps to promote new development or redevelopment is sensitive to, and respectful of, existing Village character and architectural diversity.

Expansion and Teardown Redevelopment

As a mature community, the Village is largely "built-out" with limited opportunities for the development of Downers Grove's new single-family detached residential districts are largely developed, leaving the neighborhoods. The exception to this is infill or teardown development intended to occupy vacant parcels and replace smaller, older homes. Although more pronounced in certain areas of the Village with limited undeveloped land for the construction of new, larger residential subdivisions. As is the case, most of the new residential development within the community will come in the form of alterations and additions to the homes has an impact on the character of the Village's established neighborhoods.

Alterations to the existing housing stock, or by way of teardown development, where older homes are replaced by new construction (e.g., additions and renovations) should be encouraged as an alternative to teardown development. Expansions or renovations to existing homes, however, can have an equally negative impact on the character of an area as teardown development. As with teardown development, alterations to existing development should be guided by specific tools and should be monitored to ensure that changes complement existing

~~neighborhood character.~~

Regardless of the type of residential improvements that occur, changes within the established residential areas will have the potential to impact the character of the existing neighborhoods. To this end, it is important that additions and alterations to existing homes and new residential construction be consistent with the existing or desired neighborhood character. To provide assistance to home owners, developers and builders, the Village of Downers Grove should consider using specific tools such as guidelines to foster desired residential improvements and development.

Permitting Process

It is important that the permitting process make it easy for property owners to reinvest in their homes. ~~—The TCD3 process identified the Village's permitting process as a concern, describing it as a lengthy and involved process that acts as a barrier to property reinvestment. The Village has already revised its process to be more expedient and user-friendly while promoting compliance. The initial results and feedback have positive and permit review and processing times now—match both local and national averages.~~ It is recommended that the Village continue to monitor its program, making changes when appropriate, to ensure permits continue to be reviewed and processed in a timely fashion.

Stormwater Management

Improved stormwater management should be a near- and long-term priority for the Village and should continue to be addressed in a comprehensive manner within all residential areas. In addition to investments in public infrastructure, the Village should consider updating the Subdivision Control Ordinance to reflect current ~~urban~~ design and stormwater practices. The Village should encourage ~~the use of Best Management Practices (BMPs), such as~~ the use of naturalized storm water retention and detention basin areas and pervious paving materials, to reduce long-term contributions to stormwater run-off.

Sidewalks

~~The Village has~~Following the TCDII community outreach process in the 1990s, the Village adopted a policy which seeks to establish sidewalks throughout the Village on at least one side of each local street. ~~However, the construction~~The TCD3 process revealed that this policy is not favored in some residential areas of traditional~~the Village where residents feel sidewalks may negatively impact the detract from their neighborhood's existing character of some neighborhoods.~~ Alternative solutions to traditional sidewalk construction should ~~also~~ be considered in sensitive areas where, for example, such improvements may contribute to additional flooding or negatively impact existing parkway trees, the local tree canopy. Additional discussion and policies pertaining to sidewalks can be found in the Transportation Plan chapter on page 64,69.

Parkway Trees

Tree Canopy

Many of the streets within the Village's residential neighborhoods are lined with a canopy from mature parkway trees. These mature trees contribute significantly to the overall desirability and character of the neighborhoods and the Village as a whole. It is recommended that parkway trees be protected and preserved. ~~—Protection of these important features was identified as a priority by many participants throughout the TCD3 process.~~

Property Maintenance

Maintaining residential properties is important to protect property values and preserve the character and desirability of residential neighborhoods. The Village requires properties to be maintained pursuant to adopted 's enforcement of existing ordinances related to property maintenance standards, and development controls was characterized during the TCD3 process as inconsistent and often ignored by property owners. ~~—Attributing the increase in foreclosures due to the recession, concerns regarding property maintenance were elevated, and there was an expressed desire for the Village to review and enhance its code enforcement procedures to ensure that all property reviews are performed efficiently and violations are thoroughly enforced.~~

~~The Village has~~ utilized new tools and programs that which have improved compliance.

~~code enforcement and addressed resident concerns.~~ The Village should continue to monitor these improvements and work with property owners, homeowners associations, or similar groups, and property management companies to enforce property maintenance requirements in private residential developments, particularly with regard to foreclosed units. Increasing fines charged by the Village for property maintenance

code violations should also be considered. As a component of, or in addition to this program, the Village should also explore the creation of a vacant building registration and inspection program to help prevent foreclosed and/or neglected properties from falling into disrepair having a detrimental impact on surrounding areas.

The Village should also explore the creation of a property maintenance program to assist residents, particularly seniors, with affordable lawn cutting, snow removal, and other appropriate services.

“Cut-Through” Traffic

Residential neighborhoods are one of Downers Grove’s most cherished assets and the residents value their homes and neighborhoods for comfort and safety they provide. Non-local, or “cut through”, traffic is a threat to neighborhoods, as motorists use quiet neighborhood streets as a means of bypassing traffic on more heavily-traveled routes. The residential neighborhoods in the northern area of the Village, adjacent to Ogden Avenue, may be the most susceptible due to the grid street-pattern which provides better predictability for motorists.

A combination of signage, improved traffic enforcement, and traffic management calming measures should be used to discourage “cut-through” traffic in all residential areas when it is identified as a problem, and a threat to a neighborhood’s safety and residential quality of life. Through traffic should be routed around residential neighborhoods on arterial roadways and collector streets designed to carry higher volumes of traffic with minimal impact on residential areas.

Commercial Buffering

There are several areas throughout the Village where commercial areas abut residential neighborhoods. ~~In some instances, residential areas have been encroached upon by growing commercial areas. In other areas, residential neighborhoods have expanded to abut established commercial districts.~~ The use of horizontal and vertical buffering and screening, including berms, fencing, and landscaping, should be promoted to protect single-family neighborhoods from abutting commercial or industrial land uses.

The Village should identify areas where residential and commercial area adjacency is problematic and examine different programs to facilitate the use of buffering and screening techniques. Such initiatives might include establishing a ~~program fund~~ to ~~promote fully or partially subsidize~~ screening improvements. Alternatively, the Village’s landscape ordinance could be revised to require enhanced screening and an amortization schedule to ensure compliance within a set time frame.

Housing Affordability

According to the federal Department of Housing and Urban Development, housing is considered affordable when it does not cost more than 30% of a renter’s or homeowner’s gross monthly income. This includes providing workforce housing – housing that is affordable to “critical service” employees, ~~such as teachers and police officers. Having these employees work and live in the Village helps to build a stronger community.~~ Additionally, providing a range of housing options allows residents to stay in Downers Grove to age in place. The Village currently meets the state’s mandated goal for affordable housing and should continue to encourage a diversity of unit types, sizes, and prices to maintain these goals.

Residential Policies and Recommendations

Note: Policies and recommendations are not listed in order of importance.

~~A building registration and inspection program for unoccupied/vacant properties should be created to prevent foreclosed or neglected properties from having a detrimental impact on surrounding properties.~~

Residential areas should provide for a variety of housing and dwelling unit types and densities, generally organized by dwelling types, lot-sizes, etc. as identified in the Land Use Plan.

~~The permitting process should accommodate residential renovation and redevelopment through a consistent, expedient, and thorough process.~~

~~Residential development regulations, including compliance with setbacks, maximum height, parkway tree preservation, stormwater, bulk, and density should be consistently administered and enforced.~~

~~New residential construction regulations should be consistently administered and enforced, including construction hours, fencing, trash and debris, parking, and other construction related activities that can impact nearby properties.~~

~~A guide or tool should be created to encourage and promote new residential construction (including infill and teardown construction) and additions that are of an appropriate scale and character.~~

~~Regulatory protections for the Village's notable historic homes, including its collection of Sears homes, should be embraced.~~

~~As new development or redevelopment occurs, sidewalks should be provided on all streets where they currently exist in order to maintain continuity.~~

~~A property maintenance program should be developed to assist residents, particularly seniors, with affordable lawn cutting snow removal, and other appropriate services.~~

~~Incompatible development that is adjacent to residential areas should employ buffering, screening, and separation requirements where necessary and provide areas of transitioning density and intensity of use between residential and commercial land uses where appropriate.~~

~~Buffering, landscaping, screening and lighting requirements of adjacent commercial areas should be strictly enforced to minimize the impacts of commercial development on residential uses.~~

Senior housing, which includes multi-family residential and assisted and extended care facilities, should be provided in convenient locations to accommodate the needs of senior citizens within Downers Grove. This allows Downers Grove residents to age in place and remain in the community.

Future multi-family development should be located near significant activity centers and along major roadways as well as a component of mixed-use development within Downtown Downers Grove. The zoning ordinance should be revised to allow for additional multi-family development as identified in the Land Use Plan.

In determining the future location of multi-family housing, its ability to function as an important transitional land use should be considered.

~~Senior housing, which includes multi-family residential and assisted and extended care facilities, should be provided in convenient locations to accommodate the needs of senior citizens within Downers Grove. This allows Downers Grove residents to age in place and remain in the community.~~

Where appropriate, the use of buffering, screening, transitioning density and intensity, and other separation requirements and techniques should be considered where non-residential uses are adjacent to residential areas to minimize land-use conflicts that may arise.

A guide or tool should be created to encourage and promote expansion and redevelopment that is a desirable scale and character.

As new development or redevelopment occurs, sidewalks should be provided on all streets where they currently exist in order to maintain continuity.

Continue to require properties to be maintained in manner that is compliant with the Village's adopted property maintenance standards.

Consider a building registration and inspection program for unoccupied/vacant properties to prevent foreclosed or neglected properties from having a detrimental impact on surrounding properties.

Consider developing a property maintenance program to assist residents, particularly seniors, with affordable lawn cutting snow removal, and other appropriate services.

Consider voluntary and regulatory protections for the Village's notable historic homes, including its collection of Sears homes.

The permitting process should accommodate residential renovation and redevelopment through a consistent, expedient, and thorough process.

Section 5

COMMERCIAL AREAS PLAN

Downers Grove, Illinois Comprehensive Plan

THE PRIMARY GOAL OF THE COMMERCIAL AREAS PLAN IS TO RETAIN, ATTRACT AND EXPAND HIGH-QUALITY COMMERCIAL RETAILERS, SERVICE PROVIDERS, AND EMPLOYERS BY ADDRESSING THE LOCATION, SIZE, AND APPEARANCE OF COMMERCIAL AREAS

The Village of Downers Grove Commercial Areas Plan promotes high-quality commercial development. It presents recommendations that are intended to capitalize on the Village's strong position within the region, its excellent access to expressways and transit while at the same time diversifying the Village's tax base and providing residents with access to goods and services. The primary goal of the Commercial Areas Plan is to retain, attract and expand high-quality commercial retailers, service providers, and employers by addressing the location, size, and appearance of commercial areas.

The policies identified in the Commercial Areas Plan are intended to:

- Maintain and expand the range of goods and services provided throughout the Village;
- Strengthen the economy by creating more local jobs;
- Stabilize, diversify and expand the tax base;
- Enhance the quality and appearance of existing commercial areas and proposed commercial development; and,
- Minimize conflicts between commercial areas and surrounding residential neighborhoods.

The Commercial Areas Plan builds on the Land Use Plan which identifies seven (7) commercial land uses: Neighborhood Commercial, Corridor Commercial, Downtown/Mixed-Use Commercial, Low-Intensity Office, Office/Corporate Campus, Regional Commercial, and Light Industrial/Business Park. Policies for implementing recommendations for each commercial land use are discussed in this section and the location of each commercial land use is illustrated in the *Commercial Areas Plan* on page [41.66](#).

Neighborhood Commercial

Neighborhood commercial areas serve local residents and provide the goods and services needed on a daily basis. These areas are composed of a mix of independent storefronts and small retail centers with a single anchor tenant, typically a grocery store. Given that Downers Grove is a mature community, its neighborhood commercial areas are well-established and on the whole, the Village is well-served by neighborhood commercial.

The Plan provides for moderate expansion of neighborhood commercial around key intersections and heavily-trafficked roads that are less desirable for residential uses. Maintaining neighborhood commercial areas throughout the community minimizes the need for residents to travel long distances to meet routine retail and service needs.

Corridor Commercial

Corridor commercial areas are those areas that developed to cater to the automobile and are typically organized in a linear fashion. Uses include a blend of neighborhood-oriented commercial retail, offices, smaller regional commercial retail (such as auto dealers), service uses and multi-family uses.

The Village's areas of corridor commercial, including Ogden Avenue, 63rd Street and 75th Street, should continue to contain a range of retail, service, office and business activities. These commercial areas have a unique character and should continue to function in their dual role within the Village by serving both the daily needs of local residents (e.g., grocery stores) and providing commercial goods and services to the

larger region. ~~(e.g., auto dealerships).~~

Downtown/Mixed-Use

Downtown Downers Grove is characterized by a mix of uses, dense and compact development, and a pedestrian-friendly environment within which to shop, dine, work, and live. The Downtown area, anchored by the Main Street Metra station, provides a unique shopping destination within the community. As the symbolic heart of the Village, providing a unique atmosphere, it is vital that reinvestment, redevelopment, and new development reinforce these qualities and preserve and enhance the pedestrian-oriented atmosphere of Downtown Downers Grove.

To continue its success and vibrancy, a diverse mix of uses ~~should~~**must** be promoted and maintained ~~Downtown, including Downtown. This includes~~ retail, dining, ~~and~~ entertainment, ~~with~~ professional office and residential uses, ~~restricted to the upper floors of buildings.~~

Development should continue to reinforce the walkable nature of Downtown and buildings should be oriented toward the street and located at or near the sidewalk line.

Downtown Transition

Downtown Downers Grove is surrounded on all sides by established residential neighborhoods. Maintaining an adequate buffer is accomplished through a transition area where appropriate commercial development of a compatible scale and character is permitted.

Downtown Office

Offices in Downtown should be encouraged to locate above the ground floor whenever possible in order to preserve these areas for retail businesses. If located on the ground floor, offices should maintain attractive window displays that are not covered by blinds or other materials in order to maintain visual interest for pedestrians.

Offices in converted houses provide an important transition area between the commercial activities of Downtown and nearby residential areas and should remain. Parking, loading, signage, lighting and business operations should be of a nature and scale that is compatible with surrounding residential uses.

Mixed-use

Mixed-use areas outside of the Downtown should be focused around the Village's transit infrastructure. The Village should encourage transit-oriented development (TOD) so these areas can take advantage of transportation opportunities while maintaining commuter parking.

Detailed recommendations for Downtown Downers Grove are also provided in **Section ~~2:40~~ Key Focus Area Plans**.

