

VILLAGE OF DOWNERS GROVE
REPORT FOR THE VILLAGE COUNCIL MEETING
FEBRUARY 11, 2014 AGENDA

SUBJECT:	TYPE:	SUBMITTED BY:
Wireless Alarms	Resolution ✓ Ordinance ✓ Motion Discussion Only	James Jackson, Fire Chief

SYNOPSIS

A motion is requested to approve the purchase and installation of equipment from Total Fire and Safety, Inc. to upgrade the Village's alarm panel to receive wireless fire alarms in the amount of \$61,326.01 and four years of maintenance at \$6,160 per year after the first year. The proposed contract is to include receiver equipment for the Village Operating Center (VOC), 13 radios for transmitting signals from Village buildings, virtual remote capability for the Fire Prevention Bureau and factory training.

An ordinance has been prepared authorizing alarm users the option to install a wireless radio system.

STRATEGIC PLAN ALIGNMENT

The strategic goals for 2011-2018 include *Exceptional Municipal Services. Install Wireless Alarm System* is a high-priority action item.

FISCAL IMPACT

The initial cost of the wireless radio system to the Village is \$61,326.01. The FY14 General Fund budget includes \$40,000 for this project and sufficient budget authority exists in the Equipment Replacement Fund for the remainder of the purchase. The Village will recoup the costs of purchasing and installing the system through fees paid by the user. Businesses that opt to install the wireless radio system will pay an annual fee of \$278, which is an increase of \$60 per year. The Village will pay an annual maintenance fee of \$6,160 for the system and wireless radios after the first year of the agreement.

UPDATE & RECOMMENDATION

This item was discussed at the February 4, 2014 Village Council meeting. At the meeting, the Council asked for additional information on false alarms related to phone lines. There were 66 false alarms directly related to phone lines in 2013. Staff recommends approval on the February 11, 2014 Active Agenda.

BACKGROUND

The Village owns and maintains a fire alarm monitoring systems and requires businesses to maintain a fire alarm that is monitored in the VOC. The purpose of the system is to alert the VOC when an alarm activates, signaling a fire or smoke condition at the business. Each business is required to have two telephone lines dedicated to the fire alarm system to transmit alarm activations. The Village currently monitors 894 alarms.

Businesses currently pay an annual monitoring fee of \$218 to the Village and pay monthly fees directly to the telephone company for the dedicated phone lines. The costs associated with the phone lines vary from business to business, but generally range from \$50-\$100 per month. A wireless radio transmitter is a more

reliable way to transmit alarm signals and will reduce false alarms and related Fire Department responses. Businesses that choose to upgrade to the wireless system will work directly with an installer of their choice; they will benefit from the reduction in monthly phone line costs.

The wireless alarm system has the following advantages:

- Cost savings to business owners in Downers Grove by eliminating phone lines
- Reduction in false and trouble alarm responses by the Fire Department and Village staff, resulting in more availability for emergency calls, reduction in risk and fuel savings
- Updated alarm monitoring equipment
- Elimination of manual tracking of problematic alarms by the Fire Prevention Bureau

The proposed system consists of one receiver and 13 radios for transmitting signals from Village buildings. The VOC will continue to receive alarm signals using the current analog system and the wireless system. Businesses will see savings as shown below.

System Fees	Current Costs (Annual)	Proposed Costs (Annual)
Monitoring Fee	\$218.00	\$278.00
Two Dedicated Telephone Lines (approximate cost)	\$600.00 – \$1,200.00	0.00
TOTAL	\$818.00 – \$1,418.00	\$278.00

A Request for Proposal (RFP) was developed in accordance with the Village’s Purchasing Policy. Four proposals were received within the required timeframe. After extensive research, staff determined that Total Fire and Safety, Inc. would best meet the needs of the Village and more effectively work within the business model sought by the committee. Article VI (Alarm Code) of Chapter 17 of the Municipal Code has been amended to reflect the option of continuing to remain with the current system or switching to the new wireless radio system.

