

VILLAGE OF DOWNERS GROVE
Report for the Village Council Meeting
3/10/2026

SUBJECT:	SUBMITTED BY:
2026/2027 Rock Salt Allocation	David Moody Director of Public Works

SYNOPSIS

A motion is requested to authorize a rock salt allocation of 4,400 tons with DuPage County, and 2,000 tons with the State of Illinois, in the joint purchase of bulk rock salt for the 2026/2027 season. The Village will be obligated to authorize execution of purchase contracts for these allocations at a future date.

STRATEGIC PLAN ALIGNMENT

The goals for 2025-2027 include *Exceptional Municipal Services*.

FISCAL IMPACT

The Village's winter snow and ice control operations span two fiscal years. The budget for 2026-2027 is anticipated to include approximately \$650,000 in the General Fund. \$325,000 is included in the FY26 budget and \$325,000 is anticipated for the FY27 budget.

RECOMMENDATION

Approval on the March 10, 2026 Consent Agenda.

BACKGROUND

The availability and use of bulk rock salt is necessary to meet the snow removal program goal of maintaining safe travel routes during and following snowstorms, as well as restoring mobility for the traveling public within a reasonable time frame following cessation of storm conditions. There are three objectives to achieve when purchasing road salt:

- 1) Maintain the salt supply to respond to all winter weather events per the Village Snow Removal and Ice Control Plan
- 2) Diversify salt supply to ensure on-time delivery
- 3) Minimize cost

To best meet these objectives for the 2026-2027 season, staff recommends purchasing rock salt through two cooperative purchasing contracts, one with the State of Illinois and the other with DuPage County, as shown in the table below. The State requires formal approval of the salt allocation prior to their purchase of the Village's salt. The Village Council will approve the purchase of salt through the County contract after the contract has been bid.

Requested Allocation (tons)	Minimum	100% Allocation	Maximum
State of Illinois Contract	1,600	2,000	2,400
DuPage County Contract	4,400		
Total Amount	6,000	6,400	6,800

The minimum amount of salt recommended to be purchased, 6,000 tons, along with the approximately 2,500 tons estimated to be on hand at the end of this snow season, would provide the Village with 8,500 tons of salt for the 2026/2027 season, which will allow the Village to continue to meet the service objectives described in the Village Snow Removal and Ice Control Policy in a cost-effective manner. The annual salt use for an average winter is about 5,000 tons, with a minimum use of about 2,800 tons and a maximum use of about 8,449 tons. The maximum amount of salt the Village could purchase under these contracts would provide 9,300 tons, including the salt on hand.
