

Washington St and Railroad Tracks Intersection Study

August 5, 2025

Summary from June 3 Meeting

- Presented findings from the intersection study:
 - *“Overall, the intersections within the study area function well most of the day.”*
- Presented TaP recommendations and provided staff context
- Council requested more information on signalization

Signalization Impacts

- Full time operation, can increase likelihood of violations when intersection is clear
- Unintended queuing consequences
- In-depth study and design, 2-3 years
- Permitting requirements, may extend timeline
- Cost: up to \$500,000
