RECOMMENDATION

Approval on the November 9, 2021 consent agenda.

BACKGROUND

The purpose of parkway tree pruning is to improve tree structure, increase resident satisfaction, enhance tree vigor, increase aesthetic appeal, reduce wind damage, provide adequate clearance, and maintain safe conditions in the right-of-way. The optimum tree pruning cycle is to have each parkway tree pruned once in five years. For more than a decade, the Village has maintained a five year pruning cycle, and staff has noticed more uniformity in tree health and appearance throughout the Village. Areas scheduled for pruning are shown on the attached maps. Addresses within the 2022 map area called in the most service requests for pruning and branch issues in the past year.

A Call for Bids for parkway tree pruning services was issued and published in September 2021 in accordance with the Village's Purchasing Policy. Bidders were asked to provide prices for three years. The bid received is summarized in the following table:

Service Provider	Bid 2022	Bid 2023	Bid 2024	3-Year Total
D. Ryan Tree & Landscape LLC	\$120,440.00	\$120,440.00	\$120,440.00	\$361,320.00

The lowest responsive and responsible bidder is D. Ryan Tree & Landscape LLC (also doing business as NJ Ryan Tree & Landscape LLC) of DeKalb, Illinois. Their municipal references are all positive. This contractor has had the pruning contract for the past thirteen consecutive years (FY09 through FY2021). Staff has been satisfied with their work.

Village of Downers Grove

Commercial Automobile Liability, and Umbrella/Excess Liability policies endorsed to add the "Village of Downers, its officers, officials, employees and volunteers" as "additional insureds" with respect to liability arising out of operations performed; claims for bodily injury or death brought against the Village of Downers Grove by any Contractor or Subcontractor employees, or the employees of Subcontractor's subcontractors of any tier, however caused, related to the performance of operations under the Contract Documents. Renewal certificates shall be provided to the Village not less than five (5) days prior to the expiration date of any of the required policies. All Certificates of Insurance shall be in a form acceptable to the Village and shall provide satisfactory evidence of compliance with all insurance requirements. The Village shall not be obligated to review such certificates or other evidence of insurance, or to advise Contractor or Subcontractor of any deficiencies in such documents, and receipt thereof shall not relieve the Contractor or Subcontractor from, nor be deemed a waiver of the right to enforce the terms of the obligations hereunder. The Village shall have the right to examine any policy required and evidenced on the Certificate of Insurance.
- 38.9 If the Work under the Contract Documents includes design, consultation, or any other professional services, Contractor or the Subcontractor shall procure, maintain, and pay for Professional Errors and Omissions insurance with limits of not less than \$2,000,000 per claim and \$2,000,000 annual aggregate. At the option of the Village, either: the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects the Village, its officers, officials, employees and volunteers; or the Bidder shall procure a bond guaranteeing payment of losses and related investigations, claim administration and defense expenses.

Village of Downers Grove

39. SUBLETTING OF CONTRACT

- 39.1 No contract awarded by the Village shall be assigned or any part subcontracted without the written consent of the Village Manager. In no case shall such consent relieve the Contractor from his obligation or change the terms of the Contract.

All approved subcontracts shall contain language which incorporates the terms and conditions of this Contract.

40. TERM OF CONTRACT

- 40.1 This Contract may be extended no more than twice for subsequent annual periods (two annual extensions) by mutual agreement of both parties, providing such agreement complies with Village purchasing policies and the availability of funds. However, if this Contract is not one that is subject to extension, such information will be available in the detailed specifications or special conditions sections.

41. TERMINATION OF CONTRACT

- 41.1 The Village reserves the right to terminate the whole or any part of this Contract, upon written notice to the Contractor, for any reason and/or in the event that sufficient funds to complete the contract are not appropriated by the Village.
- 41.2 The Village further reserves the right to terminate the whole or any part of this Contract, upon written notice to the Contractor, in the event of default by the Contractor. Default is defined as failure of the Contractor to perform any of the provisions of this Contract or failure to make sufficient progress so as to endanger performance of this Contract in accordance with its terms. In the event that the Contractor fails to cure the default upon notice, and the Village declares default and termination, the Village may procure, upon such terms and in such manner as the Purchasing Manager may deem appropriate, supplies or services similar to those so terminated. The Contractor shall be liable for any excess costs for such similar supplies or services unless acceptable evidence is submitted to the Purchasing Manager that failure to perform the Contract was due to causes beyond the control and without the fault or negligence of the Contractor. Any such excess costs incurred by the Village may be set-off against any monies due and owing by the Village to the Contractor.

