FISCAL IMPACT

UPDATE & RECOMMENDATION

This item was discussed at the December 4, 2012 Village Council meeting. The Council asked for additional information regarding the bid amount, as well as the potential to extend to a five-year contract. The low bidder, D. Ryan, has performed parkway trimming work in the Village in the past and is very familiar with the condition of the Village's tree stock. When asked why they submitted this price staff was told that they wanted the contract and were willing to be competitive to be the successful, low bidder. This contract could not be extended without canceling the contract and rebidding it with a five-year term. Staff recommends approval on the December 11, 2012 Consent Agenda.

BACKGROUND

The purpose of parkway tree pruning is to improve tree structure, increase resident satisfaction, enhance tree vigor, increase aesthetic appeal, reduce wind damage, provide adequate clearance, and maintain safe conditions in the right-of-way. The optimum tree pruning cycle is to have each parkway tree pruned once in five years. Since FY07, the Village has been implementing a five year pruning cycle (the Village had been operating on an eight year cycle prior to FY07). Areas scheduled for pruning are shown on the attached maps. Areas on the 2013 map had the highest number of resident calls for pruning requests and branch failures in the past year. Now that a five year pruning cycle is in place, staff has noticed more uniformity in tree health and appearance throughout the Village.

A Call for Bids for parkway tree pruning services was published in October 2012 in accordance with the Village's Purchasing Policy. Bidders were asked to provide prices for three years. The bids received are summarized in the following table:

Service Provider	Total Bid 2013	Total Bid 2014	Total Bid 2015
-------------------------	-----------------------	-----------------------	-----------------------

D. Ryan Tree & Landscape LLC	\$103,080.00	\$101,010.00	\$99,000.00
Kramer Tree Specialists, Inc.	\$129,535.00	\$120,862.50	\$126,530.00
Winkler's Tree & Landscaping, Inc.	\$154,485.00	\$144,731.55	\$151,964.80
Homer Tree Care, Inc.	\$160,770.00	\$152,265.00	\$151,859.40
Nature's Tree DBA Autumn Tree	\$209,170.00	\$199,970.00	\$198,320.00
The Davey Tree Expert Company	\$401,225.00	\$390,225.00	\$382,800.00
Asplundh Tree Expert Co.	\$781,928.30	\$812,790.45	\$812,968.20

The lowest responsive and responsible bidder is D. Ryan Tree & Landscape LLC of DeKalb, Illinois. Their municipal references are all positive. This contract will be their third pruning contract with Downers Grove (FY09 was their first and then a 3-year contract for 2010, 2011, 2012). Staff is satisfied that D. Ryan Tree & Landscape LLC meets the Village's specifications and that their pruning work will be what is required for all three years. The contractor evaluation form for FY12 is attached.

III. DETAIL SPECIFICATIONS

A. Competitive Sealed Bidding

The Village of Downers Grove, an Illinois municipal corporation (hereinafter referred to as the "Village"), will receive sealed bids from Contractors for parkway tree pruning services identified in the solicitation. Bids must be received by the date and time specified.

B. Attendance Required at Pre-bid Conference:

For the purpose of familiarizing bidders with the project, answering questions, and issuing addenda as needed for clarification of the bidding documents, a mandatory pre-bid conference shall be held at the Downers Grove Public Works Facility, 5101 Walnut Avenue, Downers Grove, Illinois 60515, (630) 434-5460. Bids shall only be opened from Contractors present at the mandatory pre-bid conference. Date and time of the meeting are listed on the cover sheet.

C. Objective

This contract is for the pruning of parkway trees on the public right-of-way within the Village of Downers Grove. The specifications contained herein detail how pruning activities shall improve the appearance and height clearance of these trees. The funding source for this contract is the Village's General Fund, and this contract is not being performed in conjunction with a public works construction or demolition project.