Low-Intensity Office

Low-Intensity office uses typically include professional services such as medical, dental, legal and accounting. These uses are sensitive to their context in terms of scale, height, setback and building materials. This requires consideration of parking, loading, signage, lighting and business operations.

Office/Corporate Campus

These office uses include large-scale buildings and office parks that have a significant presence in Downers Grove and should continue to play an important role in the local economy. The Village should continue to support office development along the I-88, I-355, and Butterfield Road corridors to maximize visibility and minimize potentially negative impacts on residential areas. As prominent features along major regional roadways, office developments should be of high quality and reflect the character of the Village in the manner of the Esplanade and the Highland Landmark.

Regional Commercial

Regional commercial is defined by large-scale retail uses that rely on the ability to draw a customer base from the larger region. Based on its proximity to I-355 and I-88, the Village's primary regional commercial area is the Finley Road/Butterfield Road area. This area has a mix of corporate office uses, large shopping centers, hotels, and big box development.

In order to continue to stay competitive and draw from the surrounding region, reinvestment should occur to improve the aesthetics and function of regional commercial uses. Reinvestment will assist in retaining current businesses while also attracting new retailers and restaurants. To accomplish this, the Village should continue to work with the Downers Grove Economic Development Corporation (DGEDC) to identify strategies to address significant competition from other portions of the Butterfield Road corridor located in neighboring communities, including Yorktown Mall in Lombard and Oakbrook Shopping Center in Oakbrook Terrace.

Detailed recommendations for the Finley Road/Butterfield Road area are also provided in **Section 10: Key Focus Area Plans**.

Light Industrial/Business Park

Light industrial and business park uses includes those uses dedicated to the design, assembly, processing, packaging, storage and transportation of products. Industrial uses in the Village are scattered throughout with the heaviest concentration located in the Oak Grove Commons Industrial Park and the Ellsworth Industrial Park. Other larger concentrations, although not formally organized within an industrial park, are located adjacent to the Burlington Northern railroad tracks with frontage on paralleling streets.

These uses should continue to be located in areas where they can capitalize on close proximity to regional transportation networks while minimizing negative impacts on residential neighborhoods.

Industrial uses, when organized into parks, provide a level of protection for the uses themselves and for surrounding uses. When isolated, these uses need to be compatible with surrounding and adjacent uses, with screening, buffering and other separation techniques used when appropriate and necessary, whether they are residential, commercial or others.

The Plan identifies areas ~~recommended~~ appropriate for light industrial/business park uses. The Village should continue to enhance and promote these areas as appropriate for light industrial uses. Improvements should be made to existing buildings, parking lots and the public rights-of-way. The Village's industrial areas should be improved and upgraded as self-contained business areas with an emphasis on expanding existing businesses and targeting contemporary industrial users. Uses should be restricted to light industrial and office, thus protecting the area from the infiltration of non-compatible commercial, institutional, membership, or recreational uses. Within light industrial and business parks, the Village should enhance wayfinding and directory signage and improve telecommunication infrastructure to better accommodate the needs of modern industrial users.

The **Belmont/Ellsworth Key Focus Area Plan** offers further guidance that can be applied to the Village's other industrial areas.

Streetscaping

The Village should continue its installation of the streetscape program consisting of elements that strengthen the unified theme of commercial areas such as benches, bus shelters, trash cans, streetlights, way finding signage and other amenities. In coordination with IDOT where appropriate, the Village should facilitate desired right-of-way improvements including improved landscaping, lighting, and gateway signage consistent with the Key Focus Area Plans.

Overhead Utility Lines

Overhead utility lines are unsightly and detract from the character of the Village's commercial areas. New commercial development and infill development should be encouraged to bury on-site utility lines and screen utility boxes from view of the public rights-of-way. The Village should work with utility companies to bury existing overhead utility lines as properties redevelop. The burying of overhead utility lines should also be coordinated with other scheduled right-of-way improvements.

Updated Signage Ordinance

Several of the Village's commercial areas suffer from excessive or oversized signage and visual clutter which detract from the character of these areas. Just as with commercial structures, commercial signage should also be designed to respect the scale and character of surrounding development.

The Village enacted updated signage requirements and set a seven-year deadline (2012) for compliance. This has the potential to significantly alter the look of the commercial corridors as non-conforming signs are phased out.

To maximize the positive impacts of the revised signage requirements, the Village should issue variances from the ordinance only in the case of a clear hardship. Unlike a variance issued for a small increase in building height or bulk, signage variances can have a significant rippling effect within the surrounding commercial area due to the public nature of signage which amplifies any difference in the scale or placement of a sign compared to neighboring signage.

Commercial Gateway Enhancements

Many of the entry points to the Village occur in commercial areas. In these areas, gateway signage and other enhancements such as lighting, monument walls, landscaping and public art should be installed at highly visible locations to signify entry into Downers Grove and to distinguish the Village from adjacent communities. Gateway features will help improve reinforce an identity within each respective area.

Wayfinding and Directory Signage

Wayfinding and directory signage to key retail areas and community assets should be used at highly visible entry points in the Village's commercial areas. Wayfinding and directory signage is an important component of directing shoppers and motorists. In select situations, these types of signs can include both directory information as well as Village logos to reinforce an identity.

Development and Redevelopment

The Village should continue to promote development and redevelopment of commercial properties within areas that provide convenient and general commercial needs of the surrounding community.

To promote continued high-quality neighborhood commercial development, the following policies should be adopted:

All parking and loading areas should be ~~appropriately~~ screened with landscaped berms and/or a combination of landscaping and hardscape materials;

New and redeveloped commercial properties should be encouraged to provide 360 degree architecture; and

Dumpster enclosures should be provided.

Stormwater Management

Best Management Practices

The ~~continued~~ use of ~~the County's stormwater management practices~~ Best Management Practices should be encouraged, ~~promoting the use of native within commercial areas, particularly for off-street parking areas.~~ Native plantings, swales, and pervious pavers ~~can be used~~ to improve stormwater management within commercial and off-street parking areas. These techniques are effective stormwater management practices and generally ~~while being~~ less expensive to install and maintain than traditional curb-and-gutter and landscaping.

Façade Improvement Program

The Village should ~~identify funds to~~ maintain a Façade Improvement Program to assist businesses and property owners with improvements to signage, façade improvements, landscaping, parking areas, and the modernization of aging structures and facilities.

Modernization

Residential, commercial, industrial and institutional properties all require modernization from time to time in order to remain competitive in the marketplace and to avoid becoming functionally obsolete. Modernization helps to achieve a balance between the past and the future by providing incremental improvements to existing buildings, properties, parking lots and public rights-of-way.

For commercial properties, there are four levels of modernization:

Upkeep which includes the basic maintenance and repair of existing structures (e.g., new exterior paint or roof)

Renovation which includes small-scale projects to update portions of existing structures (e.g., façade or sign improvements)

Expansion which includes adding onto an existing structure (e.g., business addition)

Redevelopment which includes partial or full demolition of an existing structure to construct a new one (e.g., demolition and new construction)

Commercial modernization is intended to replenish, rejuvenate and spur reinvestment in the Village's business sector and should not conflict with the promotion and protection of the Village's distinguishing character.

Aging Shopping Centers

Many of the Village's regional commercial areas are faced with the uncertainty of aging or outdated shopping centers. ~~—One example is Meadowbrook Mall. This center has failed recently to attract national retailers and is in need of modernization and/or redevelopment.~~

Dealing with obsolete centers can be troublesome for many reasons. Frequently, they are owned by trusts, pension funds or pools of multiple owners who are more likely to be absentee owners. Additionally, the mortgage is long paid off which means that existing tenants, however marginal, are usually sufficient for these types of owners. Based on these and other factors, the need to remain competitive is not compelling.

The large land area and high visibility of shopping centers makes their maintenance and potential deterioration an important issue for the Village to address. The Village should ~~require that~~create strict policies for aging commercial properties be maintained to an adopted standard~~centers including active code enforcement~~ to prevent their neglect and deterioration. Neglect and deterioration have environmental, fiscal, economic and aesthetic impacts on the Village as a whole.

Aging shopping centers can be modernized through several mechanisms:

Signage

Landscaping

Improved access and circulation

Modern tenant spaces/layouts

Building orientation and visibility

Outlots

Parking lot maintenance

Vacant or Underutilized Properties

The activity and physical appearance of vacant or over-parked sites has a significant influence on how visitors and potential patrons to Downers Grove businesses perceive the community. The Village should promote the redevelopment of underutilized properties.

White Elephant Ordinance

Communities across the country are using several techniques to combat "big box" blight when a large stand-alone or anchor retailer closes and leaves a vacant store. Even before a new big box is approved, some communities are preparing for their eventual demise. While a developer or property owner has a financial incentive to fill a vacant space, other considerations (such as keeping out competition or the size and mass of the building) may inhibit them from filling a vacancy in a timely fashion. A municipality may draw from a large toolkit to avoid a situation which may encourage blight. Collectively, these regulatory tools are known as "white elephant ordinances."

The Village may choose to enact one or more techniques to combat "big box" blight when a large stand-alone or anchor retailer closes and leaves a vacant store. Potential considerations include: a bond to finance a large buildings demolition or maintenance should it ever become vacated; requiring developers to submit plans for reuse in case of vacancy as a condition of approval; requiring the vacating business to assist in marketing the property; and, limiting the use of restrictive covenants, particularly those that prohibit lease or sale to competitors. ~~(e.g., properties in the Butterfield Road corridor).~~

Business Improvement Funding Sources

Financial incentives are an effective tool that the Village can use to encourage businesses to make improvements to their properties. The Village should continue to utilize and consider additional incentives such as sales tax rebates, TIF, and SSA funds to provide assistance to businesses. Additional Village resources should also be dedicated to the pursuit of grants, low-interest loans, and other state and federal funds.

Permitting Process

It is important that the permitting process make it easy for property owners to reinvest in their businesses. ~~As with the residential permitting process, the Village's permitting process for commercial development was also identified as too lengthy during TCD3. The Village has already revised its process to be more expedient and user-friendly while promoting compliance. The initial results and feedback have positive and permit review and processing times now match both local and national averages.~~ It is recommended that the Village continue to monitor its program, making changes when appropriate, to ensure permits continue to be reviewed and processed in a timely fashion.

Commercial Design and Development Guidelines

The Village should expand and continue to implement Commercial Design & Development Guidelines to address corridor commercial issues such as ~~poor site maintenance and~~ appearance, signage clutter, service/parking screening, and access management in a coordinated and comprehensive manner.

Regardless of size, a high level of design should be encouraged to ensure that commercial structures blend into adjacent residential areas with regard to built form, scale, walkability and pedestrian connectivity. The design should be human in scale and pedestrian friendly; and all buildings should be architecturally attractive and add value to the adjacent properties.

Access Management

Commercial development should continue to be located primarily along the Village's arterials, near I-88 and I-355, and within close proximity to one of the Village's three Metra stations; however, improvements to access management are necessary for both existing and future development. In some areas, incremental commercial development has resulted in poor access management along major corridors where individual businesses have established one or more driveways located within close proximity to one another. This can be problematic with regards to both traffic and pedestrian safety and traffic flow.

The Village should work with other agencies, such as IDOT, as well as property owners to improve access management within corridor commercial areas in order to improve traffic flow. Along commercial corridors, the Village should work to minimize curb cuts, consolidate the number of access points, and facilitate cross-access easements and shared parking agreements. This increases safety for motorists, pedestrians and bicyclists by minimizing points of conflict and creating predictability for the location and frequency of ingress and egress.

Parking

Parking areas throughout the Village should be safe and well-maintained. To achieve this, parking areas should consider both the automobile and the pedestrian to minimize light pollution and glare to neighboring properties.

A combination of perimeter landscaping, berms, masonry walls, and/or decorative wrought iron fencing can be used to effectively screen surface parking lots. Parking areas of significant size should also be improved with interior landscaped islands, ground cover, shade trees, and other landscape elements. Regardless of the size of private parking areas, the Village should encourage the regular repair and maintenance of parking surfaces.

In order to reduce the percent of land area devoted to surface parking, the Village should encourage shared parking agreements. Neighboring businesses with differing peak demand times for parking or businesses with a low volume of customers are best suited to enter into a shared parking agreement. This reduces the number of access points along a corridor and creates opportunities for additional green space or development.

In the case of Downtown, the Village should continue to plan for the provision of parking to accommodate business owners, employees, customers and commuters. ~~To ensure parking adequately supports demand, the Village should conduct a Downtown circulation and parking needs assessment.~~

Retail Nodes and De-commercialization

High traffic volumes alone do not equate to demand for unlimited expanses of retail development. Corridor commercial development should be clustered near key intersections and activity generators. In the Village's corridors, office, service and multi-family uses can be complementary and supportive of retail nodes.

A commercial corridor should not be treated as a strip, but rather as a series of nodes that concentrate commercial activity. This approach to corridor commercial development will establish a sense of place, enable independent commercial developments to share access points and parking areas, and provide a focus for streetscape and beautification enhancements.

To complement nodes of corridor commercial uses, non-commercial uses that generate significant activity should be encouraged within commercial corridors. For example, institutional uses such as higher education facilities and medical service providers can function as catalysts for new development within a commercial area and/or provide a steady customer base.

Regulation and Relocation of Uses

In order to maximize redevelopment potential the Village should continue to identify uses that are better suited for alternate sites or locations. Those businesses and sites should be evaluated on a case by case basis based on land use, regulatory issues and the respective needs of the particular business. Alternate sites should be identified and relocation assistance provided, where applicable, in order to ensure that viable businesses remain in the Village. Assistance can range from reimbursement of expenses to grants or loans for building and/or site improvements at an alternate location.

The Village should consider the use of tools such as stricter business licensing, [a tool used minimally today, along with](#) development moratoria, and amortization of nonconforming uses to achieve the desired type, size and location of commercial land uses.

Partnerships

The Village should continue to work with local economic development partners to attract, retain and expand businesses in Downers Grove. It is important that the Village support the efforts of the Downers Grove Economic Development Corporation (DGEDC), Downers Grove Downtown Management Corporation (DGDMC), and Downers Grove Area Chamber of Commerce & Industry to market and promote local businesses.

The Village should utilize the expertise of these partners to develop and implement a strategic marketing and recruitment plan for targeted businesses and store types. In partnership with these groups, the Village should also form a task force to identify opportunities to reduce the cost of doing business in Downers Grove and enhance the Village's position within the competitive landscape.

Commercial Areas Policies and Recommendations

Note: Policies and recommendations are not listed in order of importance.

A diverse mix of [commercial](#) uses should be promoted and maintained in Downtown Downers Grove.

