VILLAGE OF DOWNERS GROVE Report for the Village Council Meeting 9/20/2022

SUBJECT:	SUBMITTED BY:		
Amendment to the agreement with Minuteman Security	Shanon Gillette		
Technologies regarding mobile License Plate Reader	Chief of Police		

SYNOPSIS

A resolution has been prepared to amend the agreement with Minuteman Security Technologies to move the Mobile License Plate Reader (LPR) data from a local server at the Police Department to Minuteman's Regional Cloud.

STRATEGIC PLAN ALIGNMENT

The goals for 2021-2023 include *Exceptional Municipal Services* and *Steward of Financial and Environmental Sustainability and Continual Innovation*.

FISCAL IMPACT

The total cost of the conversion is \$1,753.85. The proposed FY22 budget provides sufficient funds for this expenditure.

RECOMMENDATION

Approval on the September 20, 2022 consent agenda.

BACKGROUND

Currently, the police department uses a vehicle equipped with mobile LPR for parking enforcement. The digital license plate data from the LPR cameras on that vehicle is stored locally on a physical server located here at Village Hall. Converting the data to the cloud would eliminate the need for the server, as well as make the data transfer process more efficient and effective. Additionally, the data from the mobile LPR car would be merged with the LPR data from the fixed system, which will be collected on the same cloud storage service.

Scope:

The Village of Downers Grove currently has a Mobile LPR car that sends all reads/hits to a local server at the PD. DGPD would like to move this system off the local server and have all reads/hits sent directly to Minuteman's Regional Cloud.

* How will the system offload reads and upload the hot lists, when it will occur, how and where? The same as it does today. These lists are updated twice daily by ISP. When ISP emails you these updates our system will automatically send these updates to our system. As long as we have a copy of your MOU with Minuteman as your vender, we can grab these direct from ISP's SFTP site

* Can the system automatically upload the hotlist data to the car and offload the reads in a timely manner? Yes, this is all done instantly.

* Does the system remotely via a router in the car or does it happen when the car gets to the PD? How many times a day does this happen?

All reads/hits are sent within a fraction of second to our cloud via a sim card in the laptop. This happens every time the camera reads a plate or gets a hit. If you have concerns about data usage, it can be configured to send plain old reads via hotspot. Hits and Hotlis5ts/permits are send immediately however

* Does the car currently have all the equipment to make the offload/upload process happen ? Is there a Cradelpoint already? Yes, this is all done through the laptop sim card. Can you confirm what laptop you are using and that is has a sim card?