42. BILLING & PAYMENT PROCEDURES

- 42.1 Payment will be made upon receipt of an invoice referencing Village of Downers Grove purchase order number. Once an invoice and receipt of materials or service have been verified, the invoice will be processed for payment in accordance with the Village's payment schedule. The Village will comply with the Local Government Prompt Payment Act, 50 ILCS 505/1 et seq., in that any bill approved for payment must be paid or the payment issued to the Contractor within 60 days of receipt of a proper bill or invoice. If payment is not issued to the Contractor within this 60 day period, an interest penalty of 1.0% of any amount approved and unpaid shall be added for each month or fraction thereof after the end of this 60 day period, until final payment is made.

Village of Downers Grove

- 42.2 The Village shall review in a timely manner each bill or invoice after its receipt. If the Village determines that the bill or invoice contains a defect making it unable to process the payment request, the Village shall notify the Contractor requesting payment as soon as possible after discovering the defect pursuant to rules promulgated under 50 ILCS 505/1 et seq. The notice shall identify the defect and any additional information necessary to correct the defect.
- 42.3 If this Contract is for work defined as a "fixed public work" project under the Illinois Prevailing Wage Act, 820 ILCS 130/2, any contractor or subcontractor is required to submit certified payroll records along with the invoice. No invoice shall be paid without said records.
- 42.4 Please send all invoices to the attention of Kerstin G. von der Heide, Village Forester, Village of Downers Grove Public Works, 5101 Walnut Avenue, Downers Grove, IL 60515, or via e-mail to kvonderheide@downers.us.

43. RELATIONSHIP BETWEEN THE BIDDER AND THE VILLAGE

- 43.1 The relationship between the Village and the Bidder is that of a buyer and seller of professional services and it is understood that the parties have not entered into any joint venture or partnership with the other.

44. STANDARD OF CARE

- 44.1 Any services performed by Bidder under this Contract will be conducted in a manner consistent with that level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. No other representations express or implied, and no warranty or guarantee is included or intended in this Contract or in any report, opinions, and documents or otherwise.
- 44.2 If the Bidder fails to meet the foregoing standard, Bidder will perform at its own cost, and without reimbursement from the Village, the professional services necessary to correct errors and omissions caused by Bidder's failure to comply with the above standard and reported to Bidder within one (1) year from the completion of Bidder's services for the Project.

45. SUCCESSORS AND ASSIGNS

- 45.1 The terms of this Contract will be binding upon and inure to the benefit of the parties and their respective successors and assigns; provided, however, that neither party will assign this Contract in whole or in part without the prior written approval of the other. The Bidder will provide a list of key staff, titles, responsibilities, and contact information to include all expected subcontractors.

46. WAIVER OF CONTRACT BREACH

- 46.1 The waiver by one party of any breach of this Contract or the failure of one party to enforce at any time, or for any period of time, any of the provisions hereof will be limited to the particular instance and will not operate or be deemed to waive any future breaches of this

Village of Downers Grove

Contract and will not be construed to be a waiver of any provision except for the particular instance.

47. CHANGE ORDERS

47.1 The contract price is a “not-to-exceed” cost. At any time additional work is necessary or requested, and the not-to-exceed price is increased thereby, all parties must agree to any change, addition or price increase in writing.

47.2 Change orders for public works projects which authorize an increase in the contract price that is 50% or more of the original contract price or that authorize or necessitate any increase in the price of a subcontract under the contract that is 50% or more of the original subcontract price must be resubmitted for bidding in the same manner by which the original contract was bid. (50 ILCS 525/1)

48. SEVERABILITY OF INVALID PROVISIONS

48.1 If any provisions of this Contract are held to contravene or be invalid under the laws of any state, country or jurisdiction, contravention will not invalidate the entire Contract, but it will be construed as if not containing the invalid provision and the rights or obligations of the parties will be construed and enforced accordingly.

49. GOVERNING LAW AND VENUE

49.1 This Contract will be governed by and construed in accordance with the laws of the State of Illinois. Venue is proper only in the County of DuPage for state cases or the Northern District of Illinois for federal cases.

Village of Downers Grove

III. DETAIL SPECIFICATIONS**A. Competitive Sealed Bidding**

The Village of Downers Grove, an Illinois municipal corporation (hereinafter referred to as the "Village"), will receive sealed bids from Contractors for parkway tree pruning services identified in the solicitation. Bids must be received by the date and time specified.

