**APPENDIX A**  
**Proposal to provide Preconstruction Services for the**  
**Downers Grove Police Department and Village Hall Project**

LEOPARDO COMPANIES, INC. with offices at 5200 Prairie Stone Parkway, Hoffman Estates, Illinois 60192 proposes to provide the following services for the Village of Downers Grove with offices at 801 Burlington Avenue, Downers Grove, IL 60515 for the construction of the new Downers Grove Police Department and Village Hall hereinafter referred to as "The Project", located at 801 Burlington Avenue, Downers Grove, IL 60515.

**PRECONSTRUCTION SCOPE OF WORK AND FEE DESCRIPTION**

The description below provides a detailed look at critical elements and milestones in the development of the project. Our approach to the management of the design and construction of your project will begin with the development of a complete understanding of the goals and objectives by our project team. This understanding serves as a basis from which all subsequent decisions regarding the design and construction approach are to be made. While budget, schedule and project scope issues are universally critical to the success of a project, the manner in which each is addressed must be "tailored" to the unique needs of the Village of Downers Grove and the Downers Grove Police Department.

We utilize a collaborative team building process by assembling a group of key team leaders who have the requisite management, design and technical competence both in design and construction in order to respond to the needs of the project. From Design to Documentation to Construction, our scope of work and tasks within the Work Plan is summarized below:

**SCHEMATIC DESIGN PHASE (SD)**

The Schematic Design process achieved while working closely with Village of Downers Grove and the Police Department includes the exploration of various design and planning alternatives which encompass evaluation, implications and recommendations regarding each option. Jointly, the alternatives will be studied by the project team. Fundamental considerations will include site and open space considerations, environmental impact, functional layout and efficiencies, accommodation of security systems, technology systems, circulation analysis, energy conservation, massing, design vocabulary, growth, flexibility and capital costs.

Ultimately, the schematic designs will be delineated with supporting description, rationale and summarization of size, quality of environment, capital cost and an implementation schedule. A Schematic Design Package will be developed for approval by the Village of Downers Grove and will be the basis from which all subsequent design and construction will

emerge. Following the development of the Program, the Schematic Design phase is the most critical milestone for subsequent decision making. The thoroughness and expertise utilized during this phase ensures that both program and cost objectives will be achieved.

An integrated, collaborative design process will be used for this project. An in-depth site analysis performed with the entire design team will determine the best locations for the building structures, parking, site circulation. Over the course of the Schematic Design phase, the plan will evolve from bubble adjacency diagrams to more detailed department layouts. Finally, the exterior design concept will also be developed over the course of this phase. From this process, floor plans, elevations, outline specifications and narratives are created to document the team's progress and provide structure for the remaining design phases.

With the documents discussed above, the team will:

- 1) Prepare Schematic Design Documents for approval by the Village including site plan, floor plans, and elevations, basic wall sections, and narrative. Site related factors such as site access, security zoning, risk assessments, parking, drainage, solar orientation, and context play a vital role in this process and will be studied to develop the design options including preliminary floor plans and exterior design concepts.
- 2) Take the floor plans, site plan and elevations -- and import them into our on-screen takeoff construction estimating software and quantify everything that is seen and unseen. We will calculate comprehensive item descriptions, quantities and unit pricing to show exactly how we reached our numbers.
- 3) Meet with Village staff and other governmental agencies to map out permitting requirements and processes, and then supplement the schedule accordingly.
- 4) Review the preliminary site logistics plan with Village staff for approval and pricing.
- 5) Develop performance specifications as appropriate.
- 6) Begin the building information modeling (BIM) process for early collision detection, improved 2D and 3D visualizations, increased coordination, reduced costs, etc.
- 7) Develop an automated cost control log to serve as an interactive decision-making tool and allow the entire project team to manage scope changes and see all project elements -- accepted, rejected or pending -- and their respective dollar implications. The team can see the value of all decisions as they're being made and clearly understand how every dollar impacts the project. We use the cost control log to help bridge the gap until the next deliverable, which will be 100% design development documents.
- 8) Attend bi-weekly meetings to review the drawings for adherence to budget parameters; continue offering feedback on material costs; and guide design accordingly.
- 9) Closely review and adjust the schedule based on any changes or building modifications. Identify and proactively plan for long-lead materials, trades and controls -- including sustainable components.
- 10) Develop cross sections of building; analyze cost, constructability and system performance.
- 11) It is anticipated that the Design of the Facility will need to follow the Village of Downers Grove Downtown Design Guidelines dated January 20, 2009.
- 12) The team will prepare Site Plans, Floors Plans, Elevations and Renderings to depict the design aesthetic.

- 13) Team will present the plans, elevations and renderings to the Village at one (1) public meeting.
- 14) Team will make changes as required by the Village in preparation for the next presentation the following month.
- 15) Complete the Schematic Design and prepare and finalize the SD budget.
- 16) At the conclusion of this stage, we invite the entire team back together for an open-book charette to share and discuss our Schematic Design and estimate, analysis, schedule, theories, etc.
- 17) LEED Certification design and documentation not included.
- 18) Up to three (3) presentation quality renderings are included.
- 19) Other than the public meeting noted above, no public outreach meetings are included.
