**VILLAGE OF DOWNERS GROVE**  
**Report for the Village Council Meeting**  
**4/14/2015**

<b>SUBJECT:</b>	<b>SUBMITTED BY:</b>
St. Joseph's Creek Main Branch, Stream Corridor Assessment	Nan Newlon Director of Public Works

**SYNOPSIS**

A motion is requested to award a contract for St. Joseph's Creek Main Branch Stream Corridor Assessment to Christopher B. Burke Engineering, Ltd. (CBBEL), of Rosemont, Illinois in an amount of \$17,632.

**STRATEGIC PLAN ALIGNMENT**

The Goals for 2011 to 2018 identified *Top Quality Infrastructure*, and *Steward of Financial and Environmental Sustainability*.

**FISCAL IMPACT**

The FY15 budget includes \$100,000 for streambank improvements to St. Joseph's Creek Main Branch in the Stormwater Fund. Of that amount, \$20,000 was budgeted for this contract.

**RECOMMENDATION**

Approval on the April 14, 2015 consent agenda.

**BACKGROUND**

The purpose of this project is to study and identify areas of St. Joseph's Creek that have seen streambank erosion infestation by invasive species, blockages and any other deficiencies that may need repair or restoration. This area encompasses approximately five miles of the open creek channel, including tributaries, from Carpenter Street west to the Village limits near I-355. The report will include recommended options for remediation of identified problems and budget-level cost estimates for all recommended remedial activities. The report will be used to prioritize and budget improvements to the creek's conveyance and water quality, as well as assist staff in identifying potential grant opportunities for future stream improvements.

Five consultants were pre-qualified for stream corridor assessment services through a Request for Qualifications. Proposals for this work were solicited from the pre-qualified consultants, with all five firms responding. After reviewing the proposals, CBBEL was identified as the firm whose proposal best meets the needs of the Village. CBBEL has performed similar work for several other municipalities and agencies, including the Villages of Chicago Ridge and Rolling Meadows, and Kane County.

## **IV. DETAIL SPECIFICATIONS**

### **1. SCOPE OF SERVICES**

1.1 The Firm (Consultant) selected by the Village pursuant to this RFP is not authorized to perform work for the Village until a fully executed and authorized Agreement is in place.

#### 1.2 Project Description

St. Joseph's Creek Main Branch extends from the East Branch of the DuPage River to the confluence of St. Joseph's Creek North Branch and South Branch, east of the Village of Downers Grove Village Hall. Approximately five (5) miles of open creek channel, including major identified tributaries, exists within the limits of the Village of Downers Grove, extending from approximately I-355 to the large outfall structure just west of Carpenter Street. The Village is seeking a qualified consultant to provide a comprehensive assessment report of this creek system, identifying areas that have experienced bank erosion, infestation by invasive species (including but not limited to Japanese Knotweed and Japanese Stiltgrass), and any other deficiencies that may need repair or restoration. The report should include a discussion of general remedies recommended for repair or remediation of the found deficiencies, but location specific plans and specifications are not required.