B. Attendance Required at Pre-bid Conference

For the purpose of familiarizing bidders with the project, answering questions, and issuing addenda as needed for clarification of the bidding documents, a mandatory pre-bid conference shall be held at the Downers Grove Public Works Facility, 5101 Walnut Avenue, Downers Grove, Illinois 60515, (630) 434-5460. Bids shall only be opened from Contractors present at the mandatory pre-bid conference. Date and time of the meeting are listed on the cover sheet.

C. Objective

This contract is for the pruning of parkway trees on the public right-of-way within the Village of Downers Grove. The specifications contained herein detail how pruning activities shall develop desired structure and appearance, improve and maintain health, reduce risk, and raise the clearance height of these trees. This contract is not being performed in conjunction with or as part of a public works construction or demolition project.

D. Qualifications of Contractors

The Contractor shall be required before the award of any contract to show to the complete satisfaction of the Village Forester that it has the necessary facilities, ability, and resources to provide the services specified herein in a satisfactory manner. The Contractor shall be required to give past history and references in order to satisfy the Village Forester in regard to the Contractor's qualifications. The Village Forester shall make reasonable investigations deemed necessary and proper to determine the ability of the Contractor to perform the work. The Village Forester reserves the right to reject any bid if the evidence submitted by, or investigation of, the Contractor fails to satisfy the Village Forester that the Contractor is properly qualified to carry out the obligations of the contract and to complete the work described herein. In addition to those requirements set forth in Section 10.1 above, evaluation of the Contractor's qualifications shall include:

1. The ability, capacity, skill, and resources to perform the work or provide the service required.
2. The ability of the Contractor to perform the work or provide the service promptly or within the time specified, without delay or interference.
3. The character, integrity, reputation, judgment, experience, and efficiency of the Contractor.
4. The quality of performance of previous pruning contracts or services with the Village and other municipalities. Bidders must submit a list of not less than four (4) references who can verify the Contractor's successful completion of parkway tree pruning contracts in the last five (5) years. At least four (4) of the municipal references must be for individual pruning contracts in excess of 3,000 parkway trees annually. For any Contractor who has

Village of Downers Grove

not performed pruning work for the Village in the last five years, the Village Forester shall require maps and addresses of trees pruned in other municipalities for field inspections.

5. The status of Tree Care Industry Association (TCIA) Accreditation. TCIA Accreditation shall be used as a tiebreaker for instances when submitted bid prices and all other factors are equal.

E. Bidder Investigations

Before submitting a bid, each Contractor shall make all investigations and examinations necessary to ascertain all site conditions and requirements affecting the full performance of the contract and to verify any representations made by the Village Forester upon which the Contractor will rely. If the Contractor receives an award as a result of their bid submission, failure to have made such investigations and examinations will in no way relieve the Contractor from their obligations to comply in every detail with all provisions and requirements of the contract documents. Nor will the Village accept a plea of ignorance of such conditions and requirements as a basis for any claim whatsoever by the Contractor for additional compensation.

F. Quantities

Whenever a bid is sought for services, the quantities shall be construed as estimates for the purpose of obtaining unit prices to uniformly evaluate bids unless otherwise stated. The Village reserves the right to increase or decrease the stated quantities, adjust pruning map boundaries, and switch pruning priorities.

G. Award of Contract

The Village Forester shall review the submitted bids and shall rank the submitted bids by contract activity forecast (the sum total of unit price multiplied by the quantity of trees). If the submitted unit price and the calculated extension price on the bid form are at variance, the unit price shall prevail. Additional information including work history, references, and TCIA accreditation shall be reviewed as listed in Section D - Qualifications of Contractors.

The award shall be made to the lowest responsive and responsible bidder (one Contractor) for all map areas. The Village shall select the bid which is the most advantageous to the Village. Depending upon budget, the Village Forester may reduce the number of trees in all or part of a map area in order to meet forestry goals.

H. Term of Contract

In accordance with terms mentioned in Section 40.1 above, the contract term shall be three (3) complete calendar years starting January 1 of 2022 and ending December 31 of 2024.

Village of Downers Grove

I. Insurance for Illinois State and DuPage County Right-of-Ways

In that the Village has planted and maintained trees on both Illinois State and DuPage County right-of-ways, the Village Forester must obtain permits annually for any tree related work on those right-of-ways. These permits require certificates of insurance in addition to those required by the Village. The Village Forester shall coordinate the permit process. At a minimum, Illinois State and DuPage County are to be listed as additional insured. Requirements for DuPage County are listed in the Highway Permit Application Packet at <https://www.dupageco.org/HighwayPermits/>

J. Parkway Tree Composition in Downers Grove

There are over 22,700 parkway trees in Downers Grove.