D. Qualifications of Contractors

The Contractor shall be required before the award of any contract to show to the complete satisfaction of the Village Forester that it has the necessary facilities, ability, and resources to provide the services specified herein in a satisfactory manner. The Contractor shall be required to give past history and references in order to satisfy the Village Forester in regard to the Contractor's qualifications. The Village Forester shall make reasonable investigations deemed necessary and proper to determine the ability of the Contractor to perform the work. The Village Forester reserves the right to reject any bid if the evidence submitted by, or investigation of, the Contractor fails to satisfy the Village Forester that the Contractor is properly qualified to carry out the obligations of the contract and to complete the work described herein. In addition to those requirements set forth in Section 10.1 above, evaluation of the Contractor's qualifications shall include:

1. The ability, capacity, skill, and resources to perform the work or provide the service required.
2. The ability of the Contractor to perform the work or provide the service promptly or within the time specified, without delay or interference.
3. The character, integrity, reputation, judgment, experience, and efficiency of the Contractor.

Village of Downers Grove

5. The status of Tree Care Industry Association (TCIA) Accreditation. TCIA Accreditation shall be used as a tiebreaker for instances when submitted bid prices and all other factors are equal.

E. Bidder Investigations

Before submitting a bid, each Contractor shall make all investigations and examinations necessary to ascertain all site conditions and requirements affecting the full performance of the contract and to verify any representations made by the Village Forester upon which the Contractor will rely. If the Contractor receives an award as a result of their bid submission, failure to have made such investigations and examinations will in no way relieve the Contractor from their obligations to comply in every detail with all provisions and requirements of the contract documents. Nor will the Village accept a plea of ignorance of such conditions and requirements as a basis for any claim whatsoever by the Contractor for additional compensation.

F. Quantities

Whenever a bid is sought for services, the quantities shall be construed as estimates for the purpose of obtaining unit prices unless otherwise stated. The Village reserves the right to increase or decrease the stated quantities, adjust pruning section boundaries, and switch pruning section priorities.

G. Award of Contract:

The Village Forester shall review the submitted bids and shall rank the submitted bids by contract activity forecast (the sum total of unit price multiplied by the quantity of trees). If the submitted unit price and the calculated extension price on the bid form are at variance, the unit price shall prevail. Additional information including work history, references, and TCIA accreditation shall be reviewed as listed in Section D - Qualifications of Contractors.

The award shall be made to the lowest responsive and responsible bidder (one Contractor) for all sections per year. The Village shall select the bid which is the most advantageous to the Village. Depending upon budget, the Village Forester may reduce the number of trees in all or part of sections in order to meet forestry goals. A reduction will involve shrinking the boundaries of a section.

H. Term of Contract:

In accordance with terms mentioned in Section 40.1 above, the contract term shall be three (3) complete calendar years starting January 1 of 2013 and ending December 31 of 2015.

L. Pruning Specifications

1. Purpose and Pruning Procedures

- a. All pruning shall follow the *ANSI A300 (Part 1) - 2008 Pruning Standard* and the *ISA's Best Management Practices: Tree Pruning (2008)* for the purpose of crown cleaning, crown thinning, crown raising, and structure development.
- b. All pruning shall improve the appearance of the trees, maintaining the crown shape and symmetry typical of the species at its given size and age with an emphasis on the following:
 1. Crown cleaning to remove all dead, diseased, detached and broken branches. This shall apply to all the above described branches and stubs greater than ½" (half inch) in diameter.
 2. Crown thinning to selectively remove live branches to reduce crown density. Branches to be thinned shall be ½" (half inch) diameter and greater. Thinning cuts shall remove crowded and low vigor branches. Thinning shall increase light penetration and air movement through the crown. Thinning shall also remove suckers from the base of the tree and some watersprouts on the interior. After crown thinning, tree branches shall have foliage and mechanical stress evenly distributed along a branch and throughout the crown. Not more than one-fourth of the crown shall be removed from mature trees.
 3. Crown raising to remove lower branches where practical (dependent on tree size) to obtain an eventual full foliage height clearance of fourteen (14) feet on the street side of the tree. All work shall always maintain the crown shape and symmetry typical of the species being pruned, and shall balance the tree evenly. This raising should also allow an eventual clearance over the pedestrian walk of eight (8) feet. Pruning may include reduction cuts to shorten lower limbs or thinning cuts to lighten lower branch loads to achieve clearance if complete branch removal from the tree trunk is not practical.
 4. Pruning for structure to influence the orientation, spacing, growth rate, strength of attachment, and ultimate size of branches and stems. Particular attention is to be given to young trees (those less than 40 years old with diameters 6"-24") if a scaffold branch is large in diameter and competes with the leader, then this scaffold branch is to be reduced back to a lateral and/or thinned to obtain a balanced crown shape overall.
 5. Pruning to choose and develop a dominant leader. Competing stems and branches are to be subordinated (reduced in length) or removed, particularly if structurally weak "V" crotches occur along the main trunk or are developing within young tree crowns. Special attention shall be given to the effect reducing or removal of such branches will have on the ultimate form of the tree.
 6. Pruning for clearance such that branches clear houses, building rooftops, streetlights, and all traffic control devices by a minimum of fifteen (15) feet. Branches shall be pruned such that all traffic control devices (including but