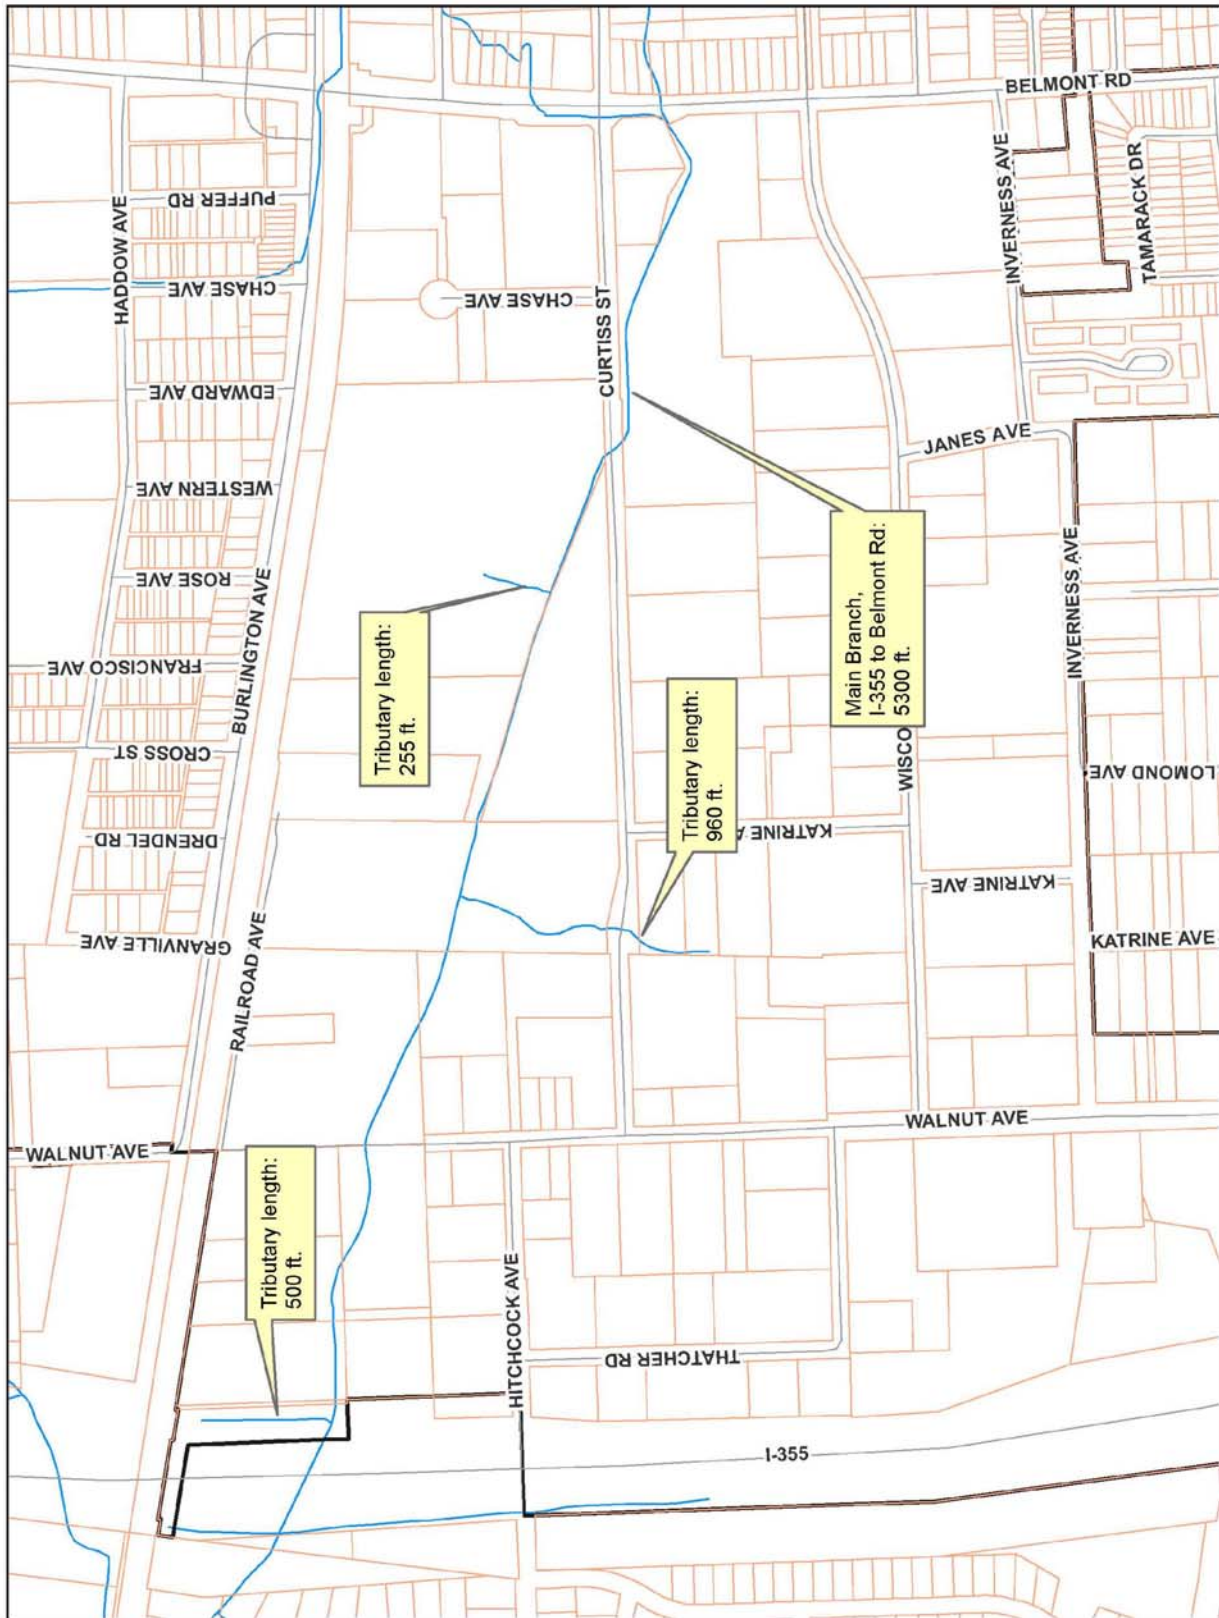

#### 1.3 Project Location

The limits of the project are defined as the creek channel and immediately adjacent overbank areas, extending from approximately the easterly ROW of I-355 to the large outfall structure just west of Carpenter Street, within the corporate limits of the Village of Downers Grove, Illinois. Project shall also include any open channel tributaries, both defined and undefined.

1.4 Scope and Schedule

It is anticipated that the scope of work may include, but may not be limited to, the following:

- a. Visual site inspection of identified open creek channels and overbank areas to the extent possible, including all five (5) miles of main channel and known tributaries as shown on the maps contained herein. **For purposes of establishing a not-to-exceed fee, Consultant shall add a contingency to include an additional one (1) mile of potentially unidentified tributaries that may need to be assessed. This will be paid on a per-foot basis of any tributaries that are discovered during the assessment, but which are not included in the known five (5) mile length.** It should be noted that much of this creek channel is on private property. If Consultant has difficulty gaining permission to access specific private properties, the Village will assist in obtaining the permission of the landowner to access as much of the creek as possible. However, certain areas may need to be done based on a visual inspection from the nearest accessible properties, aerial photos, etc.
- b. Consultant shall note any/all areas of bank erosion, invasive species, debris or log jams, beaver dams or other potentially harmful animal activity, and any other deficiency that is discovered during the site inspection. Consultant shall estimate lengths/quantities of each deficiency (in channel length, acres, etc. as appropriate) and shall depict approximate limits of same on aerial photographs (using GPS or field estimates based on existing landmarks).