The following are the 5 most common parkway trees:

Honeylocust 12.5%, Silver Maple 7.6%, Norway Maple 7.0%, American Linden 5.4% and Freeman Maple 5.0%.

Parkway trees are of following diameter sizes: 22.5 % are 0-6.0", 66.9% are 6.1-24.0", 9.7% are 24.1-36.0", and 0.9% are greater than 36.1".

K. Parkway Trees for Pruning

Parkway trees to be pruned by the Contractor are all deciduous and evergreen trees in the parkway with a diameter at breast height (DBH at 4.5') greater than six inches (6") located within the areas marked on the map. Parkway trees are those located between the street edge and public sidewalk, and those with a yellow paint mark on the stem in areas without sidewalks or where the right-of-way extends past the sidewalk. M. Pruning Specifications**1. Purpose and Pruning Procedures**

- a. All pruning shall follow the *ANSI A300 (Part 1) - 2017 Pruning Standard* and the ISA's *Best Management Practices: Tree Pruning (2019)*. The Natural Pruning System shall be used to retain and promote the characteristic form of the species or cultivar in its current location.
- b. All pruning shall accomplish the following objectives – improve branch architecture and structure, mitigate risk and reduce the likelihood of failure in the future, provide clearance, maintain health, and reduce density of foliage at the crown periphery for each individual tree species at its given size and age.
- c. Structural pruning shall improve tree architecture by developing a dominant leader appropriate for the species and site. Appropriate pruning cuts shall subordinate or remove competing leaders, branches and shoots.
- d. Structural pruning shall influence the orientation, spacing, growth rate, strength of attachment, and ultimate size of branches and stems. Structural pruning shall select and establish scaffold limbs above the lowest permanent limb and provide the base on which to build the permanent crown. Particular attention is to be given to young trees (those less than 50 years old with diameters 6"-24"). Sustainable scaffold branches are those that are located high enough aboveground to become a permanent part of the tree, strongly attached to the trunk free of serious defects such as included bark and sharp bends, among the largest on the tree but less than the trunk diameter, growing in a radial direction outward from the stem, and appropriately spaced vertically apart. Appropriate vertical spacing is 8 to 12 inches for smaller trees and 18 to 24 inches or more for large-maturing trees.
- e. Pruning to mitigate risk shall remove all non-beneficial parts including dead, diseased, decayed, hanging, dying, cracked, broken or detached branches. This shall apply to all branches and stubs greater than ½" (half inch) in diameter.
- f. Clearance pruning shall remove lower branches where practical (dependent on tree size) to obtain an eventual permanent full foliage vertical height clearance of fourteen (14) feet on the street side of the tree. All work shall always maintain the crown shape and symmetry typical of the species being pruned, and shall balance the tree evenly. This raising should also allow an eventual clearance over the pedestrian walk of eight (8) feet. Directional pruning is the preferred way to direct branch growth, and may include reduction cuts to shorten lower limbs or to lighten lower branch loads to achieve clearance if complete branch removal is not practical.
- g. Pruning for clearance such that branches do not interfere with infrastructure, houses, building rooftops, streetlights, lines-of-sight, and all traffic control devices by a minimum of fifteen (15) feet. Branches shall be pruned such that all traffic control devices (including but not limited to traffic light signals, opticom cameras, STOP and Yield signs, speed limit signs, parking control signs) are visible to moving traffic.
- h. Pruning to maintain health includes the removal of infested, infected, dead or dying, damaged or rubbing branches.
- i. Pruning to reduce density of foliage at the crown periphery includes removing crowded and low vigor branches, increasing light penetration and air movement

Village of Downers Grove

through the crown, and removing shoots or sprouts from the base of the tree and crowded watersprouts on the interior. The objective of reducing density may be achieved in combination with improving tree structure.

- j. All pruning shall not remove more living material than is necessary to achieve specified objectives.

