BACKGROUND

The Village maintains a 2007 Volvo L90F end loader that is used to provide snow removal and other Public Works services. It is one of three end loaders in the Village fleet. This piece of equipment has been out-of-service since February 6 due to a broken rear axle. McAllister Equipment Company is the only authorized Volvo dealer in the region qualified to perform the required repairs.

McAllister Equipment Company estimates the repair cost at \$35,854.10. The repair of the rear axle assembly must be completed for this equipment to properly function. Staff has reviewed the age, hours logged on the machine, and condition and determined that it is cost effective to perform these repairs.

This quote consist of removal and tear down of rear axle ass'y. The damage is major and would recommend a reman rear axle ass'y. The spider and side gears both came apart, see pictures. The rear axle ass'y can be rebuilt but the reman unit is all new and improved design. Replace rear axle ass'y with reman unit.