- c. A preliminary draft report indicating consultant's initial findings and outlining general options for remediation.
- d. A final report incorporating, to the extent possible, input from Village Staff on the preliminary draft report. Budget-level cost estimates shall be provided for all suggested remedial activities.
- e. The Consultant shall furnish to the Village any/all final documents in an electronic format on CDs suitable for making prints and copies of reports as required in above, all of which shall become the property of the Village for its use. Supplemental photos, testing reports, etc, which may or may not be included in the final report, shall also be provided to the Village in digital format upon request. If required by FOIA laws or legal subpoena, consultant shall provide copies of all sketches, drawings, files, notes, calculations, survey data, photographs, etc, upon request.
- f. The selected Consultant shall begin work on the project within seven (7) calendar days after receipt of the Notice to Proceed from the Village and shall abide by the deliverable schedule in Section IV.3.2 of this RFP.

## PROJECT UNDERSTANDING/APPROACH

Christopher B. Burke Engineering, Ltd. (CBBEL) understands that much of St. Joseph's Creek within the project area is on private property and access is necessary to complete the evaluation. CBBEL will prepare a project postcard to notify residents and businesses (within the project area) of the stream assessment. Contact information will be provided on the postcard and assessment schedule. Residents that require more information or deny access can contact the Project Manager via phone or email. CBBEL will then work with the Village to request assistance with access.