2. Pruning Cuts and Tools

- a. All branch removal and reduction cuts shall be the smallest diameter possible, and the number and size of cuts that expose heartwood kept to a minimum.
- b. All limbs to be removed shall be cut in such a manner so as to prevent any ripping or tearing of the wood or bark on the parent or remaining stem. Large limbs shall be cut using the pre-cut pruning method.
- c. All branch removal cuts shall be made sufficiently close to the trunk or parent limb, without cutting into the branch bark ridge or branch collar, or without leaving a protruding stub. If there is no collar, the top of the cut shall be located where the top of the branch makes an abrupt upward turn into the union. The face of the branch removal cut should generally be perpendicular to the top of the branch and be circular in form. "Flush" cuts to the main stem behind the branch collar that leave oval exposed wounds shall not be made. Cuts shall be made such that all wound sides are even edged and do not leave "dog ear" ridges on one side or another. Clean smooth cuts shall be made at all times without leaving any jagged edges or stubs.
- d. All reduction cuts shall be made to a live lateral branch or codominant stem at a slight angle, without damaging the branch bark ridge and without leaving a stub.
- e. All limbs shall be brought to the ground in such a manner as to prevent any damage to real or personal property, publicly or privately owned.
- f. Proper tools shall be used for each pruning cut. All equipment and tools shall be maintained according to manufacturer's recommendations. Blades of each tool, including hand pruners, pole saws, hand saws, and chain saws, shall be placed on each branch in a manner that does not cut, rip, or harm adjacent bark areas.
- g. No person working in trees shall use shoes with spikes, or any other footwear, which will, in the opinion of the Village Forester, injure the tree being pruned. At no time shall any person working in trees for pruning purposes, wear spurs or climbing irons.

3. Pruning of Elm

All American elms (*Ulmus americana*) or other elms susceptible to Dutch Elm Disease shall be pruned by April 1st of each year.

4. Pruning of Trees Near Power Wires

Trees which have been disfigured due to ComEd pruning for power line clearance shall only be pruned for height clearance from the ground, clearance from buildings, and removal of structurally weak branches or deadwood under this contract.

Village of Downers Grove

N. Inspections for Insects, Diseases and Decay

In that a wide variety of tree species are included in the contract, pruned limbs, branches and ash trunks are to be inspected for the presence of insects, diseases and decay. Limbs and branches are to be made available for Village staff to inspect from time to time before being chipped. The Contractor shall notify the Village Forester if significant insects, diseases or decay areas are found.

O. Site Appearance and Clean-Up

Pruned limbs and branches temporarily placed in the parkway area shall be placed in such a manner as to eliminate any obstruction to motor vehicles and pedestrians including streets, driveways and sidewalks. At all times, pruning crews shall not advance more than 1 block ahead of chipping/clean-up crews.

The Contractor shall clean up the site and remove and dispose of all debris. Site cleanup shall include removal of sawdust, small twigs, chips, leaves, trunks and limbs from the street, curb, parkway, sidewalk, private lawns and driveways with the appropriate tools for the job. The site shall be returned to the same state it existed in prior to the pruning work. Under no circumstances shall any materials be allowed to lie on the parkway overnight.

As pruning may occur during or after snow events, some debris may filter down through the snow and may not be immediately accessible for clean up. In these instances, it is the responsibility of the Contractor to re-clean and rake up debris in these areas within 2 to 3 days after the snow melts. No extra payment shall be made for this clean up work.

P. Wood and Chip/Grinding Debris Disposal

Disposal of wood chips and grinding debris generated by work described within this contract shall be the responsibility of the Contractor. The Contractor may deliver chips to the homes of Village residents as requested by the residents without charge, at a time convenient to the Contractor. Chips shall be left only on private property and not on the parkway or in the street. Any logs requested by the residents shall be given free of charge and shall not be from diseased trees. Logs left at the homeowner's request must be on the resident's property and not the parkway. Any logs from elm trees must have the bark removed.

Q. Damage to Public or Private Property

Should any damage to private or public property occur as a result of the service performed or work done by the Contractor, the Contractor shall immediately notify the Village Forester or other Village representative of such damage. Any correction of damage shall be resolved within ten (10) days after damage occurs. Should the damage not be rectified within the time frame agreed upon or to the satisfaction of the Village Forester, the Village reserves the right to repair or replace that which was damaged and assess the Contractor such costs as may be reasonable and related to damage caused by the Contractor, and deduct these costs from any payment due the Contractor.

Village of Downers Grove

R. Protection of Overhead Utilities

Tree pruning operations may be conducted in areas where overhead electric, telephone, and cable television facilities exist. The Contractor shall protect all utilities from damage, shall immediately contact the appropriate utility if damage should occur, and shall be responsible for all claims for damage due to their operation. The Contractor shall make arrangements with the utility for removal of all necessary limbs and branches that may conflict with or create a hazard in conducting the operations of this contract. If the Contractor has properly contacted the utility in sufficient time to arrange for the required work by the utility, delays encountered by the Contractor in waiting for the utility to complete its work shall not be the responsibility of the Contractor.