Village of Downers Grove

not limited to traffic light signals, opticom cameras, STOP and Yield signs, speed limit signs, parking control signs) are visible to moving traffic.

2. Pruning Cuts and Tools

- a. All final cuts shall be "collar cuts" made sufficiently close to the trunk or parent limb, without cutting into the branch collar or leaving a protruding stub, so that closure can readily begin under normal conditions. The face of the "collar cut" or wound area shall be circular in form. "Flush" cuts to the main stem behind the branch collar that leave oval exposed wounds shall not be made. Cuts shall be made such that all wound sides are even edged and do not leave "dog ear" ridges on one side or another. Clean cuts shall be made at all times without leaving any stubs.
- b. All limbs to be removed shall be cut in such a manner so as to prevent any ripping or tearing of the wood or bark on the parent or remaining stem. Large limbs shall be cut using the three-cut pruning method. All limbs shall be brought to the ground in such a manner as to prevent any damage to real or personal property, publicly or privately owned.
- c. Proper tools for pruning shall be used for each cut. Blades of each tool, including hand pruners, pole saws, hand saws, and chain saws, shall be placed on each branch to obtain the proper pruning cut. This shall be done in a way that will not cut, rip, or harm adjacent bark areas.
- d. No person working in trees shall use shoes with spikes, or any other footwear, which will, in the opinion of the Village Forester, injure the tree being pruned. At no time shall any person working in trees for pruning purposes, wear spurs or climbing irons.

3. Pruning of Elm

All American elms (*Ulmus americana*) or other elms susceptible to Dutch Elm Disease shall be pruned by April 1st of each year.

4. Pruning of Trees Near Power Wires

Trees which have been disfigured due to ComEd pruning for power line clearance shall only be pruned for height clearance from the ground, clearance from buildings, and removal of structurally weak branches or deadwood under this contract.

M. Inspections for Emerald Ash Borer

In that ash trees are included in the contract, pruned ash limbs, ash branches and ash tree trunks are to be inspected for the presence of Emerald Ash Borer (EAB) beetle activity. Ash limbs and branches are to be made available for Village staff to inspect from time to time before being chipped. The Contractor shall notify the Village Forester if any EAB larvae, galleries or beetles are found.

N. Site Appearance and Clean-Up

Pruned limbs and branches temporarily placed in the parkway area shall be placed in such a manner as to eliminate any obstruction to motor vehicles and pedestrians.

Village of Downers Grove

The Contractor shall clean up the site and remove and dispose of all debris at the end of each day's operation. Site cleanup shall include removal of sawdust, small twigs, chips, leaves, trunks and limbs from the street, curb, parkway, sidewalk, private lawns and driveways with the appropriate tools for the job. The site shall be returned to the same state it existed in prior to the pruning work. Under no circumstances shall any materials be allowed to lie on the parkway overnight.

As pruning may occur during or after snow events, some debris may filter down through the snow and may not be immediately accessible for clean up. In these instances, it is the responsibility of the Contractor to re-clean and rake up debris in these areas within 2 to 3 days after the snow melts. No extra payment shall be made for this clean up work.

O. Wood and Chip/Grinding Debris Disposal:

Disposal of wood chips and grinding debris generated by work described within this contract shall be the responsibility of the Contractor. The Contractor may deliver chips to the homes of Village residents as requested by the residents without charge, at a time convenient to the Contractor. Chips shall be left only on private property and not on the parkway or in the street. Any logs requested by the residents shall be given free of charge and shall not be from diseased trees. Logs left at the homeowner's request must be on the resident's property and not the parkway. Any logs from elm trees must have the bark removed.