III. DETAIL SPECIFICATIONS

PROJECT DESCRIPTION

Replacement of the Municipal Fire Alarm Monitoring System

General:

The Village of Downers Grove (VODG) is seeking proposals to upgrade its current fire alarm monitoring system with a radio alarm monitoring system network (the Network) that will meet the needs of both its current and future alarm connections. Specifically, the VODG is seeking proposals to allow its Network to also receive wireless alarm signals. The RFP submittals shall include the purchase, installation, on-going maintenance, and service of radio receiving equipment. Successful proponents shall provide proof of qualified installation and maintenance of either municipal and/or fire district radio network with at least 5 years experience installing radio networks.

Proposals shall include the cost of equipment, installation and maintenance of the Village equipment. Please direct all questions to Benjamin DeAnda Fire Prevention Division Chief at 630-434-5975.

Background:

Currently Downers Grove telecommunicators operate municipal alarm monitoring equipment, which allows alarm subscribers to connect directly to the communications center for fire protection of their facilities. All subscribers within the Village currently are connected via a digital dialer 4 + 2 format or by Contact ID format. All alarms are connected at the Village dispatch center via an Ademco 8000 to the Security Information Systems (SIS) software which translates into the location of the fire alarm. The Village currently monitors approximately 900 alarm subscribers and estimates a steady increase to 1200 in the next 5 years. VODG would like to give subscribers the option to connect to the alarm monitoring equipment wirelessly.

7788F/7744F Series

Wireless Fire Alarm Communicators for AES-IntelliNet

AES IntelliNet
CORPORATION | For Alarm Monitoring

Model 7788F

Advanced Wireless Alarm Monitoring

The AES-IntelliNet mesh radio network offers unmatched reliability and speed in delivering wireless alarm signals to a central station without third party fees or reliance on networks owned by companies outside the security and fire alarm industry. AES-7788F/7744F Series Smart Subscriber Transceivers provide the wireless communication link between the fire alarm panel and the central station receiver. The 7788F/7744F Series is ideal for most commercial fire alarm applications. Each 7788F/7744F Series Subscriber is housed in a full sized, red, locked, steel cabinet and supports a range of alarm panel inputs including EOL fire, EOL supervised, and direct voltage from the panel (non-fire applications).

Supervised Operation

AES Smart Subscribers offer fully supervised operation that includes monitoring of operating power (both primary AC power and battery backup) and the connection to the radio network. Each Subscriber "checks in" with the AES central station receiver at least once every 24 hours. The supervision check in time can be set for as often as once per minute and, because the central station owns the wireless network, there is no additional cost for air time to transmit supervisory signals.

Full Data Reporting from Alarm Panel Digital Dialer

Models 7788F-ULP and 7744F-ULP come equipped with an IntelliPro Fire Full Data Module (AES-7794) which enables reporting of full alarm data captured from the fire alarm panel's digital communicator. IntelliPro Fire supports most alarm communication formats including Contact ID, Pulse, as well as Bosch Modem IIe and Modem IIIa2.

Features – All models

- UL Listed commercial fire alarm applications.
- Meets NFPA 72 requirements
- Direct reporting to AES receiver across IntelliNet wireless mesh network
- Each Subscriber acts as transmitter/receiver/repeater
- Simple and fast activation on network
- On board status LEDs for easy set up
- 8 programmable zone inputs – 7788F
- 4 programmable zone inputs and 4 reverse polarity inputs – 7744F
- Easy programming via AES handheld programmer or PC
- Rugged metal housing ideal for any commercial fire alarm application

Models 7788F/7744F-ULP with IntelliPro Fire also includes

- IntelliPro Fire transmits full alarm data from virtually any fire alarm panel digital communicator
- Alarm format support for Contact ID, Pulse, or Bosch Modem IIe or Modem IIIa2
- Easy installation in AES subscriber
- Operates in applications with or without a phone line