S. Contractor Personnel and Equipment

The Contractor shall supply all material, equipment and personnel necessary to complete the work specified. The Contractor shall rent equipment as needed to cover any equipment breakdowns that would cause this contract to not be completed in the allotted time period. All vehicles and attached equipment shall have the Contractor's name in a visible location. Personal vehicles shall have the name in the window. All vehicles and equipment shall abide by the standards listed in the Traffic Control section. All vehicles and equipment shall have all the appropriate items to avoid damage to public and private property (example – boards or pads for outriggers to avoid depressions, etc...).

The Contractor shall employ only competent and efficient employees. All employees and supervisors shall wear uniforms or apparel clearly displaying the company name for ease of identification. All individuals shall be familiar with the pruning specifications identified in this document and shall be experienced in pruning operations. Competent individuals and not those in “training” shall perform actual pruning. The Village Forester or other Village representative shall have, throughout the life of the contract, the right of reasonable rejection and approval of staff assigned to the work by the Contractor. If the Village Forester or other Village representative rejects staff, the Contractor must provide replacement staff satisfactory to the Village Forester or other Village representative in a timely manner and at no additional cost to the Village. The day-to-day supervision and control of the Contractor's employees is the responsibility solely of the Contractor.

On a daily basis, the minimum number of individuals on the pruning crew shall be four (4). Work crews may be split to work on different streets but a minimum of one English speaking supervisor shall be at each location at all times.

The Contractor shall at all times endeavor to maintain good relations with the public and respectfully answer questions. If work and equipment must block a driveway, the Contractor shall make contact with the property resident to inform them of the work, shall keep the time of blockage to a minimum and shall move equipment promptly if requested.

T. Storage of Equipment and Materials

If the Contractor desires to store its equipment and materials used to perform work on behalf of the Village within Downers Grove, and has no place of its own, or under lease agreement,

Village of Downers Grove

the Village may provide said space on a Village property (ex. 5101 Walnut Avenue), with the provision that the Contractor must hold the Village harmless for any loss or damages that may be associated with the privilege of storing said equipment and materials on Village property. Under these circumstances, the Village will not be responsible for assuring security of the designated site, and the Contractor will be responsible for abiding by rules set forth by the Village. This privilege may be immediately rescinded by the Village if, in the sole determination of the Village, the Village finds that the Contractor has failed to abide by the Village's regulations.

U. **Work Crew Supervision**

The Contractor shall provide qualified supervision of each crew at all times while working under this contract. Each supervisor shall be fluent in English and be authorized by the Contractor to accept and act upon all directives issued by the Village Forester or other Village representative.

V. **Certified Arborist**

At least one individual shall be on the job site at all times who has passed the International Society of Arboriculture (ISA) arborist certification exam and received a Certified Arborist certificate prior to the bid opening date listed on the cover sheet. Their name(s) and certification number(s) must be included in the bid document to be considered for this project, and listed on the ISA website at <http://www.isa-arbor.com>. Any change in the status of the Certified Arborist individual(s) during the life of this contract must be reported to the Village Forester at the time of occurrence. Failure to have a Certified Arborist on site at all times shall result in termination of the contract.

W. **Starting and Completion Requirements**

Work may begin on the first Monday in January of a given year, or at a time mutually agreed upon by the Contractor and the Village Forester. Work must commence no later than January 15 of a given year. All work shall be completed prior to April 30 of a given year. Fifty percent (50%) of the dollar value of the contract shall be completed by February 28 of a given year, as an indication that the Contractor is satisfactorily progressing toward completion of the contract. Once work has begun, the Contractor shall work successive workdays as is practical until the contract has been completed.

X. **Workdays and Working Hours**

The Contractor shall schedule work between the hours of 7:00 a.m. and 5:00 p.m., Monday through Friday, unless authorized by the Village Forester or other Village representative thereof. Any work within a two-block radius of a school shall be performed between the hours of 9:00 a.m. and 2:00 p.m. It is preferred that work is scheduled on days when school is not in session. Village of Downers Grove

Y. Safety Standards

All equipment to be used and all work to be performed shall be in full compliance with the most current revision of the *ANSI Z133.1-2017 Safety Requirements for Arboricultural Operations*, or as amended.

Contractor personnel exposed to public vehicular traffic shall wear warning vests or other suitable garments marked with or made of reflectorized material. At a minimum, this includes ANSI Class 2 garments.