P. Damage to Public or Private Property

Should any damage to private or public property occur as a result of the service performed or work done by the Contractor, the Contractor shall immediately notify the Village Forester or other Village representative of such damage. Any correction of damage shall be resolved within ten (10) days after damage occurs. Should the damage not be rectified within the time frame agreed upon or to the satisfaction of the Village Forester, the Village reserves the right to repair or replace that which was damaged and assess the Contractor such costs as may be reasonable and related to damage caused by the Contractor, and deduct these costs from any payment due the Contractor.

Q. Protection of Overhead Utilities

Tree pruning operations may be conducted in areas where overhead electric, telephone, and cable television facilities exist. The Contractor shall protect all utilities from damage, shall immediately contact the appropriate utility if damage should occur, and shall be responsible for all claims for damage due to their operation. The Contractor shall make arrangements with the utility for removal of all necessary limbs and branches that may conflict with or create a hazard in conducting the operations of this contract. If the Contractor has properly contacted the utility in sufficient time to arrange for the required work by the utility, delays encountered by the Contractor in waiting for the utility to complete its work shall not be the responsibility of the Contractor.

R. Contractor Personnel and Equipment

The Contractor shall supply all material, equipment and personnel necessary to complete the work specified. The Contractor shall rent equipment as needed to cover any equipment

Village of Downers Grove

breakdowns that would cause this contract to not be completed in the allotted time period. All vehicles and attached equipment shall have the Contractor's name in a visible location to avoid possible parking tickets. Personal vehicles shall have the name in the window. All vehicles and equipment shall abide by the standards listed in the Traffic Control section. All vehicles and equipment shall have all the appropriate items to avoid damage to public and private property (example – boards or pads for outriggers to avoid depressions, etc...).

All individuals shall be familiar with the pruning specifications identified in this document and shall be experienced in pruning operations. Competent individuals and not those in “training” shall perform actual pruning. The Village Forester or other Village representative shall have, throughout the life of the contract, the right of reasonable rejection and approval of staff assigned to the work by the Contractor. If the Village Forester or other Village representative rejects staff, the Contractor must provide replacement staff satisfactory to the Village Forester or other Village representative in a timely manner and at no additional cost to the Village. The day-to-day supervision and control of the Contractor's employees is the responsibility solely of the Contractor.

On a daily basis, the minimum number of individuals on the pruning crew shall be four (4). Work crews may be split to work on different streets but a minimum of one English speaking supervisor shall be at each location at all times.

S. Work Crew Supervision

The Contractor shall provide qualified supervision of each crew at all times while working under this contract. Each supervisor shall be fluent in English and be authorized by the Contractor to accept and act upon all directives issued by the Village Forester or other Village representative.

T. Certified Arborist

At least one individual shall be on the job site at all times who has passed the International Society of Arboriculture (ISA) arborist certification exam and received a Certified Arborist certificate prior to the bid opening date listed on the cover sheet. Their name(s) and certification number(s) must be included in the bid document to be considered for this project, and listed on the ISA website at <http://www.isa-arbor.com>. Any change in the status of the Certified Arborist individual(s) during the life of this contract must be reported to the Village Forester at the time of occurrence. Failure to have a Certified Arborist on site at all times shall result in termination of the contract.

U. Starting and Completion Requirements

Work may begin on the first Monday in January of a given year, or at a time mutually agreed upon by the Contractor and the Village Forester. Work must commence no later than January 15 of a given year. All work shall be completed prior to April 30 of a given year. Fifty percent (50%) of the dollar value of the contract shall be completed by February 28 of a given year, as an indication that the Contractor is satisfactorily progressing toward completion of the contract. Once work has begun, the Contractor shall work successive workdays as is practical until the contract has been completed.

Village of Downers Grove

Contractor personnel exposed to public vehicular traffic shall wear warning vests or other suitable garments marked with or made of reflectorized material. At a minimum, this includes ANSI Class 2 garments.

