

Responses to Village Council Questions October 20, 2026

FIRST READING: [ORD 2026-11423](#) A. Ordinance: Amending Chapter 14 Making Certain Traffic Control, Parking and Speed Provisions and Pedestrian/Bike Safety Improvements

1. *Are there any recommendations related to Main Street from 75th Street to Lemont Road?*

Temporary speed feedback signs, and a high visibility crosswalk at 75th Street across Main Street are recommended on Main Street between 75th Street and Lemont Road. Additional horizontal deflection measures (curb extensions, median islands, chokers/neck-downs, chicanes, etc.) may be appropriate if initial traffic calming with speed feedback signs is not effective in reducing speeds.

2. *Has the Village pursued the installation of flashing beacons along Main Street from 63rd Street to McCollum Park to enhance safety at pedestrian crossings?*

The Village has pursued several pedestrian safety enhancements for this street segment which is under the jurisdiction of DuPage County, including:

- Traffic signal at Oxford
- Flashing beacon signals at multiple pedestrian street crossings

MANAGER'S REPORT: [REP 2026-11435](#) B. Report: Priority Action Item Update

1. *Please provide an update on the number of existing lead service lines. What additional steps will be taken to identify lead service lines?*

Service Line Material	Current Number	Number as of March, 2026
*Lead	1,539	1,287
*Galvanized	181	181
Unknown	600	1,126

**NOTE: Lead and galvanized lines must be replaced*

The contractor working on identifying unknown lines has until 12/31/2026 to complete the remaining locations, which they are on schedule to do, and at that time the final water service line inventory will be complete.