Z. Traffic Control

The Contractor shall conduct its operations in a manner that will not interrupt pedestrian or vehicle traffic except as approved by the Village. The work area shall be confined to the smallest area possible to allow maximum use of the street or sidewalk and to minimize any hazard to traffic or pedestrians. The Contractor shall provide adequate traffic control for work area protection in compliance with the Federal Highway Administration *Manual on Uniform Traffic Control Devices for Streets and Highways* (MUTCD) current edition, the State of Illinois *Illinois Vehicle Code*, the Illinois Department of Transportation *Highway Standards*, and the Illinois Department of Transportation *Handbook of Traffic Engineering Practice for Small Cities*. All personnel, signs, barricades, and any other items or devices necessary shall be provided by the Contractor. The Village shall make no separate payment for this work. Traffic control shall include but not be limited to the following:

1. All work vehicles shall be positioned on the same side of the street as the work site.
2. Whenever possible the work site on a two lane street or highway shall be confined to one traffic lane leaving the opposite lane open to traffic.
3. Work area protection shall take into account the duration of the project, the size of the project, the lanes of traffic, the volume of traffic, the speed limit, and the distance to the work area from the pavement.
4. Work vehicles shall have the flasher light lit but not as a substitute for any traffic control devices for work area protection that may be necessary.
5. Under certain field conditions such as hills and curves, the spacing of the traffic control devices shall be adjusted as necessary.
6. Warning signs such as "Men Working" shall be diamond shaped having a black symbol or message on an orange reflective background. Such signs shall be 48 inches by 48 inches in size and shall be posted at a minimum height of 12 inches above the pavement.
7. Cones used as daytime channeling devices shall be at least 18 inches tall, conical or tubular in shape with a broadened base, and orange in color. Cones shall be spaced equal in feet to the posted speed limit or closer along the taper length.
8. Channeling devices such as cones shall be positioned to provide adequate taper length before the work area to guide traffic through the work area. Tapers approaching the work zone shall be:
 - 150' minimum for posted speed limits 35 mph or higher
 - 50' minimum for posted speed limits 30 mph or less

Village of Downers Grove

9. Should individuals progress ahead of vehicles, such as tree climbers, cones shall be placed in the roadway to alert motorists of activity in those trees.
10. For lane closures on busy streets, appropriate signal boards and warning signs such as "Right Lane Closed" and channeling devices at the appropriate intervals shall be used depending on the speed limit.
11. Should complete street closure be required in order to complete contract work, the Contractor shall notify the Forestry Division 24 hours in advance to coordinate and to plan appropriate actions. At the time the road is closed, the Contractor shall notify the Police Department, and the appropriate barricades (at least 3 Type II barricades at each intersection), and "Road Closed" and "Detour" arrow signs used.
12. Flaggers shall be appropriately dressed (high visibility safety apparel, etc.) to alert motorists, shall stand in a conspicuous position facing approaching traffic, and shall use the proper traffic control sign and IDOT flagging procedures when directing traffic.

AA. Outdoor Advance Notice Signs

The Contractor shall post suitable outdoor advance notice signs (at least 24 hours but not more than 7 days prior to performing work in that location) on streets scheduled to be pruned. Signs are to be posted in parkways, at intersection corners, and suitable intervals, facing all directions of travel. The Contractor, immediately upon completion of work on each street, shall remove all such signs. The sign used must be approved by the Village Forester and indicate the type of work that is planned for the area (i.e. pruning), the date range it is planned for, and any other language approved/required by the Municipality.

The Contractor is responsible for all outdoor advance notice signs and this item is incidental to the cost of the overall contract work.

AB. Report Form Submission

The Village will provide the "Pruning Checklist" report form for the Contractor to fax or e-mail to the Village Forester at the end of each work week. The Contractor shall be responsible to submit this weekly "Pruning Checklist" report form at the end of each week indicating what work has been completed that week. The submitted report form will be inspected for compliance with the specifications for pruning. Incomplete or unsatisfactory pruning or missed trees will be noted. Report forms will then be used to verify and approve payment for services.

The Contractor shall report any structural weakness, decayed trunk or branches, split crotches, or when removal is the best option instead of pruning on the provided report forms.

AC. Inspection of Work

All work shall be completed to the satisfaction of the Village Forester, or other Village representative, and same shall resolve any questions as to proper procedures or quality of workmanship.

