# Project Approach

It is V3 Companies understanding that the Village of Downers Grove requires the services of a Licensed Professional Land Surveying Firm to topographically survey various roadways throughout the village for various municipal projects.

As described within the request for proposal, the Village of Downers Grove requires that the following elements be researched, measured in the field, proven, and accurately mapped and drafted to serve as a basis for future design or improvement plans.

Topographic Surveying shall include:

- Reference lines parallel to right-of-way lines - Base lines stationed south to north and west to east shall be established.
- Existing centerline elevations shall be shown at low points, high points, other significant slope breaks, and at a maximum interval of twenty-five (25) feet.
- Field survey work encompassing the entire right-of-way width of streets - Where the primary right-of-way surveys are shown crossing other rights-of-way which are not to be fully surveyed, the right-of-way crossed by the primary survey shall be surveyed for a length of 100 feet outside the primary right-of-way line extended, in both directions, to show the complete intersection. The survey shall also include a 15-foot width of the private property adjoining each side of the right-of-way which shall include all building faces, garage entrance locations, top of foundation grades, etc, regardless of distance from the right-of-way. Right-of-way monumentation recovered shall be clearly indicated on the plan sheets. The establishing of missing monumentation (property corners) is NOT required and shall not be performed.
- All survey work shall use NAVD 88 for Vertical Datum and USGS NAD 83 for Horizontal Datum.
- Copies of all field notes and 3D electronic base maps of the identified segments in AutoCAD 2013 – Civil3D v. 2010 or later (including all support, shape files and line types) shall be supplied to the Village. CAD drawings shall be created using legitimate AutoCAD software (by Autodesk) and shall not be converted from another format or CAD software (e.g. no MicroStation conversions) unless specifically approved in writing by the Assistant Director of Public Works Engineering. In the event that the Village does allow a drawing conversion, any clean up required shall be provided by Consultant at no additional cost to the Village, and shall be at the discretion of the village.
- Consultant shall locate of all landscape materials; i.e., bushes, trees (2" diameter and larger), flower beds, etc. Tree sizes (2" diameter and larger) shall be measured four and one-half feet (diameter breast height) above the highest ground level at base of tree. Locations of landscape timbers, flagstone paths or walls, brick pavers, etc. shall be noted.
- Contour lines plotted throughout the project with high points or low points shall be indicated between similar contours.
- Field locations (horizontal dimensions) of all buried/marked utilities; i.e., gas, electrical and telephone, and sewers shall be shown. No digging for elevation verification of utilities is required.
- Detailed topography with one-foot contour intervals throughout the described project area, with elevations noted for key changes in grade, as well as high or low points between contours of the same elevation shall be shown.
- Locations of all above ground structures; i.e., mailboxes, utility poles, driveway, culvert headwalls, culverts, sidewalks, sump pump outlets, etc., shall be shown.
- IDOT standard drafting symbols and line weights shall be utilized, and drawings shall also indicate lot line intersections, lot numbers and common addresses.
- All drawings shall be compatible drawing files (AutoCAD Civil3D v. 2010 or later) copied on compact disk or other media as approved by the Village. The Village will provide title block for drawing files upon proposer's request.

## Project Approach

- Plan views shall be shown at a scale of  $1 = 20$ .
- Consultant shall obtain and include on final plans rim and invert elevations, pipe and conduit sizes of all culverts, manholes, inlets, valve vaults, etc., and elevations of roadway and driveway pavement over culverts.
- Location of all existing pavement striping and symbols shall be shown.
- Other requirements described in the Scope or Work shall also be adhered to.
- The field survey and drafting services shall be completed by the date requested. No additional working days will be granted by the Village for any reason, in that sufficient time is provided to offset any working days lost due to adverse weather preventing work, or site conditions due to recent weather preventing work.
- Work on the project shall begin, weather permitting, within five (5) days after receipt of the Notice to Proceed from the Village, to assure the completion and delivery of all field survey and drafting by the due date mentioned in the RFP.
- If selected, V3 shall furnish to the Village all project drawings, files, notes, and documents in an electronic format on Compact Disc's suitable for making prints and copies of reports and shall become the property of the Village.

### *Approach to Organizing the work:*

Once authorized to proceed, V3 shall coordinate with the village and collect any and all plats/atlas that will assist the survey crew. J.U.L.I.E. shall also be contacted to assist with the atlas information. The survey crew shall first set the control for all roadways. Control shall be tied into the required datums. The survey crew shall topo the roadways. Existing right-of-way monumentation shall be used to set the parallel base lines. Office staff shall then complete the cad work. Once reviewed by the project manager, the information shall be provided to the village.