CBBEL staff will complete a visual inspection of identified creek channels and overbank areas to the extent possible, including all five (5) miles of main channel and known tributaries as shown in the RFP. CBBEL also has added a contingency to include an additional mile of potentially unidentified tributaries that need to be assessed estimated on a per foot basis.

CBBEL will note any/all areas of bank erosion, invasive species, debris or log jams, beaver dams or other potentially harmful animal activity or deficiency during the site inspection. CBBEL will estimate lengths/quantities of each deficiency and shall depict approximate limits of same on aerial photographs using GPS or field estimates based on existing landmarks, describe and document (including photograph) erosional areas (slope failure and maintenance issues – outfall, pipes), and GPS erosion and invasive species locations.

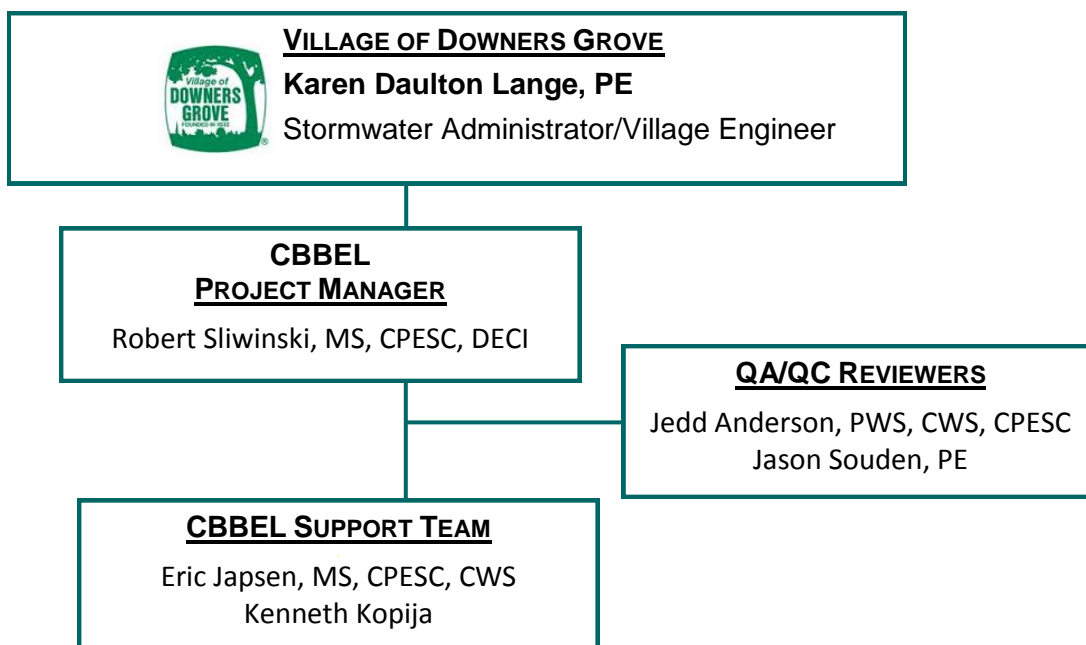

CBBEL will prepare a preliminary draft report presenting findings and outlining general options for remediation. CBBEL will:

- describe the stream corridor by segments describing all erosional areas and classify high and moderate priority erosional areas (the definition of high and moderate priority to be agreed upon by the Village). Low priority areas may also be included.
- prepare aerial photo exhibits (in full color) annotated with the stream centerline, stationing and color coded to depict erosional areas classified by slope conditions, maintenance and invasive species locations (see attached example).
- prepare practical general remedies for erosion restoration and probable costs.
- describe/show potential access locations for future restoration project.
- describe invasive species observed and control recommendations and costs.
- prepare color photo exhibits showing representative stream reaches and erosional areas, invasive species locations that correspond to each stream segment exhibit.
- prepare, if needed, a color tri-fold brochure that can be used for public education or grant applications.

CBBEL, after Village review, will incorporate comments and prepare a final document in an electronic format on CDs suitable for making prints and copies. Supplemental photos or documents not included in the final report will be placed on a CD and we will provide other data, photographs or files upon request.

CBBEL understands that the project will start within 7 calendar days of the Notice to Proceed and that deliverables shall abide by the details outlined in the RFP.