Village of Downers Grove

AD. Unsatisfactory or Unsafe Work

If, at any time during the contract, the service performed or work done by the Contractor is considered by the Village to create a condition that threatens the health, safety, or welfare of the community, the Contractor shall, on being notified either by written or oral notice, immediately correct such deficient service or work. In the event the Contractor fails, after notice, to correct the deficient service or work immediately, the Village shall have the right to order correction of the deficiency by separate contract or with its own resources at the expense of the Contractor. The Village reserves the right to terminate the whole or any part of this contract in the event the awarded Contractor fails to perform any of the provisions of this contract.

AE. Costs and Basis of Payment

The Contractor affirms and states that the prices submitted herein constitute the total cost to the Village for all work involved in the respective items. This cost also includes all insurance, bonds, royalties, transportation charges, use of all tools and equipment, superintendence, overhead expense, inspection costs, all profits and all other work, services and conditions necessarily involved in the work to be done in accordance with the requirements of the Contract Documents considered severally and collectively.

The Contractor shall be paid for the work described herein on a per tree basis depending on the tree's diameter and the unit price for a given tree diameter. The tree diameter shall be measured with a standard measuring tape at a point four and one-half (4.5) feet above the highest ground level at the tree. In cases of low-branching trees with a crotch that is four and one-half (4.5) feet or lower from the ground, measurement shall be taken below the lowest branch. If a tree becomes multi-stemmed below one (1) foot, each stem shall be measured independently and shall be paid as a single tree if stems number 3 or less, and as 2 trees if stems number more than 3.

Partial payment shall be made to the Contractor as work progresses but, in no case, shall payment be made on trees not completed to the satisfaction of the Village Forester and in accordance with these specifications and accepted arboricultural practices.

The contract unit prices shall remain firm for the contract term, or until all pruning work is complete. No adjustments in contract unit prices or additional compensation will be made for increases or decreases in the quantities.

The Awarded Contractor shall send all invoices to the Village Forester. The Village shall pay the Contractor after receipt of a correct invoice for reasonable work allocable to the contract or after the date of acceptance of work that meets the contract requirements, whichever occurs later.

AF. Liquidated Damages

The Village and Contractor recognize that time and work quality is of the essence to this contract. They also recognize the delays, expense and difficulties involved in a legal or

Village of Downers Grove

arbitration proceeding. Instead, the Contractor shall be liable and shall pay the Village as liquidated damages the amount shown in the following schedule. The liquidated damage amount specified will accrue and be assessed until final completion of the total physical work of the contract. The Village shall deduct these liquidated damages from any monies due or to become due to the Contractor for breach of this contract.

- 1) \$100.00 per day for failure to complete the work in the time frames required by this contract;
- 2) \$100.00 per day for failure to clean-up and restore each site as required by this contract;
- 3) \$100.00 for each tree improperly pruned or with incorrect pruning cuts such as flush cuts and tears.

AG. Tree Care Industry Association Accreditation

TCIA Accreditation shall be used as a tiebreaker for instances when submitted bid prices and all other factors are equal. If applicable, a copy of the accreditation certificate is to be submitted with the bid.

AH. Failure to Enforce

Failure by the Village at any time to enforce the provisions of the contract shall not be construed as a waiver of any such provisions. Such failure to enforce shall not affect the validity of the contract or any part thereof or the right of the Village to enforce any provision at any time in accordance with its terms.

Contractor Evaluation

Contractor: D Ryan Tree and Landscape LLC

Project: Parkway Tree Pruning for 2021, 3rd year of 3-yr contract

Primary Contact: DaRin Ryan Phone: 1-630-800-8767

Time Period: started Jan 18 to June 9, and finished Aug 2 to Oct 8, 2021

On Schedule (allowing for uncontrollable circumstances) ☒ Yes ☐ No

Provide details if early or late completion: Pruning of 3,926 trees was complete by end Oct 8 with interruptions due to COVID 19 and Woodridge tornado response, at a cost of \$100,218.00.

Change Orders (attach information if needed): None

Difficulties / Positives: D Ryan Tree and Landscape were very easy to deal with and are very well experienced with municipal parkway tree pruning. I was able to communicate with the foreman and crew about the pruning work without any difficulty. Both the actual pruning work and follow-up cleanup were thoroughly completed. This contract year is the 13th consecutive year with D Ryan Tree and Landscape (also dba NJ Ryan Tree and Landscape).

Interaction with public:

☐ Excellent ☒ Good ☐ Average ☐ Poor

More than 2390 properties were included in the pruning area. The forestry staff received a few verbal and email compliments. Complaints about the amount of pruning were limited to 2 sites, as well as a few about tree debris which were quickly remedied. The crew reported residents they interacted with were pleasant and pleased with work activities.

General Level of Satisfaction with work:
