1.4 Pre-construction Services

Ascertain the standard practices of the Village and become familiar with the contract documents, which will include the contract between the Village and the Contractor and any supplements thereto, the Standard Specifications and current addenda thereto, the plans for the construction project and approved changes thereto.

1. Prepare Conformed Bid Documents: Prior to the Village's issuance of a Notice to Proceed for the work, the Construction Engineer shall conform the drawings and specifications to include all modifications to the documents that were included in any addenda issued to bidders. The Village will print copies as necessary for use by the construction contractor and the Village.
2. Prepare project files, Quantity and IDR Books: The Construction Engineer will prepare project files approved by the Village Engineer utilizing Village forms or IDOT forms as may be required, and make copies of Pay Request and Change Order Forms, and Quantity Book and IDR templates.

1.5 Construction Services

This task includes providing Construction Observation services during construction, including those tasks listed below. The Construction Engineer may be required to provide any/all of the on-site resident engineering services as explicitly specified below.

1. Provide on-site representation to accurately document and record by measure and/or computation, all quantities of materials used on the construction project in accordance with the specifications and standard practice of the Village recorded in a Quantity Book (provided by Village). Records of such measurements and computations shall include construction surveys, construction layout and staking measurements, preparing and submitting daily inspection reports (provided by Village), and quality control reporting throughout the entire construction process as the Village's representative. The aforementioned items will be kept in permanent form and become part of the construction project records.

Note: The Village's Project Manager will make available the necessary plans, specifications, copy of the contract, and other guides and instructions to permit the Construction Engineer to accomplish their prescribed duties to the same standards required of the Village's own forces.

2. Construction Schedule: Monitor the development and maintenance of the construction schedule by the Contractor, and maintain and update the overall project schedule as necessary.
3. Weekly Meetings: Conduct regular weekly meetings with the Contractor and other appropriate project team members including, without limitation, the Village's Project Manager, to coordinate and maintain the construction process.
4. RFIs (Requests for Information): Review and coordinate all RFIs from the Contractor for

timely response. Review and monitor all supplemental instructions and directives for potential impact on the Project budget and schedule.

5. Pay Requests: Generate all applications for payment (on form provided by Village), perform all necessary computations, receive all certified payroll and waivers of lien, and make recommendation to the Village for payment.
6. Reports: Provide a monthly update report (1-2 Pages) to the Village that summarizes the status of the Project costs and schedule.
7. Change Orders: Review change orders submitted by the Contractor(s) for appropriateness and accuracy for signature by the Construction Engineer and recommend acceptance and/or payment of such changes to the Village.
8. Submittals: Review contractor submittals for conformance to the contract documents and make recommendation to accept, accept as noted, reject, or resubmit.
9. Punch Lists: Develop with the Village's Project Manager and Contractor construction punch lists for all areas of the Project. Monitor implementation and completion of all punch list items.
10. Project Diary: Document and maintain all project records either electronically or by hand throughout the construction process in a Project Diary.
11. Advice and Assistance: Provide advice and assistance to the Village in resolving construction issues, claims, and disputes prior to the engagement of legal counsel (excluding legal advice).
12. Respond to Contractor Questions: Prepare responses to the contractor on behalf of the Village when a RFI is submitted to the Construction Engineer. The Construction Engineer shall log, respond, and maintain a file for each RFI response.
13. Prepare Design Clarifications: When, in the judgment of the Village, the intent of the design requires clarification, the Construction Engineer shall prepare sketches and/or written statements to clarify such intent.
14. Prepare Request for Change (RFC): For changes to the contract documents necessary because of unforeseen conditions, changes requested by the Village or changes necessary to incorporate a feature of the design, the Construction Engineer shall prepare drawings, sketches and/or specifications for the change in a RFC format selected by the Village. The RFC will be sent to the Contractor for preparation of a change order proposal.

The Construction Engineer shall then assist the Village in review of the Contractor's proposal and provide a recommendation.

15. Testing: Construction Engineer shall schedule geotechnical and material testing services

with the Village’s material testing consultant for tracking and obtaining all necessary certifications of materials used in the work.

Note: Sampling frequencies for inspection and testing will be as prescribed by the specifications and instruction furnished by the Village and no variation will be permitted except upon written order of the Village. The Village will require qualified QC/QA engineers and inspectors to be on the project site upon request by the Proposer, so that adequate sampling for inspection and testing can be performed in a timely manner on each contract item to determine acceptance of the work in compliance with the contract plans and specifications and the standard practices of the Village.

16. Record Drawings (a.k.a. as-builts): Coordinate with contractor on record drawings for all construction work completed until completion of the project and any other miscellaneous functions necessary for properly administering the contract documents. Redline record drawings shall be submitted to the Village and shall be reviewed and approved by the Village.

Note: All records shall be submitted to the Village’s Project Manager and become the property of the Village. All measurements, records, record drawings and final pay estimate calculations are due not later than four weeks after completion of construction.

17. Equipment, Transportation and Communication: Furnish and possess **on site**, all necessary field survey equipment (i.e. tripod, level, grade rod, 100’ tape, etc.) required for inspection of the Contractor’s work. Furnish own mode of transportation to and from project sites. Furnish own communication facilities (i.e. cell phones and/or two-way radios) and any safety equipment as required by the Village. These items will be considered “tools of the trade” and no additional compensation will be made for them.

18. Field Office: No field office is anticipated for this work. Construction Engineer shall provide his own vehicle for use in the field at all times.

1.6 Post Construction/Project Close-out Services
