Such circumstances may include, but not be limited to work performed along the route under construction, road closures for construction operations of any type, or when any section of the road is opened to traffic prior to completion of all work. The Contractor shall ensure that work zone in question is properly signed, barricaded and otherwise marked.

The Contractor will be responsible for the proper location, installation, and arrangement of all traffic control devices during the period of construction. All open excavations shall be protected by Type I barricades equipped with working bi-directional flashing lights at each end of the excavation, as well as at 50-foot intervals between ends for excavations greater than 50 feet in length and weighted down by **one sandbag per each barricade**. All street closures shall be protected by Type III barricades equipped with working bi-directional flashing lights and weighted down by **eight sandbags per each barricade**.

The Contractor shall plan the work not to leave any open excavations during non-working hours and that all barricades not necessary have been removed from the pavement during non-working hours.

In the event that one direction of vehicular travel must be closed, the Contractor shall use certified flaggers (minimum of two) to direct traffic around the work area. The Engineer shall approve proper signing and barricading of the lane closures, and shall issue written authorization prior to closure. Presence of certified flaggers shall be required anytime the contractor's activities may impede the designated flow of traffic.

Village of Downers Grove

No street closure shall be permitted without the express written permission of the Engineer. No street closure may exceed 800 linear feet, nor be in effect from Friday at 3:30PM to Monday at 9:00AM. Where it is necessary to establish a temporary detour, all the requirements of the Standard Specifications and MUTCD shall be met.

The Contractor shall maintain his operations in a manner such that traffic flow shall not be substantially impeded during the construction of the proposed improvements. Where traffic must cross open trenches during a given work day, the Contractor shall provide steel plates at street intersections and driveways. Prior to the end of a given work day, the pavement surface shall be temporarily restored.

No open excavation may be left overnight or on the weekend without the express written permission of the Engineer.

As the condition and location of the work changes, the Contractor shall maintain all traffic control devices and personnel engaged in traffic control, in a manner that will accommodate the changing particulars of the work at any given time. Advance warnings, detour and directional information and other controls or directions necessary for safe passage of traffic around the work site shall be reviewed and changed, if necessary, to meet the needs of the situation. Signage erected, but not necessary or proper for the situation ahead shall be covered or taken down. Barricading and signage shall be monitored by the Contractor on a daily basis to ensure that it meets the requirements for work zone safety for the conditions of the particular work being performed.

In the event that one direction of vehicular travel must be closed, **the Contractor shall provide certified flaggers (a minimum of two)** to direct traffic around the work area. If the Contractor chooses to set up a detour route, the Contractor shall present the proposed detour route plan to the Engineer and the Engineer shall approve and issue written authorization prior to closure.

In the event that both directions of vehicular travel must be closed, the Contractor shall set up a detour route to direct traffic around the work area. The Engineer shall approve proper signing and barricading of the detour route and shall issue written authorization prior to closure.

The Contractor shall provide a name and phone number of a responsible party capable of providing emergency service, 24 hours per day, to receive notification of any deficiencies regarding traffic control and protection for the duration of the Project.

Advance Notice: The Contractor shall post "Road Construction Ahead" signs (at least 24 hours but not more than 48 hours) on streets and/or parking lots scheduled to be patched. Signs are to be placed in parkways near intersection corners. The Contractor, immediately upon completion of work on each street and/or parking lots, will remove all such signs.

DEFICIENCY CHARGE:

The primary concern of the Village is to maintain a safe travel way for the public and a safe environment for the work in the construction zone. The Contractor is expected to comply with the Standard Specifications, Special Provisions, and directions from the Engineer concerning traffic control and protection. The Contractor shall immediately respond to correct traffic control deficiencies by dispatching workers, materials, and equipment to correct such deficiencies.

Village of Downers Grove

Failure to comply with directions from the Engineer for corrections or modifications to the traffic control and protection will result in a daily monetary deduction of \$2,500 in accordance with Article 105.03 of the SSRBC. This charge is separate from the cost of any corrective work ordered. The Contractor shall not be relieved of any contractual responsibilities by the Village's actions.

Basis of Payment: This work shall be paid for at the contract **LUMP SUM** price for:

TRAFFIC CONTROL, MAINTENANCE OF TRAFFIC, DETOURS,

which price shall be payment in full for the installation and maintenance of proper traffic control to protect the work and public for the duration of the Project.

SP-5: SCHEDULING AND RESTRICTIONS

Placement of asphalt patches at each street location shall be completed within one day of the milling operation.

The Contractor shall submit a construction schedule to the Engineer at the scheduled pre-construction meeting showing anticipated dates for work.

The Village reserves the right to require adjustments to quantities and scheduling of work. The Contractor shall also make special note of the following requirements.

1. All construction work specified under this contract shall be so engaged as to not impede normal traffic and pedestrian ways. Any barricading to detour traffic must receive prior approval from the Engineer.
2. Special consideration to hours and location of work near businesses shall be made to allow for full and safe access during normal hours of business.
3. Unless otherwise directed by the Engineer, all construction work shall be done such that continuous access to businesses is maintained. However, in all cases, unless otherwise directed by the Engineer, total access must be restored to all types of properties over weekends and legal holidays (7:00 p.m. local time Friday to 7:00 a.m. local time Monday, or until 7:00 a.m. local time the day following a legal holiday). These requirements shall be considered **INCIDENTAL** to the contract.

SP-6: CLASS D PATCH, 1½", SPECIAL

This work shall be performed in accordance with Section 442 of the SSRBC with the following alterations.

The Contractor shall not use equipment of excessive size or weight that causes damage to existing pavement or appurtenances. Any damage done to the existing pavement or appurtenances that are to remain in place shall be repaired or removed and replaced by the Contractor at his/her own expense, as directed by the Engineer.

Asphalt pavement patching shall include the removal of existing pavement to a depth not less than one and one half inches (1½") and applying bituminous prime to full edge of existing pavement. *The minimum width of a patch shall be measured at four feet six inches (4.5') up to a full street width* hence each location can be grinded by a milling machine. The bottom of each prepared patch shall be free of all loose material. Bituminous prime shall be applied to the full patch area. Edges of the patch shall be smooth and free of loose material to a depth of not less than one and one half inches (1½").

Village of Downers Grove

The supply and application of bituminous prime shall be INCIDENTAL.

Paragraph 2 of Article 442.10 is deleted and is replaced by:

Upon milling of the existing pavement, any areas of the pavement which are below the required 1½" removal depth shall be built up to finished grade with compacted HMA Surface Course, Mix D, N50. The supply of additional HMA Surface Course, Mix D, N50 shall be INCIDENTAL and no other compensation will be allowed.

Hot-mix asphalt material shall conform to the applicable requirements of Section 1030 of the SSRBC for Hot-Mix Asphalt Surface Course, Mix D, N50 (IL-9.5 mm).

Patch sizes meeting the specifications in accordance with Article 442.01 of the SSRBC shall be placed using a self-propelled paving machine in accordance with Article 1102.03 of the SSRBC.

Paragraph 5 of Article 442.11 of the SSRBC is deleted and is replaced by: **No additional compensation will be made for repairing subbase damage or for material adhering to removed pavement.**

Add the following to Article 442.08 of the SSRBC.

All Class D patches shall be 1½ inches thick.

Method of Measurement: Pavement removal and replacement shall be measured for payment in place and the area computed in square yards. Patches shall be classified as CL D, 1½". ADDITIONS AND DELETIONS:

The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

Any singular reference to Contractor, Surety, Owner or other party shall be considered plural where applicable.

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.
