Proposer agrees to pay the prevailing wage and require that all of its subcontractors pay prevailing wage to any laborers, workers or mechanics who perform work pursuant to this Contract or related subcontract. For applicable rates, go to the State of Illinois – Department of Labor website (www.state.il.us/agency/idol/rates/rates.HTM) and use the most current DuPage County rate. The Village reserves the right to check the pay stubs of the workers on the job. The Village further cautions that payment for any services rendered pursuant to this Contract may be predicated upon receipt of said records.

- 12.5 In the event that this is a construction project where Motor Fuel tax monies or state grant monies are used in the construction, maintenance and extension of municipal streets, traffic control signals, street lighting systems, storm sewers, pedestrian subways or overhead crossings, sidewalks and off-street parking facilities, and the like, the Village will require an Apprenticeship and Training Certification, attached after the Proposer's Certification.

If requested/required, SEECO can perform the tasks to meet IEPA requirements for Source Site Certification and Demolition Debris/ Uncontaminated Soil Fill Operation and provide a Professional Engineer's Certification of Commercial or Industrial sites (including on ROW sites) on IEPA LPC-663 or 662 Forms. These tasks would include due diligence for the property performed utilizing available IEPA databases to determine the site's proximity to, or location as, Potentially Impacted Property(ies). From the location scheduled for improvements representative soil samples would be collected and field screened for the presence of volatile organic vapors using a photo ionization detector (PID). Visual and olfactory senses would also be used to screen the soil samples for the presence of petroleum hydrocarbons. This information will be documented on the IEPA LPC-662 or 663 form, depending on whether it is a residential area or other. The soil probes utilized to obtain the samples would extend to approximately 3-5 feet below the existing surface and will be performed in the areas scheduled for spoil disposal.

Discrete, representative soil sample(s) determined by field observations to be the most conducive to transmitting potential contamination could be chemically analyzed by an Environmental Laboratory for some, if not all, but not limited to the following parameters: 8260 – VOCs, 8270- SVOCs, 8081/8082 - Pesticides and PCBs, 6010 (Total 8 RCRA Metals only - Ar, Ba, Cd, Cr, Pb, Se, Ag), 7470 - Mercury (Hg), BTEX, PNAs and pH.

If chemical analysis results indicate no contamination above TACO Tier 1 maximum allowable concentrations, then the soils tested would be assumed to be, to the best of our knowledge, clean, uncontaminated fill material. This information would be documented on the IEPA LPC-663 form. If test results indicate that the soils are contaminated above said objectives, we will consult with you regarding alternate means of disposal.

Based upon our experience with the Village of Downers Grove projects, we understand that testing services beyond the IDOT minimum requirements may be required and are able to comply with said requests.

Costs will be in accordance with the enclosed Schedule of Fees. Overtime rates of 1.35 times the base rate will be charged for hours in excess of eight hours (before 7:00 and after 3:30) per day and weekend hours. All field charges are portal to portal with a four hour minimum. Rates valid through 2015 construction season. SEECO's field representatives are represented by Local 150 of the Operating Engineers. Onsite cancellations are subject to a four hour minimum charge. Telephone cancellations after travel commences are subject to a minimum charge of three hours.

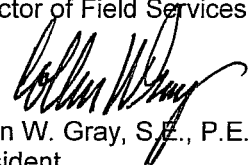

If there are any questions with regards to this proposal, I would be glad to discuss them with you. We are very interested in providing you with our services on this project and assure you of our utmost cooperation.

Respectfully submitted,

SEECO Consultants, Inc.