~~Development in Downtown should reinforce the walkable nature by orienting buildings toward the street and locating them at or near the sidewalk line.~~

~~Offices in Downtown should be encouraged to locate above the ground floor whenever possible in order to preserve ground floor units for retail businesses.~~

~~Mixed-use areas outside of Downtown should be focused around the Village's transit infrastructure, especially through the use of transit-oriented development (TOD) principles.~~

~~The Village should consider expanding the use of Special Service Areas (SSAs) to accomplish stated goals and objectives for the Village's commercial areas.~~

~~The Village should continue to support office development along the I-88, I-355, and Butterfield Road corridors to maximize visibility and minimize potentially negative impacts on residential areas.~~

~~As prominent features along major regional roadways, office developments should be of a high quality and reflect the character of the Village.~~

Corridor commercial areas should continue to function in the dual role of providing daily needs to local residents as well as providing commercial goods and services to the larger region.

~~Reinvestment should occur in the Finley Road/Butterfield Road area to improve the aesthetics and function of regional commercial uses.~~

~~The Village should conduct a thorough review of permitted uses in the zoning ordinance on a regular basis to ensure compatibility with the Comprehensive Plan.~~

The Village should consider the use of tools such as stricter business licensing, development moratoria, and amortization of nonconforming uses to achieve the desired type, size and location of commercial land uses.

~~The Village's light industrial and business park uses should continue to be located in areas where they can capitalize on close proximity to regional transportation networks while minimizing impacts on residential neighborhoods.~~

The Village should conduct a thorough review of permitted uses in the zoning ordinance on a regular basis to ensure compatibility with the Comprehensive Plan.

Reinvestment should occur in the Finley Road/Butterfield Road area to improve the aesthetics and function of regional commercial uses.

The Village should continue to ~~support office development along the I-88, I-355, promote and enhance light industrial/business park areas including improvements to existing buildings, parking lots and Butterfield Road corridors, the public rights-of-way.~~

As prominent features along major regional roadways, office developments should be of a high quality and reflect the character of the Village.

Development in Downtown should reinforce the walkable nature by orienting buildings toward the street and locating them at or near the sidewalk line.

The Village's industrial areas should be improved and upgraded as self-contained business areas with an emphasis on expanding existing businesses and attracting contemporary industrial users.

~~Uses within light industrial/business park areas should be restricted in order to protect these areas from the infiltration of non-compatible commercial, institutional, membership or recreational uses.~~

The Village should enhance wayfinding and directory signage and improve telecommunication infrastructure within light industrial/business parks to better accommodate the needs of modern industrial users.

The Village should work cooperatively with ~~neighboring communities with adjacent and integrated adjoining municipalities regarding commercial districts to address issues that which transcend municipal boundaries in order to achieve and maintain mutually beneficial healthy commercial areas, that are mutually beneficial.~~

The Village should consider expanding the use of Special Service Areas (SSAs) to accomplish stated goals and objectives for the Village's commercial areas.

Offices in Downtown should be encouraged to locate above the ground floor whenever possible in order to preserve ground floor units for retail businesses.

Mixed-use areas outside of Downtown should be focused around the Village's transit infrastructure, especially through the use of transit-oriented development (TOD) principles.

The Village's light industrial and business park uses should continue to be located in areas where they can capitalize on close proximity to regional transportation networks while minimizing impacts on residential neighborhoods.

The Village should continue to promote and enhance light industrial/business park areas including improvements to existing buildings, parking lots and the public rights-of-way.

Uses within light industrial/business park areas should be restricted in order to protect these areas from the infiltration of non-compatible commercial, institutional, membership or recreational uses.

Continue to facilitate shared parking areas to reduce the total number of parking spaces required within a given commercial area, thus reducing the land devoted to parking and creating opportunities for additional green space or development density.

Section 6

TRANSPORTATION PLAN

Downers Grove, Illinois Comprehensive Plan

A BALANCED TRANSPORTATION SYSTEM ENSURES THE SAFE AND EFFICIENT MOVEMENT OF VEHICLES, PEDESTRIANS AND CYCLISTS

Downers Grove is a mature community with an established street network. The Transportation Plan acknowledges the limited opportunities to solve issues through the construction of new streets and instead focuses on strategic improvements to the Village's existing network of roads, public transit, and pedestrian and bicycle routes. This collection of improvements strives to maintain a balanced transportation system that ensures the safe and efficient movement of vehicles, pedestrians and cyclists.

The Plan addresses two types of transportation networks:

The **Transportation System** which primarily refers to the street network which accommodates motor vehicle circulation throughout the Village; and,

The **Trails and Transit System** which primarily refers to the trail network, bus routes, and commuter rail lines traversing the Village.

TCD3

~~Throughout the TCD3 community outreach process, participants identified several issues and concerns related to the Village's roadways, congestion, transit, and pedestrian and bicycle circulation. Comments received from the community indicate that the most significant issues were regarding congestion on major roadways, rail-related delays, the poor condition of local streets, expanding transit service, and the need for a better integrated trails network. The Transportation Plan, in conjunction with the Land Use Plan, seeks to address these concerns where possible and promote appropriate and necessary improvements within the Village of Downers Grove.~~

Past Plans

~~The Transportation Plan builds upon the relevant recommendations and policies outlined in the 1965 Comprehensive Plan, existing conditions analysis, and input received during the TCD3 community outreach process. The Trails and Transit component of the Transportation Plan is also, in part, founded on the strategies outlined in the Village's Bikeway Plan (adopted in 2000).~~

Functional Classification of Streets

Streets in Downers Grove are classified according to their character and intended service; a process known as functional classification. Individual streets work together in a network to accommodate the movement of goods and people in the most efficient manner possible.

Functional classification allows an understanding of an urbanized area's street hierarchy which contains five categories: highway/expressway, principal arterial, minor arterial, collector street, and local street. Assigning streets these categories is the Illinois Department of Transportation in cooperation with the U.S. Department of Transportation on a five-year basis. This allows for an orderly network of streets that maintain access to private property through smaller streets while connecting to larger streets that move traffic more efficiently. Downers Grove's street classification includes the following:

Interstates

Interstates are divided highways of three lanes or more that provide a high degree of service to through traffic, are designed with no direct access to individual uses on abutting properties, and generally have grade-separated intersections. The two interstates providing access to and from Downers Grove are I-88 and I-355.

Principal Arterials

Principal arterials are generally wider, faster and have limited access along the route to allow travel to and through an area. These roads are

regional in nature and link interstate, intra-state and regional activity centers. They are built to accommodate the highest traffic volume and longest travel routes. The principal arterials serving the Village are Butterfield Road, Ogden Avenue and 75th Street.

Minor Arterials

The minor arterial street system supplements and supports the principal arterials by providing trips of moderate length and lower travel mobility. The east-west minor arterials serving the Village are Warren Avenue/Rogers Avenue, Maple Avenue/55th Street, 63rd Street, Warrenville Road and segments of 31st Street. The north-south minor arterials serving the Village are Main Street/Lemont Road, Fairview Avenue, Woodward Avenue, Belmont Road, Finley Road, Walnut Avenue and Highland Avenue (north of 39th Street).

Collector Streets

Collector streets prioritize access to property over mobility and are more locally-oriented. Collectors connect local streets to arterials to create a network of traffic movement. Examples of collector streets are Dunham Road, Prairie Avenue and 35th Street.

Collector streets located within the Village of Downers Grove corporate limits are generally the responsibility of the Village. In some instances, collector streets are planned together with other transportation agencies or adjacent communities.

Local Streets

The local street system is made up of all streets not belonging to one of the above-mentioned roadway classes. Local streets are generally shorter than other roadway types and have frequent controlled intersections. Compared to other roadway types, local streets are narrower with slower speeds through areas such as residential neighborhoods. Local streets provide direct access to properties and accommodate shorter trips to adjoining collector or arterial streets.

Jurisdiction

The Village of Downers Grove is served by a system of roadways under the jurisdiction of the State of Illinois (IDOT), the Illinois Tollway Authority, DuPage County, Lisle and Downers Grove Townships, and the Village of Downers Grove. With several roads or road segments outside of the Village's jurisdiction, its ability to make improvements or control access to adjoining properties is limited.

Realizing the Comprehensive Plan's transportation-related goals and objectives will require coordination and cooperation between these entities. Traffic control devices, an important component of public safety and efficient traffic movement, will also require cooperation and coordination due to the fact that the Village maintains only 18 of the 70 traffic signals within its jurisdiction.

Coordination & Cooperation

Maintenance and improvements to I-88, I-355, Butterfield Road (IL 56), and Ogden Avenue (US 34) fall under the jurisdiction of the Illinois Tollway and IDOT. 55th Street, 63rd Street, and 75th Street, which provide important connections to I-355, are under the jurisdiction of DuPage County. The Village should work with these agencies to ensure that improvements are made to these roadways to continue to promote efficient and effective vehicular circulation.

Interstate Access

In 2007, the Illinois Tollway completed construction of the I-355 south extension which provided a new connection to I-80. This served to strengthen Downers Grove's position within the larger region as an employment and commercial center due to existing interchanges at Butterfield Road, Ogden Avenue, Maple Avenue/55th Street, 63rd Street and 75th Street.

Interstate 88 and Interstate 355 pass through the Village and approximate much of the Village's northern and western borders. Access to I-88 provides an important east-west connection in the region. Highland Avenue provides access in three directions but does not provide a westbound entrance. Westbound traffic wishing to travel I-88 must do so at Downers Drive, more than a 1/2 mile west of the Highland Avenue interchange. This configuration significantly impacts both transportation and land use in the area. The Transportation Plan seeks to address this issue through the closing of the exit at Downers Drive and the creation of westbound access to I-88 from Highland Avenue.

Circulation & Access

One-way Street Evaluation

When used appropriately, one-way streets serve to increase roadway capacity and provide additional on-street parking. If too many one-way streets are focused in one area, however, they can have a negative impact on traffic flow and become an obstacle to be overcome by potential business patrons. Within the Village, one-way streets are most appropriate in Downtown and around the Fairview Metra station due to pedestrian traffic and the prevalence of on- and off-street parking. The Village should conduct a review of the existing one-way street configuration in Downtown Downers Grove, identify potential routes for one-way implementation, consider alterations to existing traffic patterns and accommodate on-street parking where appropriate.

North-South Traffic Flow

North-south movement of automobiles is hampered by the BNSF railroad which crosses through the middle of the Village. The frequency of trains and presence of at-grade railroad crossings prevent any smooth or predictable north-south traffic flow. ~~This frustration was frequently cited during the TCD3 process as participants expressed a desire to see a grade-separated crossing near Downtown.~~ Currently, a project is underway to create a grade-separated crossing at Belmont Road near the Metra Station. The Village should monitor the improvement's impact on traffic flow throughout the Village, including Downtown, before committing to ~~further capital expenses for~~ another grade separated crossing.

Intelligent Traffic Systems (ITS)

~~Implemented in coordination with~~ ~~In addition to~~ improvements to the ~~current~~ configuration of the ~~overall~~ transportation network, Intelligent Traffic Systems (ITS) offer a wide ~~range~~~~spectrum~~ of ~~opportunities~~~~possibilities~~ for the Village ~~to increase the efficiency and safety of its existing and future transportation systems.~~ Intelligent Traffic Systems utilize evolving technologies, ~~from reducing traffic congestion to make transportation more efficient, provide more options for travel and provide better~~~~improving~~ information ~~to travelers.~~

~~Specific forms of ITS that for bus riders.~~ ~~Synchronized signals should be provided throughout the Village of Downers Grove should consider as it continues to grow are~~ traffic signal priority (TSP) and coordinated 'intelligent' signal timing along key corridors. TSP prioritizes public transportation vehicles over personal vehicles and ultimately reduces trip times of public transportation. Intelligent signal timing also improves the flow of traffic along busy corridors by changing the cadence of signal changes to increase efficiency. The Village should consider the ~~and their~~ installation ~~of these synchronized signals should be prioritized~~ based on current and projected traffic volumes and areas that experience peak hour congestion, ~~such as Ogden Avenue and the areas around the Village's (e.g., near Metra stations, stations).~~ ~~Examples of ITS that should be considered include~~ traffic signal priority (TSP) for transit and coordinated 'intelligent' signal timing along key corridors.

Trails, Bikeways & Pedestrian Mobility

The Village of Downers Grove has several pedestrian and bicycle trails and pathways that represent a non-motorized transportation alternative. The Village has also planned for the installation of several miles of both on-street and off-street facilities throughout the Village. The Village of Downers Grove should continue to improve transportation mode choice and encourage healthy living through enhanced pedestrian mobility.

Pedestrian Mobility & Friendliness

With the exception of Downtown, Downers Grove's commercial areas were developed to cater to the automobile, with pedestrians and patrons who arrive by other modes of transportation mostly an afterthought. The Village should promote improvements within the commercial corridors to ~~improve pedestrian affordances~~~~reduce hostility to pedestrians~~ including landscaping on public and private property, closing gaps in the sidewalk network and creating a safe environment through physical separation.

As a measure of promoting pedestrian-friendliness, the Village should continue to install sidewalks and reduce curb cuts along the entire length of commercial corridors, establishing a complete pedestrian network on both sides of the corridor and addressing some of the most significant pedestrian and accessibility issues for the area. The Village should also consider streetscaping enhancements to provide pedestrian amenities such as benches, bus shelters, trash cans, pedestrian-scaled lighting, and way finding signage.

Bicycle Mobility and Safety

The Village should continue to implement the recommendations of the Village Bikeway Plan (2000) which is the foundation for this Trails and Transit Plan. While the recommendations of the Village Bikeway Plan and the Trails and Transit Plan provide a solid foundation, the Village

should create a Trails Master Plan that incorporates the recommendations of the Bikeway Plan, in addition to input from the Park District, DuPage County, regional agencies such as CMAP, and pertinent input from the community.

Although the Village Bikeway Plan contemplates a complete network of bicycle access, there are areas of the Village that are not accommodated. Continuity of bikeways is of utmost importance for encouraging bicycle travel and ensuring safety. Where possible, the Village should remove unnecessary obstacles to safe and efficient bicycle riding. This includes evaluating the location and frequency of curb cuts.

Bicycling on Sidewalks

Areas such as Ogden Avenue include key destinations for education, employment and shopping. Ogden Avenue is also an area with high volumes of traffic and a right-of-way that is too narrow to accommodate on-street bicycle lanes. In situations such as this, the Village should consider allowing bicycles to share the sidewalk with pedestrians. This can be achieved through a municipal ordinance provision and communicated to the bicycling public through signage and an awareness campaign.