X. **Traffic Control**

The Contractor shall conduct its operations in a manner that will not interrupt pedestrian or vehicle traffic except as approved by the Village. The work area shall be confined to the smallest area possible to allow maximum use of the street or sidewalk and to minimize any hazard to traffic or pedestrians. The Contractor shall provide adequate traffic control for work area protection in compliance with the Federal Highway Administration *Manual on Uniform Traffic Control Devices for Streets and Highways* (MUTCD) current edition, the State of Illinois *Illinois Vehicle Code*, the Illinois Department of Transportation *Highway Standards*, and the Illinois Department of Transportation *Handbook of Traffic Engineering Practice for Small Cities*. All personnel, signs, barricades, and any other items or devices necessary shall be provided by the Contractor. The Village shall make no separate payment for this work. Traffic control shall include but not be limited to the following:

2. Whenever possible the work site on a two lane street or highway shall be confined to one traffic lane leaving the opposite lane open to traffic.

4. Work vehicles shall have the flasher light lit but not as a substitute for any traffic control devices for work area protection that may be necessary.
5. Under certain field conditions such as hills and curves, the spacing of the traffic control devices shall be adjusted as necessary.

Village of Downers Grove

7. Cones used as daytime channeling devices shall be at least 18 inches tall, conical or tubular in shape with a broadened base, and orange in color. Cones shall be spaced equal in feet to the posted speed limit or closer along the taper length.
8. Channeling devices such as cones shall be positioned to provide adequate taper length before the work area to guide traffic through the work area. Tapers approaching the work zone shall be:

The Contractor shall be responsible to submit this weekly "Pruning Checklist" report form at the end of each week indicating what work has been completed that week. The submitted report form will be inspected for compliance with the specifications for pruning. Incomplete or unsatisfactory pruning or missed trees will be noted. Report forms will then be used to verify and approve payment for services.

The Contractor shall report any structural weakness, decayed trunk or branches, split crotches, or when removal is the best option instead of pruning on the provided report forms.

Z. Inspection of Work

All work shall be completed to the satisfaction of the Village Forester, or other Village representative, and same shall resolve any questions as to proper procedures or quality of workmanship.

AA. Unsatisfactory or Unsafe Work

If, at any time during the contract, the service performed or work done by the Contractor is considered by the Village to create a condition that threatens the health, safety, or welfare of the community, the Contractor shall, on being notified either by written or oral notice, immediately correct such deficient service or work. In the event the Contractor fails, after notice, to correct the deficient service or work immediately, the Village shall have the right

Village of Downers Grove

to order correction of the deficiency by separate contract or with its own resources at the expense of the Contractor. The Village reserves the right to terminate the whole or any part of this contract in the event the awarded Contractor fails to perform any of the provisions of this contract.

AB. Costs and Basis of Payment

The Contractor affirms and states that the prices submitted herein constitute the total cost to the Village for all work involved in the respective items. This cost also includes all insurance, bonds, royalties, transportation charges, use of all tools and equipment, superintendence, overhead expense, inspection costs, all profits and all other work, services and conditions necessarily involved in the work to be done in accordance with the requirements of the Contract Documents considered severally and collectively.

The Contractor shall be paid for the work described herein on a per tree basis depending on the tree's diameter and the unit price for a given tree diameter. The tree diameter shall be measured with a standard measuring tape at a point four and one-half (4.5) feet above the highest ground level at the tree. In cases of low-branching trees with a crotch that is four and one-half (4.5) feet or lower from the ground, measurement shall be taken below the lowest branch. If a tree becomes multi-stemmed below one (1) foot, each stem shall be measured independently and shall be paid as a single tree if stems number 3 or less, and as 2 trees if stems number more than 3.

Partial payment shall be made to the Contractor as work progresses but, in no case, shall payment be made on trees not completed to the satisfaction of the Village Forester and in accordance with these specifications and accepted arboricultural practices.

The contract unit prices shall remain firm for the contract term, or until all pruning work is complete.

The Awarded Contractor shall send all invoices to the Village Forester. The Village shall pay the Contractor after receipt of a correct invoice for reasonable work allocable to the contract or after the date of acceptance of work that meets the contract requirements, whichever occurs later.

AC. Liquidated Damages

The Village and Contractor recognize that time and work quality is of the essence to this contract. They also recognize the delays, expense and difficulties involved in a legal or arbitration proceeding. Instead, the Contractor shall be liable and shall pay the Village as liquidated damages the amount shown in the following schedule. The liquidated damage amount specified will accrue and be assessed until final completion of the total physical work of the contract. The Village shall deduct these liquidated damages from any monies due or to become due to the Contractor for breach of this contract.
