Re: Fire Station Number 1  
2560 Wisconsin Avenue

Dear Dan,

Per your request we have inspected the roofs on the Fire Station No. 1 and the following is the results of our investigation.

The existing roof system consists of two (2) applications. There is the original asphalt built up roof system installed when the building was first built then there is a second application that is a multi-ply modified bitumen roof membrane system.

There is significant amount of widespread deterioration throughout the roof, and it is our recommendation that a new roof system consisting of a TPO membrane be installed.

Base on the above

We propose to furnish all labor and material to install the 60 mil TPO roof membrane on the subject project for the total cost of \$145,000.00.

This price includes the following:

1. The removal and disposal of all existing roofing down to the structural roof deck.
2. The installation of one layer of 5/8" thick gypsum-based roofing substate board, that will be mechanically attached to the metal roof deck.
3. The installation of a self-adhering rubberized asphalt air and vapor barrier.
4. The installation of multiple layers of polyisocyanurate roof insulation to achieve R-30.
5. The installation of a layer of 1/2" thick high density insulation cover board. The insulation and cover board will be adhered using a low-rise urethane foam adhesive.
6. The installation of a 60-mil TPO roof membrane adhered to the cover board.
7. The installation of all new per-finished metal coping, edge metal and gutters.
8. The furnishing of the roof membrane manufacturers 20-year warranty.

If you have any questions please do not hesitate to call.

Sincerely,

Joseph E. McDevitt