Trail Safety

In addition to maintaining and enhancing existing trail system components, new bikeways and trails should consist of a combination of on-street and off-street configurations along select minor arterials and collector streets. On streets where pedestrian and bicycle traffic is to be promoted, adequate rights-of-way should be reserved for pedestrian and bicycle facilities and safe crossings along busy roadways. Traffic speeds should also be controlled.

Connecting to Community Assets

By providing direct and efficient connections to important destinations throughout the Village, residents will be given a greater range of options in how they travel to work, shop, dine or play. Bikeways and trails should establish connections to existing and proposed parks and open space areas as well as major destinations throughout the Village including schools, healthcare facilities, DuPage County Forest Preserve areas, and other community service providers. Connections should also be established between residential areas and existing and proposed future employment centers and shopping destinations within the Village.

Complete Streets

A Complete Streets policy requires new road projects and road repair projects to accommodate all users throughout the development process: design, engineering, planning and construction. Specific Complete Streets elements vary according to the specific conditions and context but may include sidewalks, bike lanes, accessibility improvements, pedestrian refuge islands, transit station improvements, bump outs and curb extensions, and/or raised crosswalks. The Village should adopt a Complete Streets policy to accommodate all users of the road network.

Sidewalks

~~The Following the TCDH community outreach process in the 1990s, the Village~~ ~~has adopted its current~~ policy that a sidewalk be installed on at least one side of every public street in Downers Grove. ~~This—The TCD3 process revealed that this~~ ~~policy~~ ~~however,~~ is not favored in some residential areas of the Village where residents feel new sidewalks would detract from their neighborhood's desirable existing character. Alternative solutions to sidewalk construction should be considered in sensitive areas, such as areas where such improvements may contribute to additional flooding or negatively impact the local tree canopy.

The Village's sidewalk network should ~~continue to~~ be expanded to provide better connections between the community's residential neighborhoods, parks, schools, Downtown, and other commercial areas. Sidewalks should exist on both sides of public rights-of-way within commercial areas. Within residential areas, sidewalks should be installed and maintained as determined by ~~the Village~~ ~~through a public engagement process.~~ ~~staff and neighborhood residents.~~ The Village should be cognizant of the differences in the character of individual neighborhoods when determining locations and types of sidewalk installation. Sidewalk installation should ~~consider~~ ~~respect~~ the desires of residents and the existing character of neighborhoods; however, preservation of character should not supersede pedestrian safety and connectivity.

Sidewalk Installation Program & Sidewalk Priority Matrix

The Village should continue to ~~install new sidewalks annually based on established priority, approve an annually updated Sidewalk Matrix for the installation of new sidewalks. This matrix is based on a priority system that rates a combination of factors such as proximity to local schools, traffic volume, right-of-way width, and continuity with other sidewalk segments.~~ Repair work to existing sidewalks, such as the removal and replacement of individual sidewalk sections, ~~should continue to be~~ based on evaluations of concrete deterioration and trip hazards.

Pedestrian Safety

In addition to sidewalk improvements, the Village should consider improvements to pedestrian crossings at all signalized intersections as they are the safest place for pedestrians to cross. Pedestrian crossings at intersections should be well lit and clearly demarcated to enhance pedestrian safety. Potential improvements include amenities such as brick pavers, street and pedestrian lighting, crosswalk signage, and pedestrian islands.

Transit and Commuter Facilities

Downers Grove is served by five Pace bus routes (313, 715, 821, 834, and 888), three stations along Metra's Burlington Northern Santa Fe (BNSF) commuter rail line, and a Village-operated commuter shuttle. These services are heavily utilized by residents and commuters from outside of the Village. For example, according to Metra's 2006 Origination-Destination Survey (the most recent year for which ridership data is available); over 4,100 people boarded a train in Downers Grove during the typical weekday.

Underserved Areas

The Village's excellent access to transit was identified as a key strength by the community. ~~There~~ However, input received in the TCD3 community outreach process indicates that there are opportunities to improve and expand existing services. While the Village as a whole has excellent access to transit, there are areas where service is limited and residents have no direct access to public transportation.

The Village should work with Pace to modify routes and explore the potential for expanded service to residential areas. These modified or new routes should provide additional service to non-commuters and improve transit linkages between residential neighborhoods, employment centers, and commercial areas. The Village should also continue to work with Metra in providing coordinated shuttle service to commuters and residents.

Activity Generators

There may also be opportunities to improve use rates in areas currently served by transit. Commercial areas and employment centers represent large pools of potential transit riders and expanding transit use in these areas would reduce the number of vehicle trips generated and reduce congestion. The Village should work with area employers and businesses to promote the use of public transit, carpooling, walking and bicycling.

Comprehensive Transit Plan

The Trails and Transit Plan identifies existing transit routes throughout the Village. The Trails and Transit Plan also identifies several possible community destinations and traffic generators as a potential starting point for the modification of Pace bus routes. The Village should create a Comprehensive Transit Plan that identifies key traffic generators and destinations within the Village and ensures that these areas are adequately served by Metra, Pace Bus routes and other modes of alternative transportation.

Parking

A vital component to the success of Downtown is the location and availability of parking. This is especially true given the access to and frequency of commuter rail service in Downers Grove. Established standards state that a safe, walkable distance from parking to a transit station is 1/4 mile. Given that much of the community (and potential riders) are beyond this area, certain improvements ~~should must~~ be made and/or maintained. Bus service provides a link for riders to the train stations but parking for automobiles ~~should must~~ also be accommodated at each station. The Village should monitor improvements and provisions for commuters. For example, the Village may facilitate a "parking permit exchange" to ensure that commuters park on the same side of the tracks on which they live. This provides convenience and safety not only to the commuters themselves but also to other travelling motorists by eliminating unnecessary traffic attempting to cross the railroad tracks.

Whether adequacy of parking is a real or perceived problem in Downtown, the Village should conduct a Downtown circulation and parking needs assessment. This ensures that commuters, residents, visitors and businesses will be accommodated with accessible and efficient parking.

Transportation System Policies and Recommendations

Note: Policies and recommendations are not listed in order of importance.

Protect and improve the function of the street network through controlled access, land-use decisions, and street/intersection design improvements.

Work closely with existing business owners to consolidate curb cuts by providing cross access between and shared access into businesses wherever possible.

Work with relevant transportation agencies to ensure that improvements are made to continue to promote efficient and effective vehicular circulation.

Conduct a review of the existing one-way street configuration in Downtown Downers Grove, identify potential routes for one-way implementation, consider alterations to existing traffic patterns and accommodate off-street parking where appropriate.

Once complete, review the efficacy of the Belmont Road grade separation as a model for other crossings.

Parking areas, whether publicly or privately maintained, should be safe and well-maintained by emphasizing pedestrian-scaled lighting, appropriate screening, interior landscaped islands, and other landscape elements as appropriate.

~~Environmentally friendly stormwater management practices~~~~Best Management Practices~~ should be encouraged within parking areas. Native plantings, swales, and pervious pavers can be used to improve stormwater management while being less expensive to install and maintain than traditional curb-and-gutter and landscaping.

~~Continue to facilitate shared parking areas to reduce the total number of parking spaces required within a given commercial area, thus reducing the land devoted to parking and creating opportunities for additional green space or development density.~~

The Village should continue to plan for the provision of adequate parking in Downtown Downers Grove particularly as it relates to commuter parking.

~~If validated through a parking needs assessment and separate feasibility and engineering analysis, the Village should expand public parking facilities in Downtown Downers Grove.~~

The Village should evaluate the capacity of the existing street network to ensure adequate circulation and to minimize cut-through traffic on residential neighborhoods.

Continue to monitor land economics and parking demands, identify opportunities to consolidate surface parking lots into parking structures, to address parking problems while at the same time creating new development opportunities within Downtown.

Trails and Transit Policies and Recommendations

Note: Policies and recommendations are not listed in order of importance.

Continue to coordinate bikeway and trail planning and implementation efforts with public agencies such as DuPage County, Forest Preserve District of DuPage County, Downers Grove Park District, Downers Grove Township, Lisle Township, York Township, neighboring municipalities and park districts and others.

Work with relevant agencies to secure funds, such as grants, to create additional trail connections and new segments.

As development occurs, the Village should require the establishment of new route segments within proposed developments that link to existing or proposed future trail facilities in the Village. Significant developments should also be evaluated for pedestrian mobility and amenities to ensure that pedestrian movements are accommodated.

Balance the needs of existing property owners with the preservation of environmental features and the requirements of a new trail system that will serve the entire community. Strategies such as public access easements should be explored in established areas where new trail connections are desired.

Promote improvements to ~~increase pedestrian affordances, reduce hostility to pedestrians~~ including landscaping on public and private property, closing gaps in the sidewalk network and creating a safe environment through physical separation.

Continue to install sidewalks and reduce curb cuts along the entire length of commercial corridors, to establish a complete pedestrian network.

Consider streetscaping enhancements to provide pedestrian amenities such as benches, bus shelters, trash cans, pedestrian-scaled lighting, and way finding signage.

Improve pedestrian and bicycle circulation and safety throughout the Village with an emphasis on safer and more convenient routes for non-motorized traffic.

Expand the Village's network of trails and sidewalks to provide better connections between the Village's residential neighborhoods, parks,

schools, Downtown, and other commercial areas.

Ensure that levels of public transit service are maintained and enhanced throughout the Village, including the continued operation of the schedules of all three of the Metra Station within the Village.

|

Section 7

PARKS, OPEN SPACE & ENVIRONMENTAL FEATURES

Downers Grove, Illinois Comprehensive Plan

PARKS, OPEN SPACE AND ENVIRONMENTAL FEATURES REPRESENT BOTH ECOLOGICAL ASSETS AND ACTIVE AND PASSIVE RECREATIONAL AMENITIES FOR THE COMMUNITY

he Community's

~~The Village's~~ parks, open space, and environmental features contribute significantly to its overall quality of life, image, character, desirability, and aesthetics. This includes dozens of parks, facilities and open space areas interspersed by open streams, significant wooded areas, and other environmental features. These areas represent both ecological assets and active and passive recreational amenities for the community. In addition to ensuring the protection and enhancement of parks, open space, and environmental features, a primary goal of the Parks, Open Space & Environmental Features Plan is to improve public access to these areas.

The purpose of the Parks, Open Space & Environmental Areas Plan is to:

Identify existing open spaces and recreation facilities within the Village and County

Identify natural systems within the village

Provide recommendations to ensure that ample and quality open space continue to serve the community

Provide recommendations to maintain and improve the health of environmental systems throughout the Village

Downers Grove Park District

Parks in the Village are owned, maintained and managed by the Downers Grove Park District, an independent government with its own elected board, who provides ~~and provide~~ both active and passive recreation options including ball fields, tennis courts, a nine-hole golf course, community gardening, a remnant prairie and nature preserve with interpretive center, the Downers Grove historical museum, a 69,000 square foot, state-of-the-art Recreation and Fitness Center, and the historic Lincoln Center, a 45,000 square foot community center that once served as the Village's first school. The Park District's mission is to provide a wide variety of year-round recreation programs, facilities, parks, open space and natural areas that respond to the articulated needs and desires of residents.

NRPA Standards

~~The Park District has done well in its acquisition of parks and open space.~~ The National Recreation and Parks Association (NRPA) recommend a standard of 10 acres of open space for every 1,000 residents. Based upon the Village's estimated population of 48,000, this would equate to a recommended service level of 480 acres. The Downers Grove Park District manages 49 parks in the Village comprising over 600 acres, exceeding the standards established by the NRPA.

Programming

~~While some comments in TCD3 referenced an unmet demand for additional programming across all age categories at Park District facilities, the district regularly conducts a needs assessment using scientific instruments such as random sampling. The Village should continue to support the Park District in its efforts to assess programming needs and provide programming to residents of all ages. This includes the continuation of the long-standing shared-use agreements between the Downers Grove Park District and the local school districts to maintain~~

~~programming at school park sites and school recreation facilities. Similar agreements are in place with neighboring communities' districts.~~

Public Areas Beautification Plan

During the ~~public input~~~~TCD3 outreach~~ process, the community ~~also~~ expressed a desire for additional 'greening' of the Village through the use of beautification projects, landscaping, tree plantings, and enhancements to public areas. The Village should work with the Park District to create a community-wide Public Areas Beautification Plan including recommendations for enhancing and expanding existing green space and creating new green space and community gateways.

Forest Preserve District of DuPage County

The mission of the Forest Preserve District of DuPage County is to acquire and hold lands containing forests, prairies, wetlands, and associated plant communities or lands capable of being restored to such natural conditions for the purpose of protecting and preserving the flora, fauna, and scenic beauty for the education, pleasure, and recreation of its citizens. In total, the Forest Preserve District maintains 25,000 acres of land at over 60 forest preserves, three of which are located in, ~~or adjacent to,~~ Downers Grove.

Hidden Lake Forest Preserve includes two lakes and the East Branch of the DuPage River which encourages bicycling, boating, fishing, hiking, picnicking, wildlife watching, and winter activities. Hidden Lake is 390 acres in size and includes two miles of trails.

Maple Grove Forest Preserve is one of the oldest forest preserves in DuPage County and is the last remaining remnant of the vast maple forest that eventually became Downers Grove. It is an 82-acre preserve with passive recreation activities such as bicycling, hiking, picnicking, and wildlife watching.

Lyman Woods contains 135 acres with a trail system and the William F. Sherman Jr. Interpretive Center. The preserve is owned jointly by the Village of Downers Grove, Downers Grove Park District and the Forest Preserve District of DuPage County, and operated by the Downers Grove Park District.

The Village should continue to work with the Park District and the Forest Preserve District to provide access to these valuable community assets. Forest preserves should also serve as anchors to the Village's planned bikeway network.

Private Recreation Facilities

In addition to the recreational facilities and parks provided by public entities, there are several private recreational facilities within the community. These facilities play an important role in the community, providing residents with access to recreational amenities that may not be provided by the Park District or other public agency.

One of the most notable private facilities is the Downers Grove Swim and Racquet Club (DGSRC) located adjacent to Patriots Park. DGSRC features six lighted tennis courts, swimming and wading pools, and sand volleyball courts. Programs include recreational swimming, swim lessons, swim team, dive lessons, dive team, water aerobics, recreational and league tennis, and tennis lessons.

Community Pool

~~The creation of a public pool or water park facility was the most significant parks and recreation related issue identified by the community through the TCD3 outreach process. As a whole, the community is undecided with regards to the pool issue with passionate community members both in favor and against the creation of a public pool facility in Downers Grove. Regardless of their position on the issue, most TCD3 participants indicated a desire to resolve the issue.~~

~~The Village should continue to support the Park District's efforts to investigate the issue and determine true demand for a public pool facility. In the interim, the Village should continue to support Park District initiatives which help to meet the need for pool facilities. Should the Park District move to provide a public pool facility, the Village should be involved to assist in identifying potential locations based on neighboring facilities and community demand.~~

Bike and Recreational Trails

Additional pedestrian and bicycle linkages should be created to improve access and enhance the use of the community's parks and open space. The Village should continue the process of implementing the recommendations from its Bikeway Plan which will include the creation of on-street and off-street paths. This path system will help to connect the Downers Grove community to existing trail systems in neighboring municipalities and parks. The Village should ~~also work with the Park District to~~ secure funds, such as grants, to create additional connections and new segments in the community's bikeway and trail system.

Open Streams & Water Features

The Village relies on the use of natural features such as creeks, marshes and rivers as part of its stormwater management. Central to this are three creeks: Lacey Creek (north of Ogden Avenue), St. Joseph Creek (central Downers Grove), and Prentiss Creek (south of 63rd Street) which all drain into the East Branch of the DuPage River.

Stormwater Best Management Practices (BMPs)

Downers Grove's natural stormwater features are supplemented by detention and retention areas located throughout the Village. ~~such as Barth Pond, a seven-acre retention pond.~~ The Village should encourage ~~environmentally friendly~~ the use of best management practices (BMPs) ~~within all~~ stormwater management ~~practices areas~~ and encourage the naturalization of these stormwater management areas through the use of natural plantings and wildflowers as opposed to rip-rap and manicured turf grass. Naturalization, however, should not impede recreational opportunities, particularly as part of the Park District's planning and programming. ~~The Village should also consider updating its Subdivision Control Ordinance to reflect current urban design and stormwater practices.~~

Limited Development

Both floodways and floodplains are present in Downers Grove and the potential for development/redevelopment can be limited within these areas. In addition, the Village has identified Localized Poor Drainage Areas (LPDA) which are prone to flooding due to local topography. While LPDAs are not recognized by FEMA, they are regulated at the local level in ~~similar~~ the same manner as a floodplain.

A property's location within a floodplain or LPDA should be a consideration in any development or redevelopment recommendations. The Village should continue to ~~regulate~~ restrict development in flood-prone areas. The Village should also consider establishing ~~design~~ guidelines that minimize the amount of impervious surface created by new development and reduce long term contributions to stormwater run-off.

Wooded Areas & Parkway Trees

Tree Canopy

Several mature wooded areas are located throughout the Village on both developed and undeveloped land. In most instances, these wooded areas are owned and managed by public agencies such as the Forest Preserve District or the Park District and are protected from development. In addition, many of the streets within the Village's residential neighborhoods are lined with a canopy of mature parkway trees. These mature trees contribute significantly to the overall desirability and character of the neighborhoods and the Village as a whole.

Wooded areas are viewed as an important feature of the community. ~~and their protection was identified as a priority by many throughout the TCD3 process.~~ The Village should establish policies and best practices that ensure new development and infrastructure projects do not represent a threat to wooded areas and the Village's much valued green character. The Village should continue to work with the Park District and Forest Preserve District on preservation of the publicly owned trees, tree canopy.

Parks, Open Space and Environmental Features Policies and Recommendations

Note: Policies and recommendations are not listed in order of importance.

Work cooperatively with the Park District and Forest Preserve District to ensure the appropriate provision of parks and open space in the ~~community.~~community, including supporting acquisition of open space in any underserved areas of the Village.

Work cooperatively with the Park District, Forest Preserve District and other private entities to ensure the appropriate provision of recreation in the community.

~~Support Park District programming initiatives at schools and private facilities.~~

~~Encourage development of public-private partnerships between the Downers Grove Park District and local recreation service providers.~~

Develop a community-wide Public Areas Beautification Plan including recommendations for enhancing and expanding existing green space and creating new green space and community gateways.

Continue to implement the recommendations of the Bikeway Plan and the Trails & Transit System Plan, including creating of on-street and off-street paths.

Work with the Park District to secure funds, such as grants, to create additional connections and new segments in the Village's bikeway and trail system.

Ensure effective tree and root protection for ~~all~~ new developments or infrastructure projects as appropriate.

Continue to actively monitor the outbreak of Asian Long-horned Beetle, Emerald Ash Borer and other harmful insects that threaten the trees and environmental features of Downers Grove and take proactive measures to protect these important community amenities including planting and promoting a diverse array of tree and plant species.

Discourage development in flood-prone areas through the implementation of a sensitive natural areas overlay in the zoning ordinance.

Minimize the amount of impervious surface created by new development and reduce long term contributions to stormwater run-off.

Promote the use of environmentally friendly stormwater management practices~~Best Management Practices (BMPs)~~ as a component of all development.

Modernize the Subdivision Control Ordinance to reflect current urban design and stormwater practices.

Encourage naturalized plantings around the perimeter of stormwater detention facilities instead of turf, where appropriate.

Support measures to prevent the formation of algae and other pest- and insect-breeding environments within detention ponds.

Continue to work with the Park District to address ~~the Village's~~ stormwater issues.

Section 8

COMMUNITY FACILITIES PLAN

Downers Grove, Illinois Comprehensive Plan

THE VILLAGE'S HIGH QUALITY SCHOOLS, MUNICIPAL SERVICES, LIBRARY, HEALTHCARE FACILITIES, AND OTHER PRIVATE ORGANIZATIONS ALL CONTRIBUTE SIGNIFICANTLY TO THE QUALITY OF LIFE WHICH VILLAGE RESIDENTS ENJOY.

A

s an established community, Downers Grove is well served by a variety of community facilities and service providers. The Village's high quality schools, municipal services, library, healthcare facilities, and other private organizations all contribute significantly to the quality of life which Village residents enjoy. The Community Facilities Plan provides an overview of the community facilities within the Village and identifies the current and future needs and long-range recommendations for each community service provider.

Communication & Cooperation

It is important to note that the Village has no jurisdiction or control over many of the community facilities within its municipal limits. While some are provided by ~~the departments within~~ the Village of Downers Grove, others are provided by other public and quasi-public agencies and organizations which provide desired, necessary and sometimes critical services to residents of the community. Consequently, identifying and understanding the needs of each community service provider puts the Village in a better position to assist in meeting the needs of Downers Grove residents and it is important that the Village maintain communication with these service providers regarding their existing needs and plans for expansion.

Schools

Residents of Downers Grove are served by six grade school districts, two high school districts and several independently-operated private schools. Together, these schools provide a well-respected and highly regarded school system serving the students of Downers Grove. While other districts serve the Village, only two – District 58 and 99 – operate facilities in the community. These districts are detailed below.

The Village's strong school system educates local youth and provides gathering places for the community. Downers Grove schools also play a crucial role in building and maintaining home values by increasing demand from families who want to live within their district boundaries and the Village.

The Village should support the continued operation and improvement of both public and private school facilities, ensure they do not negatively impact residential neighborhoods, and cooperate with the various organizations to maintain high quality school sites and facilities.

Downers Grove Grade School District 58

Downers Grove Grade School District 58 operates 11 elementary schools and two middle schools with an estimated enrollment of 5,000. These schools include Belle Aire Elementary School, Highland Elementary School, Puffer Elementary, Pierce Downer School, Lester School, Whittier School, Hillcrest School, Herrick Middle School, O'Neill Middle School, Fairmount School, Indian Trail School, Kingsley School, and El Sierra School.

District 58 Plans

Based on information provided by District officials, District 58 facilities are in need of some improvement and modernization; however there are no current plans for additions or renovations to their facilities.

Community High School District 99

Community High School District 99 operates two high schools within the Village: Downers Grove North High School and Downers Grove South High School. School officials report that the schools are currently at capacity with an estimated enrollment of 5,200; however District officials indicate that enrollment has decreased over the last five years and their projections suggest this will continue in the future.

District 99 Plans

In 2001, a \$49.5 million referendum funded major renovations at the two campuses. Presently, the District has no plans to add facilities; however the District is considering renovation and modernization of its sports facilities.

School Parking

District officials have indicated that a lack of parking at their high schools is an issue. Should School District 99 elect to address this issue, the Village should assist the District in identifying potential solutions to its parking needs, while being sensitive to the impact on adjacent residential areas.

Private Schools

In addition to the public schools within the Village, there are a number of privately owned educational institutions. Private Schools within the Village include the Avery Coonley School, Downers Grove Adventist School, Downers Grove Christian School, First Congregational School, Good Shepherd Lutheran School, Marquette Manor Baptist Academy, St. Joseph Catholic School, and St. Mary of Gostyn Catholic School.

Healthcare

Advocate Good Samaritan Hospital is located in the northern section of the community along Highland Avenue. The hospital has a Level I Trauma Center and is a nationally-recognized hospital.

Midwestern University, which specializes in healthcare education, is located northeast of the hospital. Midwestern University has an enrollment of over 1,900 students. The Village should anticipate an expansion of healthcare facilities as part of the university's curriculum.

Throughout the Village, there are number of smaller medial offices and clinics, but Advocate Good Samaritan Hospital and Midwestern University represent significant community assets as activity generators and employment centers. The Village should continue its support of these facilities, in addition to supporting plans for expansion, renovation, modernization, and new satellite campuses and facilities provided they are appropriate and in the best interest of the Village.

United States Postal Service (USPS)

The United States Postal Service (USPS) provides service to the residents and businesses in the community via a U.S. Post Office and service/operations facility in the heart of Downtown. While the counter and retail function of the facility are a positive contribution to Downtown, the truck traffic generated by its operations contributes significantly to peak hour traffic congestion. To address this issue and relocate truck traffic out of Downtown, the Village should work with the USPS to identify a better location for its operations.

Village Facilities

Village Hall

The current Village Hall was purchased in 1968, and at that time it was anticipated to have a 20-year lifespan. In 1993, the Village hired a consultant to study and examine the space needs of Village Hall. This evaluation was revisited in 2000 in the face of maintenance issues and again in 2007. The most recent (2007) report analyzed the existing conditions and space needs of the Village Hall, the Police Station, the Counseling & Social Services building and the Fleet Services building (an 8.3 acre site). The report found that the current Village Hall site is isolated from the core of downtown and access is difficult. The report also examined the likely functional obsolescence of the Village Hall and the Police Station due to issues such as being over capacity, accessibility and HVAC systems.

Civic Center Plans

The goal of the facility needs assessments undertaken in recent years has been to develop a Civic Center which would consolidate and modernize services provided to the community. The timeline and budget for such an endeavor is not clear. Site constraints, future needs and

proximity to the BNSF railroad tracks must all be taken into consideration if a new Civic Center is to be constructed on the current site of the Village Hall. Should the Civic Center be located elsewhere, redevelopment potential exists for a transit-oriented development on this site.

Fire Department

The Village should continue to take steps to accommodate the fire department's future facility needs and ensure high levels of fire protection service are maintained. The Downers Grove Fire Department operates four stations located throughout the Village. The Village fire department has a water supply and distribution network to adequately serve the community's fire protection needs. Village. Its fire insurance rating is 3, similar to other comparable communities.

Fire Department Plans

In 2008, the Village constructed department invested in construction of a new facility on the former site of Fire Station 2, enabling the consolidation of administrative offices and the relocation of key pieces of equipment to improve response time and service to the Village. At the present, the Village fire department does not have any plans to add or renovate other existing facilities. They do however have other goals to improve fire protection in the Community, including having wireless fire alarm connections, in the short term, and the installation of residential sprinklers in the long term.

Coordination with Adjacent Districts

Presently, the Darien-Woodridge Fire Protection District provides services to a small, southwestern portion of the Village, including neighboring portions of unincorporated DuPage County; and the Village Fire Department serves the Fairview Fire Protection District which covers the unincorporated areas of DuPage County (located in the northeastern portion of the community).

The Village Downers Grove Fire Department should continue to work with neighboring fire protection districts and municipal fire departments to ensure effective fire protection services are maintained in these areas.

Additionally, to avoid confusion and duplication of services and that taxation, should any unincorporated areas served by an adjacent district be annexed to the Village of Downers Grove, the taxing boundary should be amended to allow the Village continues to receive benefits from mutual aid, to provide fire protection to these areas.

Police Department

The Village of Downers Grove Police Department maintains one facility, adjacent to the Village Hall on the east side of Downtown. The Police Department is accredited by the Commission on Accreditation for Law Enforcement Agencies (CALEA), which formally recognizes the department as being one of the most elite in the field.

Police Department Plans

The Village should continue to work closely with the department to ensure effective police protection services are maintained throughout the community. In regard to their facility needs, the Village Police Department does not have immediate plans to renovate or expand the Police Department's facilities unless plans to construct a new Civic Center are formalized.

Public Works

The Public Works Department is responsible for the appearance, operation, and maintenance of the Village of Downers Grove's infrastructure including streets, the urban forest, water supply system, storm drainage system, municipal grounds, public transportation, and traffic control signs and signals. The Village should ensure that adequate public works facilities are maintained and that the locations of such facilities are appropriate, and that the Community Investment Program is updated regularly to accommodate necessary improvements and additions to the Village's infrastructure.

Stormwater Management

Stormwater Management

Stormwater As identified during the TCD3 community outreach process, stormwater management is a significant issue in the Village. While long-term strategies to reduce run-off throughout the Village should be identified, the maintenance and upgrades to stormwater infrastructure should be a priority for the Village in the near term. Given the Village is substantially built out and opportunities for new detention facilities

are limited, the Village will need to continue to be creative in addressing its storm water issues. The recently completed facility at Washington Park serves as an excellent example of how the Village ~~worked, working~~ cooperatively with the Park District, ~~provided detention underneath the park at the time of an enhancement project, to improve stormwater management and alleviate~~ address flooding ~~while enhancing the recreational amenities at the park. issues in the neighborhood northeast of Downtown.~~

Public Library

The Downers Grove Public Library operates a 67,738 square foot building in the downtown, providing services to Downers Grove residents. The Public Library estimates that 63% of Village residents are cardholders. In 2009, the library marked the milestone of circulating over 1 million items.

The current library facility opened in 1999, funded by a successful referendum in 1996. Current issues and concerns cited by Library officials including a lack of available parking at peak periods. The issues experienced in the downtown library and at other downtown buildings may indicate a demand for services that exceed what is currently being provided.

Library Plans

Based on information provided by Library officials, there are no plans at this time to add facilities or perform any major renovations to the existing building.

Community Investment Program

Updated annually, the Community Investment Program (CIP) provides a summary of all major capital projects planned over the next five years, including a specific description and cost estimate of each project. The current CIP covers the years 2010 through 2014. All of the departments, organizations and facilities detailed above are impacted by the CIP.

The Village should conduct a comprehensive life cycle assessment for Village buildings, equipment, vehicles, facilities, and properties and revise the CIP accordingly. In addition, the Village should increase efforts to identify funding sources, such as grants, to pay for the construction of new Village facilities.

Community Facilities Policies and Recommendations

Note: Policies and recommendations are not listed in order of importance.

The Village should actively promote cooperation, interaction, and collaboration among the various agencies and organizations which serve Downers Grove.

The Village should stay informed on the plans, policies, and projects of the various agencies and organizations in order to assess impacts to the surrounding area and the Village at-large. ~~—The level of service these community facilities and services provide help maintain the Village's "quality of life" and image within the region.~~

~~The Village should encourage other agencies and organizations to follow the policies and recommendations included in this plan as they pertain to their agencies and organizations.~~

Public sites and buildings should be viewed as potential catalysts for improvement and/or redevelopment of an area. New facilities should be located, designed, and developed as focal points and "signature" projects within the community.

To the extent possible, new community facilities should be located along collector streets, transit stops, and trail systems to provide improved public access.

It is recommended that Village continue to explore the construction of a consolidated governmental facility to remain in the downtown.

Should the Civic Center project move forward, the Village should "lead by example" and consider the use of all best practices, including sustainable design and development practices and consider LEED, or similar, certification for the project.

The Village should continue to ~~work to ensure that effective fire and emergency medical services are maintained throughout the Village. take steps to accommodate the fire department's future facility needs and ensure continued high levels of service.~~

The Village should work closely with the ~~neighboring fire~~ various districts and municipalities to ensure effective fire protection services are maintained throughout the community.

The Village should promote the continued operation and improvement of both public and private school facilities, ensure they do not impact residential neighborhoods, and cooperate with the various organizations to maintain high quality school sites and facilities.

| The Village should encourage the use of shared facilities (i.e., between the Village, Park District and schools) in order to maximize efficiency, tax dollars and land.

| The Village should continue to work ~~closely with the police department~~ to ensure effective police protection services are maintained throughout the community.

The Village should maintain regular contact with healthcare and educational providers to ensure land use and revenue goals are shared.

The Village should promote and encourage the relocation of the Post Office truck operations from Downtown while maintaining the postal retail functions.

The Village should continue to prioritize stormwater management and work cooperatively and creatively to address it in all areas of the Village.

Section 9

KEY FOCUS AREA PLANS

Downers Grove, Illinois Comprehensive Plan

KEY FOCUS AREAS ARE ECONOMIC GENERATORS FOR DOWNERS GROVE AND ARE AMONG THE MOST INTENSELY DEVELOPED PORTIONS OF THE VILLAGE

This section presents recommendations regarding land use, development and improvements for five key focus areas within Downers Grove. The Key Focus Area Plans build upon the generalized recommendations established in the Land Use Plan and provide more detailed and site-specific recommendations for these unique and important parts of the Village.

Identification of Key Focus Areas

Many factors entered into the selection of the Key Focus Areas. They are economic generators for Downers Grove and are among the most intensely developed portions of the Village. They include important transportation facilities that connect Downers Grove to the surrounding region. These areas are highly visible to passing motorists and transit riders which means they contribute greatly to the perception of Downers Grove by residents and visitors. Finally, each area has issues which, if addressed, could significantly improve their function and aesthetics.

Organization of the Key Focus Area Plans Section

Each of the five Key Focus Areas is discussed in detail on the following pages including:

- Identification of planning influences and existing conditions;
- Key concepts for improvement and redevelopment;
- Identification of catalyst redevelopment sites; and
- Land use recommendations.

Catalyst Sites: Evaluation Criteria

Catalyst sites are those parcels where redevelopment would have a positive catalytic impact on the surrounding area. In the identification of catalyst sites, certain criteria are considered. Catalyst sites are determined based on the sites exhibiting some or all of the following characteristics:

- Underutilized buildings or land
- Vacant buildings or land
- Structural soundness of buildings
- Size of property
- Ownership (e.g., unified private ownership or Village-owned)
- Visibility and access
- Current zoning and adjacent zoning
- Surrounding land uses
- Market potential

The Key Focus Areas include:

Belmont/Ellsworth, which is bounded by I-355 on the west, the BNSF railroad tracks on the north and areas that are predominantly residential to the south and east. This subarea is comprised of two main components: Belmont Road and the Belmont Metra Train Station area

(including Chase Court) and the Ellsworth Industrial Park, the Village's largest concentration of industrial land.

Downtown, which is generally comprised of commercial, residential, office and civic uses and is notable for its historic buildings including the Tivoli Theatre and the Masonic Temple. Downtown is the symbolic heart of the community and has traditionally been the focus of commercial, social, and civic life as well as an important connection to the regional transportation network.

Butterfield, which is comprised of shopping centers, stand-alone restaurants and office development of varying heights. Its proximity to I-88 and I-355 provides unparalleled access and visibility and is a key gateway into the Village of Downers Grove.

Ogden, which is firmly established as an auto-oriented corridor in terms of its traffic volume, design, development pattern, scale and land use. Ogden is a major east-west arterial with a range of uses that serve the community and the surrounding region.

Fairview, which is made up of the area surrounding the Fairview Metra station. This area is comprised of multi-family residential, industrial, office and retail uses. This Key Focus Area extends to the eastern boundary of the Village.

The following pages provide detailed plans for the five Key Focus Areas. In addition to specific recommendations tailored towards each area, there are two redevelopment concepts that may apply to some or all of the areas: heat island effect and brownfield redevelopment.

Heat Island Effect

Industrial parks, large office buildings and large retailers are often major contributors to the heat island effect due to their large roof surface area and surface parking lots. The heat island effect is a thermal gradient difference between developed and undeveloped areas due to solar energy retention on constructed surfaces. This basically means that developed areas are measurably hotter than undeveloped areas due to their lack of green areas which naturally provide cooling. Heat islands negatively impact microclimate conditions as well as human and wildlife habitats. Ambient temperatures in urban areas can be artificially elevated by more than 10 degrees Fahrenheit. This requires larger HVAC equipment and electrical demand which increases greenhouse gas and pollution.

Ways to Reduce Heat Island Effect

The U.S. Green Building Council provides ways to reduce the heat island effect through its LEED certification process:

Provide shade through the installation of landscape features especially for constructed surfaces (garden roofs, shade trees, etc.)

Shade can be provided by native or adaptive trees, large shrubs and non-invasive vines

Garden roofs help to reduce stormwater volumes

Use light colored building materials

Use light colored paving surfaces and shade paved areas with landscaping

Use an open grid pavement for the site's non-roof impervious surface (parking lots, walkways, plazas, etc.)

Place parking spaces underground or in structured parking

Use highly reflective/EnergyStar-compliant roof surfaces

Install a green (vegetated) roof

Limit the amount of impervious hardscape areas

Brownfield Redevelopment

According to the U.S. Environmental Protection Agency, a brownfield is "real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant." Despite the presence or potential presence of these elements, brownfield redevelopment can be a sound strategy for achieving a municipality's land use and economic development goals. Prioritizing development on brownfield sites reduces pressure on undeveloped land and maximizes existing investments (such as infrastructure). Time and money can be saved in the redevelopment process by coordinating site development plans with remediation activities.

Ways to encourage brownfield redevelopment:

Inventory existing or perceived brownfield sites within the Village

Apply for grants and programs provided through the U.S. Environmental Protection Agency (EPA) and Illinois EPA

Develop financial incentives to encourage private redevelopment of brownfield sites

IMPLEMENTATION

Downers Grove, Illinois Comprehensive Plan

THE IMPLEMENTATION SECTION HIGHLIGHTS SEVERAL STEPS THAT SHOULD BE TAKEN TO INITIATE AND SUSTAIN THE PLAN IMPLEMENTATION PROCESS

The Comprehensive Plan sets forth an agreed-upon “road map” for growth and development within the Village of Downers Grove over the next 15 to 20 years. It is the product of considerable effort on behalf of the Village Council, Plan Commission, Comprehensive Plan Committee, Village staff, and the community at large.

~~This Building on the detailed implementation matrix contained in TCD3, this~~ section highlights several steps that should be undertaken to initiate and sustain the plan implementation process. These include:

- Use the updated Comprehensive Plan on a day-to-day basis;
- Review and update the Zoning Ordinance and other development controls;
- Review and update the Community Investment Program (CIP);
- Annually, prepare a 5-year action plan to prioritize objectives for the future and list accomplishments of preceding years;
- Promote cooperation and participation among various agencies, organizations, community groups and individuals;
- Enhance public communication;
- ~~Continue to engage the public using a variety of outreach tools; TCD and refer to TCD3's action plan matrix;~~
- Review the Comprehensive Plan every five years for potential updates; and,
- Explore possible funding sources and implementation techniques.

Use the Plan on a Day-to-Day Basis

The Comprehensive Plan is the Village’s official policy guide for improvement and development. It is essential that the Plan be supported by the Village Council and used on a regular basis by Village staff, boards and commissions to review and evaluate all proposals for improvement and development within the community in the years ahead.

The Village should:

- Make copies of the Plan document available for public review and purchase;
- Provide assistance to the public in explaining the Plan and its relationship to private and public development projects and other proposals, as appropriate;
- Assist the Village Council, boards and commissions in the day-to-day administration, interpretation, and application of the Plan;
- Consider possible amendments, issues or needs which may be a subject of change, addition or deletion from the Comprehensive Plan; and,
- Coordinate with, and assist the Plan Commission and Village Council in the Plan amendment process.

Review of Zoning Ordinance

The Comprehensive Plan sets forth policies regarding the use of land within the Village and establishes guidelines for the quality, character and intensity of future development. The Plan’s policies and guidelines should inform the revision of or drafting of zoning and development regulations to ensure consistency.

Zoning is an important tool in implementing planning policy. It establishes the types of uses allowed on specific properties, and prescribes the overall character and intensity of development to be permitted.

It is essential that all of the Village's development controls be consistent with and complement the updated Comprehensive Plan. Adoption of the Comprehensive Plan should be followed by a review and update of the Village's various development controls including zoning, subdivision regulations, and other related codes and ordinances.

Community Investment Program (CIP)

Another tool for implementing the Comprehensive Plan is the Village's Community Investment Program (CIP). It establishes schedules and priorities for all public improvement projects within a five-year period.

The CIP typically should be used to schedule the implementation of specific projects related to the Comprehensive Plan, particularly the restoration and upgrading of existing infrastructure, utilities, and Village facilities. The expansion or improvement of the existing Village Hall or Police Department facilities is also included in the Community Investment Program.

As financial resources in Downers Grove will always be limited and public dollars must be spent wisely, the Village should continue to use the CIP to provide the most desirable public improvements and stay within budget constraints.

Action Agenda

In conjunction with annual updates to the Community Investment Program, the Village should prepare an implementation "action agenda," similar to TCD3, to highlight the improvement and development projects and activities to be undertaken during the next few years. For example, the action agenda might consist of:

- A detailed description of the projects and activities to be undertaken;

- The priority of each project or activity;

- An indication of the public and private sector responsibilities for initiating and participating in each activity; and

- A suggestion of the funding sources and assistance programs that might potentially be available for implementing each project or activity.

To remain current, the action agenda should be updated once a year.

Cooperation

The Village of Downers Grove should assume the leadership role in implementing the updated Comprehensive Plan. This includes carrying out the administrative actions, the public improvement projects and a variety of programs available to local residents, businesses and property owners.

However, for the Comprehensive Plan to be successful, it must be based on a strong partnership between the Village, other public agencies, citizens, neighborhood groups and organizations, the business community, and the private sector.

The Village should lead this collaborative effort to implement the Comprehensive Plan. The Village's partners should include:

Other governmental and service districts, such as the school districts, public library, Park District, Forest Preserve District, Downers Grove Township, DuPage County, emergency service providers such as police and fire, private utility companies, the Illinois Department of Transportation (IDOT), the Forest Preserve District of DuPage County, etc;

Builders and developers, who should be encouraged to undertake improvements and new construction that conform to the Plan and enhance the overall quality and character of the community; and,

The **Downers Grove community**, since all residents and neighborhood groups should be encouraged to participate in the on-going planning process, and all should be given the opportunity to voice their opinions on improvement and development decisions within the community.

Public Communication

Implementing the recommendations of the Comprehensive Plan will require the support and extensive participation of the community. Successfully communicating with local residents, businesses, and property owners should be a priority of the Village.

The Village should prepare a brief summary version of the updated Comprehensive Plan and distribute it widely throughout the community including making it available on-line, at the public library and at Village Hall. It is important that all local residents, businesses, and property owners be familiar with the Plan's major recommendations and its "vision" for the future.

The Village should also consider additional techniques for responding quickly to public questions and concerns regarding planning and

development. For example, the Village might consider a special newsletter or website features that focus on frequently-raised questions and concerns regarding planning and development or new Village projects.

TCD

~~The TCD3 community outreach process identified dozens of long-range objectives toward which planning efforts and capital improvements and expenditures should be directed. To begin to address these community objectives, the TCD3 report included an Action Plan that identifies tasks and implementation strategies and provides specific and targeted actions. The principal recommendation of the TCD3 process and the Action Plan is the development of Neighborhood Organizations throughout Downers Grove to facilitate formal communication between residents and local government agencies.~~

~~TCD should continue to occur every 10–15 years to maintain a formal opportunity to receive broad input from the community on the state of the Village and desired long-range initiatives.~~

Neighborhood Organizations

~~Neighborhood Organizations are smaller community/neighborhood units that can work directly with the Village and other governmental entities to prioritize projects and actions, and report on issues affecting the many unique areas and neighborhoods of Downers Grove. These organizations would represent themselves as such to any elected/appointed body of government in the community, including the Village Council, School Boards and Park Boards. In essence, it is a neighbor-based approach where smaller divisions or neighborhoods are organized to provide a liaison for communication and a representative voice for issues, projects or actions affecting their neighborhoods.~~

~~The Village should continue to examine the concept of a Neighborhood Organization model of cooperation and communication. Establishing this localized model of communication and cooperation would enable the Village to selectively implement the recommendations of both the Action Plan and the Comprehensive Plan in a more targeted and efficient manner.~~

Regular Updates

It is important to emphasize that the Comprehensive Plan is not a static document. If community attitudes change or new issues arise which are beyond the scope of the current Plan, the Plan should be revised and updated accordingly.

Although a proposal to amend the Plan can be brought forth by petition at any time, the Village should regularly undertake a systematic review of the Plan. The Village should initiate review of the Plan at regular intervals, typically every three to five years. Ideally, this review should coincide with the preparation of the Village's budget and Community Investment Program and the preparation of an annual action agenda. In this manner, recommendations or changes relating to capital improvements or other programs can be considered as part of the commitments for the upcoming fiscal year. Routine examination of the Plan will help ensure that the planning program remains relevant to community needs and aspirations.

Funding Sources

While many of the projects and improvements called for in the Comprehensive Plan can be implemented through administrative and policy decisions and can be funded through normal municipal revenue streams, other projects may require special technical and/or financial assistance.

The Village should continue to explore and consider the wide range of local, state and federal resources and programs that may be available to assist in the implementation of planning recommendations. A list of possible funding sources and mechanisms include the following:

Community Development Block Grant Program (CDBG)

Tax Increment Financing (TIF)

Home Rule Sales Tax

Special Service Area (SSA)

Business District Designation

Tax Abatement

Payment in Lieu of Taxes (PILOT)

Community Development Corporations

Foundation and Specialized Grants

Business Development Public Infrastructure Program (BDPIP)

Manufacturing Modernization Loan Program
Industrial Revenue Bond (IRB) Inducements
Brownfields Cleanup Revolving Loan Program
Brownfields Assessment Grant Program
Brownfields Cleanup Grant Program
Illinois Municipal Brownfields Redevelopment Grant Program
Rail Freight Program (RFP)
SAFETEA-LU
Surface Transportation Program (STP)
Safe Routes to School
Illinois Transportation Enhancement Program (ITEP)
Congestion Mitigation and Air Quality Improvement Program (CMAQ)
Illinois Department of Natural Resources
OSLAD
Recreational Trails Program
Land and Water Conservation Fund (LWCF)
Illinois Clean Energy Community Foundation
Illinois Sustainable Education Projects (ISTEP)

Appendix:

GOALS & OBJECTIVES

Downers Grove, Illinois Comprehensive Plan

GOALS AND OBJECTIVES FORM THE FRAMEWORK FOR PLANNING RECOMMENDATIONS, POLICIES, FUTURE PROJECTS AND ACTIONS

The Village of Downers Grove's Comprehensive Plan looks forward over the next 15-20 years and expresses what the Village desires to become in the future. This section presents the relevant goals and objectives derived from the TCD3 public input effort. The goals and objectives form the framework for consideration by the Comprehensive Plan Committee and its recommendations. The input was gathered largely in 2009 by TCD3.

Goals describe desired end situations toward which planning efforts should be directed. They are broad and long-range. They represent an end to be sought, although they may never actually be fully attained.

Objectives describe more specific actions that should be undertaken by the Village to advance toward the overall goals. They provide more precise and measurable guidelines for planning action.

Goals and Objectives have been established for:

Residential Areas;

Commercial and Office Areas;

Industrial Areas;

Transportation and Circulation;

Infrastructure and Development;

Community Facilities;

Parks, Open Space and Environmental Features;

Image and Identity;

Economic Development; and,

Village Services and Administration.

Residential Areas

Goal

Maintain the Village's image and desirability as a great place to live by preserving and enhancing the quality, character, safety and appeal of residential neighborhoods, developments and subdivisions, and providing diversity in its housing stock and unit types.

Objectives

Promote residential development and redevelopment of a variety of housing and dwelling unit types and densities in accordance with the Land Use Plan, and ensure the Zoning Ordinance and other regulatory tools are updated appropriately.

Accommodate residential renovation and redevelopment through a consistent, expedient and thorough permitting process.

Consistently administer and enforce residential development regulations, including compliance with setbacks, maximum height, parkway tree preservation, stormwater, bulk, density and other development regulations.

Consistently administer and enforce residential construction regulations, including construction hours, fencing, trash and debris, parking, and other construction related activities that can impact nearby properties.

Consider the development of a guide or tool to ensure that new residential construction (including infill and teardown construction) and additions are of an appropriate scale and character.

Continue to inventory and enhance regulatory protections for the Village's notable historic homes including its collection of Sears homes.

Examine alternative solutions to sidewalk construction in certain challenging areas of the Village.

Improve public outreach and input programs for capital and infrastructure improvement projects.

Explore the creation of a property maintenance program to assist residents, particularly seniors, with affordable lawn cutting and snow removal services.

Preserve sound existing housing through regular, active code enforcement and preventative maintenance programs.

Explore the creation of a vacant building registration and inspection program to prevent foreclosed and/or neglected properties from having a detrimental impact on surrounding properties.

Work with home owners associations and property management companies to enforce property maintenance requirements in private residential developments, particularly with regard to vacant units.

Prevent the encroachment of incompatible development on residential areas through implementation of the Land Use Plan and buffering, screening, and separation requirements where necessary and provide areas of transitioning density and intensity of use between residential and commercial land uses where appropriate.

Strictly enforce buffering, landscaping, screening and lighting requirements of adjacent commercial areas to minimize the negative impacts of commercial development on residential uses.

Discourage “cut through” commercial traffic in residential areas through signage, enforcement, traffic calming and other measures particularly at the time of reconstruction.

Promote the economic importance, and support the provision of, a variety of housing types and choices within the Village including single family, multi-family, senior housing and others including both owner-occupied and rental properties.

Encourage the maintenance and preservation of parkway trees as an important component of the Village’s tree canopy.

Commercial and Office Areas

Goal 1

Develop aesthetically pleasing and functionally well-designed retail and commercial shopping areas that are market supportable, maintain a diversified tax base, and serve the needs of the Village’s residents and in some areas, a larger regional market.

Objectives

Maintain a range of retail and service commercial activities throughout the Village.

Define and designate more specific functional roles for the various commercial areas within the Village distinguished by local-, community-, and regional-serving developments.

Ensure that new commercial development and redevelopment is designed in scale with, and complementary to, existing adjacent development.

Ensure that all new and improved commercial development, and encourage existing commercial development are effectively screened and buffered from adjacent residential uses.

Support and encourage all retail, office, and service commercial activities to be organized by use and concentrated within or near areas of complementary uses.

Recognize, support and encourage the catalytic role of new campuses and buildings of higher education in appropriate locations within the Village.

Recognize, support and encourage the catalytic role of medical services in appropriate locations within the Village.

Where applicable, require the design of new commercial developments to incorporate public amenities such as parks, plazas, arcades and connections to existing or proposed trails.

New or expanded parking structures should be designed to complement the architecture and urban form of the surrounding area.

Establish a program to assist businesses and property owners with façade improvements, landscaping, parking improvements, and modernization of aging structures and facilities.

Continue to utilize and consider additional incentives such as sales tax rebates, TIF, SSA, and business district funds to initiate redevelopment of key opportunity sites.

Initiate programs to incentivize the improvement and rehabilitation of older commercial buildings and areas which are, or are becoming, functionally obsolete including improvements to facades, signage, streetscaping, landscaping, and parking areas.

Implement a more systematic and proactive property maintenance and code enforcement process in commercial areas of the Village.

Conduct a comprehensive review of commercial uses in the zoning ordinance to ensure they are up-to-date and serving the Village well.

Goal 2

Enhance the economic viability, productivity, appearance and function of the Village's commercial corridors, including Butterfield Road, Ogden Avenue, 63rd Street and 75th Street.

Objectives

Promote a healthy and mutually reinforcing mix of commercial, retail, and service uses along key corridors within the Village including Butterfield Road, Ogden Avenue, 63rd Street, and 75th Street.

Utilize a commercial "node" approach by locating commercial uses along Ogden Avenue, 63rd Street, and 75th Street at or near key intersections, rather than treating the entire length of the corridor as appropriate for commercial development.

Establish design and improvement standards for commercial areas to guide the scale, appearance, orientation, and overall character of new development.

Encourage appropriate signage along corridors to ensure safe traffic movements into, out of, and through commercial areas.

Encourage corporate campuses and office development to take advantage of their location along I-88 and I-355 by orienting attractive facades and corporate identification signage toward the highway.

Maximize the exposure and capitalize on the access to I-88 and I-355 by clustering uses and businesses that benefit from, and cater to, a larger regional market and employment base near interchanges and promoting and encouraging better signage and appearances on facades fronting the interstates.

Review and update signage ordinances being flexible to the desire and necessity of business identification but mindful of its potential to block views, create visual clutter and detract from the appearance of the Village and its commercial areas.

Promote the relocation of incompatible uses, and uses in conflict with the community's vision for its key commercial corridors, to more appropriate areas within or outside of the Village of Downers Grove. This should occur on a case by case basis based on land use, regulatory issues and the respective needs of the particular business.

Develop and install a streetscape program consisting of elements that strengthen the unified theme of the commercial areas such as benches, bus shelters, trash cans, streetlights, way finding signage and other amenities.

Work cooperatively with IDOT to facilitate desired improvements within their right-of-way including improved landscaping, lighting, and gateway signage consistent with the Key Focus Area Plans.

Identify underperforming and underutilized parcels and sites and work with property owners and developers to promote their redevelopment encouraging parcel assembly where appropriate.

Promote the modernization and/or redevelopment of the Meadowbrook Mall and other outdated shopping centers.

Promote coordinated and shared vehicle access to commercial properties along the Village's commercial corridors and remove redundant and unnecessary curb cuts to improve traffic flow and vehicular and pedestrian safety.

Encourage shared parking programs and policies in commercial areas wherever possible.

Goal 3

Continue to revitalize Downtown as the symbolic "heart" of the community and enhance its role as the Village's primary mixed-use pedestrian environment.

Objectives

Continue to revitalize Downtown with a mixture of uses including commercial, office, restaurant, and residential.

Follow Transit-Oriented Development (TOD) principles (embodied by a pedestrian orientation, incorporation of density and a focus on the transit infrastructure) when considering new development and improvements in the Downtown.

Maintain Downtown as pedestrian-oriented area and a walkable shopping area that is unlike any other commercial area in the community.

Promote new infill development in the Downtown area and encourage the consolidation of smaller development parcels where possible to foster larger, more coordinated commercial development opportunities.

Building on the Downtown Pattern Book, establish Design & Development Guidelines to better guide redevelopment in Downtown.

Establish a regulatory framework, such as form-based codes, to work in conjunction with the Design and Development Guidelines to foster a

desired and predictable built form in the Downtown.

Zoning for the Downtown should be analyzed and amended if necessary to adequately accommodate appropriate new development and establish the desirable physical form of the Downtown.

Ensure parking adequately supports businesses by conducting a circulation and parking needs assessment for Downtown and develop a plan for the continued provision of adequate parking in Downtown.

Require development and redevelopment projects within the Downtown to provide detailed parking and traffic studies which plan for current and future parking demand, access and circulation.

Promote and encourage shared parking arrangements and facilities wherever feasible to minimize the land area within Downtown dedicated to parking.

Require Downtown development to be compatible with the scale and uses of the surrounding area and minimize and mitigate any negative impacts on adjacent land uses.

Conduct a Downtown traffic study in order to assess issues and identify a solution for improving traffic flow.

Industrial Areas

Goal

Continue to support a diversified light industrial/business park/commercial service economic base that provides employment opportunities within the community.

Objectives

Establish and maintain regular lines of communication with industrial property owners and businesses.

Promote and encourage the improvement and rehabilitation of older industrial buildings and areas which are, or are becoming, functionally obsolete or undesirable including improvements to loading docks, access, building facades, signage, streetscaping, landscaping, and parking areas to accommodate more appropriate and market viable uses.

Encourage the use of green technology and best management practices (BMPs) in the development and redevelopment of industrial uses and market the Village's industrial areas as centers of green technology and light industrial.

Reclassify and rezone manufacturing areas which are functionally obsolete where there is: incompatible proximity to residential land uses, small lot sizes, or challenging lot configurations. Industrial properties between Warren Avenue and the BNSF railroad tracks and Rogers Street and the BNSF railroad tracks are examples of areas exhibiting these characteristics.

Identify industrial properties that may be potential brownfield sites in order to assess the need for clean-up and remediation and seek funding as appropriate.

Prevent the encroachment of incompatible development into industrial areas and utilize appropriate setbacks, screening, buffering, and site design to mitigate the impacts of industrial uses on adjacent areas.

Ensure that all uses are effectively screened from adjacent properties and public rights-of-way, through the use of landscaping, fencing, or a combination of the two.

Reserve Ellsworth Industrial Park exclusively for light industrial, research and development and business park uses, prohibiting the infiltration of institutional, membership, athletic, or commercial uses.

Install directory signage at entrances to Ellsworth Industrial Park to direct traffic within the industrial area to promote the businesses to residents and motorists.

Improve the public utilities and road infrastructure within Ellsworth Industrial Park to accommodate the state-of-the-art technological needs of the businesses and the physical and circulation needs of the truck traffic moving in and throughout the area.

Transportation and Circulation

Goal 1

Improve the safety, function and efficiency of vehicular movement and parking facilities within the Village.

Objectives

Install and maintain “intelligent” traffic signals and systems along key corridors and routes to facilitate the efficient movement of vehicles within and through the Village and minimize the impact of peak traffic flows.

Conduct a review of the existing one-way street configuration in Downtown and alter traffic patterns in areas where one-way streets do not have a positive impact on traffic flow and pedestrian safety.

Protect and improve the function of the street network through controlled access, land-use decisions, and street/intersection design improvements.

Ensure adequate resources are made available for the maintenance of Village streets and public rights-of-way.

Work closely with existing business owners to consolidate curb cuts by providing cross access between and shared access into businesses wherever possible.

Eliminate unnecessary, redundant, obsolete and dangerous curb cuts throughout all commercial areas to improve the safety and efficiency of vehicular movement.

Continue to support and work with other relevant agencies to ensure the completion of the Belmont underpass project.

Evaluate methods to achieve improved north-south traffic flow across the downtown train tracks, whether by a new grade separation or by locating a new train station platform to the east near the current village hall to eliminate the need for barriers while commuter trains load and unload passengers.

Provide priority parking spaces for no- and low-emissions vehicles in all public parking facilities and encourage the provision of similar spaces in private parking facilities.

If validated through a parking needs assessment and separate feasibility and engineering analysis, expand public parking facilities in Downtown Downers Grove.

Establish a wayfinding signage system that directs motorists to key retail, office, industrial, and community facility destinations.

Encourage the maintenance and preservation of parkway trees as an important component of the Village’s tree canopy.

Consider traffic calming and other measures to improve traffic flow in tandem with surface reconstruction projects.

Work with relevant agencies and officials to ensure completion of a westbound exit from I-88 at Highland Avenue.

Goal 2

Provide a coordinated transportation network for pedestrians and bicyclists in order to connect them to employment, shopping and recreational areas.

Objectives

Where appropriate, encourage new development/redevelopment to include connections and amenities for pedestrians, bicyclists and commuters.

Improve pedestrian and bicycle circulation and safety throughout the Village with an emphasis on safer and more convenient routes for non-motorized traffic.

Expand the Village’s network of trails and sidewalks to provide better connections between the Village’s residential neighborhoods, parks, schools, Downtown, and other commercial areas. This should be undertaken with consideration of the privacy of adjoining residences.

Conduct an analysis of potentially dangerous pedestrian crosswalks in Downtown and along other heavily trafficked roads including 63rd Street, 75th Street, Belmont Road, Main Street, and Ogden Avenue and other heavily trafficked roads and improve them, where feasible, with additional lighting, signalization, bollards, bulb outs and/or curb extensions.

Identify key pedestrian routes and budget for streetlight replacement along those routes to include pedestrian-scaled lighting amenities and identify areas throughout the Village needing enhanced lighting for pedestrian safety.

Budget for on-going maintenance and repair of sidewalks as part of the Village’s Community Investment Program (CIP) including the consideration of a cost-sharing program with private property owners.

Maintain and expand the sidewalk network throughout the Village’s commercial districts and corridors ensuring sidewalks are located along both sides of all streets within these areas and ensure they connect to businesses and other destinations.

Implement the recommendations of the Village’s bicycle plan to continue to expand the Village’s bike path system, and work towards a complete trail system that connects to the larger regional trail system. This should be undertaken with consideration of the privacy of adjoining residences.

Conduct and implement an on-street bike lane feasibility analysis and plan.

Promote bicycle safety.

Goal 3

Ensure that high-quality public transit remains a vital part of Downers Grove's transportation network.

Objectives

Ensure that levels of public transit service are maintained and enhanced throughout the Village, including the continued operation of the schedules of all three of the Metra Station within the Village.

Undertake a Comprehensive Transit Plan to identify key traffic generators and destinations within the Village and ensure they are adequately served by Pace Bus routes and other modes of alternative transportation.

Work with area employers and businesses to promote and implement traffic demand management and reduction techniques including the use of public transit, carpooling, walking and bicycling.

Promote Pace's Vanpool Incentive Program (VIP) including traditional vanpooling, employer shuttles and Metra feeders as an economical, convenient and environmentally-friendly alternative to driving.

Inventory and assess the condition and location of all Pace Bus shelters in the Village to ensure schedules are adequately posted, that the shelters are in good condition, and that they are connected to the Village's sidewalk system, community facilities, employment centers and other key destinations.

Work with transit providers to improve service routes and encourage increased use of transit throughout the Village including improved service within the Village's residential areas.

Infrastructure and Development

Goal

Maintain high-quality, green and efficient infrastructure systems and networks through regular investment and maintenance to meet the changing needs of the Village today and in the future.

Objectives

Continue to budget for and implement the improvement, expansion and maintenance of the community's infrastructure including roadways, stormwater drainage system, water production and distribution infrastructure, and sewer collection and treatment infrastructure.

Conduct a Village-wide pavement study and sidewalk condition analysis to identify roads **in need of repair**.

Continue the Village's sidewalk repair program based on evaluations of concrete deterioration and trip hazards.

Continue the Village's Sidewalk Installation Program and refine the Sidewalk Priority Matrix based on an updated, context-sensitive policy regarding the construction and placement of new sidewalks.

Promote the coordination of infrastructure and utility projects with other agencies to reduce Village costs through economies of scale.

Investigate options for implementing Best Management Practices (BMPs) throughout the Village to address flooding issues.

Promote the use of sustainable design and development practices for new development throughout the Village.

Consider updating the Village's Subdivision Control Ordinance to match current urban design and stormwater practices.

Promote the adaptation of sustainable technologies and application of sustainable management practices to existing development throughout the Village.

Encourage new development to utilize "green technology" such as green rooftops, solar energy, and green paver parking lots to reduce stormwater runoff.

Continue to seek grants, loans and other sources of intergovernmental funding to assist with capital improvements and projects to minimize the financial impact on the Village.

Work with environmental advocacy groups to educate the public on the benefits of incorporating the use of green/Best Management Practices (BMPs) in the management of residential properties.

Evaluate pedestrian mobility and amenities in new development to ensure that pedestrian movements are accommodated in new projects.

Plan and budget for beautification elements to be incorporated into planned infrastructure improvements such as landscaped parking lots, planted medians, landscaped sidewalks, and street trees.

Consider incorporating the use of solar powered street lights, wind power, and other green technologies into future roadway improvements and street lighting replacement.

Consider the use of pervious paving materials in public parking lots and encourage private developers to use this and other run-off reducing technologies.

Pursue alternative sources of funding such as grants to facilitate ‘green’ improvements to public areas.

Community Facilities

Goal

Ensure the provision of high-quality public facilities, including municipal and educational facilities, for all residents of the Village of Downers Grove.

Objectives

Work with the school districts to review the existing parking facilities, buildings, drop-off/pick-up areas, and bus parking, including ingress and egress to ensure they are adequate and if not, identify opportunities for improvement.

Work with the school districts to ensure proper buffering surrounding school facilities and safe and adequate access to school sites.

Ensure the Village continues to benefit from an adequate level of fire and police protection throughout the Village.

Enhance the physical relationship between school facilities and surrounding neighborhoods.

Continue to support the operation of other important community service providers, including Northwestern University, Good Samaritan Hospital, and others and maintain positive and mutually beneficial relationships with each organization.

Work with others to seek appropriate locations for specialized facilities and services for senior citizens, youth and disadvantaged populations.

Work with other public agencies to maintain adequate and appropriate sites and facilities for the provision of public services.

Work with the U.S. Post Office to relocate the operations and truck traffic to a more appropriate site in the Village outside of Downtown.

Continue to conduct a comprehensive life cycle assessment for Village buildings, equipment, vehicles, facilities, and properties and develop/revise a multi-year maintenance plan and on-going maintenance program.

Identify funding sources such as grants to pay for the construction of new Village facilities.

Consider pursuing LEED, or similar, certification for new or renovated Village facilities.

Increase efforts to identify alternative sources of funds such as grants to fund a wide range of public projects including, but not limited to village facilities, parks and recreation enhancements, transportation improvements, economic development related projects, and social services.

Using various design and signage tools, reinforce community landmarks such as Village Hall, the Public Library, 1846 Blodgett House, Pierce Downer’s Burial Place, Downers Grove Historical Society, schools, religious institutions, and parks as important focal points and resources for the community.

Parks, Open Space and Environmental Features

Goal 1

Work with the Downers Grove Park District to continue to provide opportunities for passive and active recreation through high-quality facilities and programming.

Objectives

Work cooperatively with the Park District and other interested agencies and stakeholders to create a Trails Master Plan that incorporates the trail plan recommendations of the Village, Park District, regional agencies and pertinent input from the community.

Work with the Park District to market and promote the Village’s trail system including the posting on-line of the existing and proposed trail system.

Assist the Park District in identifying grants and securing alternative funding for parks, open space, trail segments, trail connections, and other recreation amenities for the community.

Work with the Park District to identify potential park site locations in areas of the community determined to be underserved by existing facilities.

Continue to work with the Park District to address the Village's stormwater issues.

Should it be determined that there is demand and/or desire for a community pool, work cooperatively with the Park District to consider the traffic and other externalities the facility may generate.

Goal 2

Protect and promote the Village's unique environmental assets and promote the importance of environmental issues and sustainable practices to residents and businesses.

Objectives

Provide opportunities for increased public participation in decision-making, promotion and protection of the Village's unique environmental assets.

With the Park District, continue to link parks and open space with the multi-use trail system.

Ensure adequate resources for the maintenance of Village-owned environmentally-sensitive lands.

With the Park District, create a Public Areas Beautification Plan for the Village which should include recommendations for enhancing and expanding green space and creating new green space and community gateways.

With the Park District, install environmental education and interpretive signage throughout the community in locations with natural areas and important environmental assets.

Consider local ordinances and regulations to preserve and protect trees and other environmental features throughout the Village and its neighborhoods.

Establish zoning regulations to protect floodplains, Localized Poor Drainage Areas, wetlands and other sensitive environmental features.

Continue to actively monitor the outbreak of Asian Long-horned Beetle, Emerald Ash Borer and other harmful insects that threaten the Village's trees and environmental features and take proactive measures to protect these important community amenities including planting and promoting a diverse array of tree and plant species.

Support measures to prevent the formation of algae and other pest- and insect-breeding environments within detention ponds.

Continue to prohibit burning of leaves and other debris.

Image and Identity

Goal

Maintain a positive image and identity for the Village that is distinct and reflective of its unique character and assets to distinguish Downers Grove from other nearby communities.

Objectives

Encourage compatible and high-quality design and construction for all development/redevelopment with an emphasis on site design, building orientation, architecture, building materials and site improvements.

Provide for consistent and high-quality maintenance of all local streets, parkways, sidewalks, water towers and other visible municipal infrastructure.

Install streetscape elements that strengthen the unified theme of the community such as benches, bus shelters, trash cans, streetlights, way finding signage and other amenities.

Create gateway features consisting of signage, walls, sculptures, pylons, fountains, lighting, monuments, and/or landscaping at key locations within the community to announce entry into Downers Grove and to distinguish the Village from adjacent municipalities.

Encourage subdivision and business park monument signs to include the Village of Downers Grove's name and/or logo to promote the Village's identity.

Review existing and install new wayfinding signage to direct vehicles to key community destinations.

Review and update the Village's landscape ordinance to ensure new development includes sufficient landscaping.

Develop and implement landscaping and tree planting and maintenance programs that beautify the residential and commercial areas of the Village.

Develop a program to bury and/or relocate overhead utility lines along key commercial areas, including Downtown, Ogden Avenue, 63rd

Street, and 75th Street.

Expand the Village's façade program to encourage private property owners to implement landscaping, façade and signage improvements to their sites, buildings and businesses.

Implement a program to screen fixed utility locations, such as lift stations, pump houses, transformer sites, antennas, telephone switches, etc.

Review and update signage ordinances being flexible to the desire and necessity of business identification but mindful of its potential to block views, create visual clutter and detract from the appearance of the Village and its commercial areas.

Strictly enforce landscaping, screening and signage requirements including amortization regulations of non-conforming signs.

Review development controls to ensure that they require appropriate screening of public utilities, dumpsters, rooftop equipment, etc.

Develop a marketing campaign to promote the advantages and benefits of living, working, visiting, or doing business in the Village.

Improve communication with residents in an effort to increase awareness of, and participation in, programs, services and events within the Village.

Improve and maintain relationships with the press and other media.

Economic Development

Goal 1

Prioritize improvements to existing areas and developments including adaptive reuse and redevelopment.

Objectives

Continue to use TIF as a means of fostering redevelopment along Ogden Avenue and Downtown, and explore the use of TIF and other development incentives for site-specific redevelopment in other parts of the Village.

Promote the use of tax credit incentives and other grant programs to fund renovation and expansion.

Identify resources for the maintenance of the Village's physical facilities including buildings, properties, and infrastructure.

Identify additional small business assistance programs to stabilize and improve conditions for existing businesses.

Renovate or redevelop aging shopping centers and commercial areas in order to maximize their contribution to the Village's tax base.

Enhance the appearance of commercial districts to attract businesses and customers, particularly Downtown, Fairview Avenue and Ogden Avenue.

Improve commercial building design and development controls by developing and utilizing Design and Development Guidelines and other tools.

Accommodate renovation and redevelopment through an expedient yet thorough permitting process.

Goal 2

Work with the Village's economic development partners to maintain and strengthen the Village's diverse tax base through the attraction, retention and expansion of businesses in the Village.

Objectives

Support the Downers Grove Area Chamber of Commerce and Industry, the Downers Grove Economic Development Corporation and the Downers Grove Downtown Management Corporation in their efforts to attract, market, and promote local businesses.

Support the evolution of the Downers Grove Area Chamber of Commerce and Industry, the Downers Grove Economic Development Corporation and the Downers Grove Downtown Management Corporation to meet challenges and take advantage of new and emerging opportunities.

Coordinate with the Downers Grove Economic Development Corporation and the Downers Grove Area Chamber of Commerce and Industry to organize a task force whose mission is to identify opportunities to reduce the cost of doing business in Downers Grove in order to enhance the Village's competitiveness.

Continue to support the Economic Development Corporation's efforts to market Downers Grove as a community of diverse businesses whose presence enhances the community's reputation as a place to live and work.

Promote the Village's commercial corridors and Downtown through joint marketing efforts, community events, and district identification signage.

Develop and implement a strategic marketing and recruitment plan for targeted businesses and store types.

Coordinate planning and economic development activities in a manner which provides regular opportunities for contact between business and development interests within the Village.

Seek an appropriate mix of commercial retail, commercial service, office and industrial uses throughout the Village

Maximize retail sales tax-generating uses, where appropriate, by concentrating retailers in Downtown and the Village's commercial corridors.

Seek opportunities for new employment growth through the retention and expansion of existing employers.

Ensure that new development pays its fair share of public facilities and service costs, which are attributable to the demand for additional facilities or services as a result of new development.

Village Services and Administration

Goal

Continue to ensure high-quality and efficient services are provided to residents and businesses through a well-organized, and participatory support system allowing both neighborhoods and businesses to thrive.

Objectives

Work with appropriate departments, agencies and community service providers to provide reliable infrastructure and quality services to the residents and businesses within the community including fire protection, police protection, electricity (power and substation locations), water supply and distribution, sanitary sewers, and telecommunications.

Create and publish an alternatives analysis that identifies the costs and benefits of multiple Village Hall and Police Station facility scenarios.

Coordinate plan review activities of new development proposals with appropriate public agencies and departments such as the Fire Department, School Districts, and Park District.

Maintain regular communication with agencies such as Metra, Pace, Regional Transportation Authority, Burlington Northern Santa Fe Railway, DuPage County, Illinois Department of Transportation (IDOT), Good Samaritan Hospital, Midwestern University and others to advance better coordination regarding projects on their properties or within their jurisdiction.

Establish a process for the regular review and update of the Village's Zoning Ordinance and Comprehensive Plan to appropriately meet the changing needs of the community.

Support the implementation of TCD3's Principal Recommendation: establishing a means for enhanced communication, enhanced coordination, and enhanced cooperation to foster a more responsive local government with an on-going framework to address localized issues with neighborhoods and businesses.

Continue to utilize the "community on-line mapping tool" introduced during the TCD3 process to gather public input on future planning issues and projects.

Coordinate with adjacent communities, including Darien, Glen Ellyn, Lisle, Lombard, Oak Brook, Westmont, and Woodridge, area townships and DuPage County, to assist in realizing mutual objectives and addressing issues such as traffic that transcend municipal boundaries.
